Grade 7 — Weekly review — Module 5 Week 2 — TEACHER KEY

Date: 2027-03-05

Eight-subject review of taught work; practical evidence may replace a written response. Friday remains flexible.

Math — Fraction and decimal multiplication/division

1. -4 + 11 = ? (1 points)

Expected answer / rubric: 7

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.

ELA — Modifiers and comparison

1. Write a short response to today’s Khan reading or grammar lesson. Include a specific example. (3 points)

Expected answer / rubric: Relevant response and an accurate example of the day’s skill.

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.

Physical Sciences — Work, levers, and mechanical advantage

Read before you begin

A lever trades applied force and distance under idealized conditions. Real systems lose some useful mechanical energy through processes such as friction.

1. Does a simple machine create energy? (2 points)

Expected answer / rubric: No; it changes how force and distance relate and has losses in real use.

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.

Social Studies — Rise/spread of Islam

W2 background: The Arabian Peninsula in the seventh century CE. Movement of people, texts, institutions, and contacts can carry ideas; mechanisms vary. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. Map a route of cultural/religious exchange. (3 points)

Expected answer / rubric: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Accurate broad regions, a plausible mechanism, and limits; distinguish exchange from universal acceptance.

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.

Art — Architecture and geometry

Read before you begin

Architecture combines function, materials, structure, and appearance. Drawings and models simplify buildings. Geometry and measurement communicate design choices.

1. Why model before construction? (2 points)

Expected answer / rubric: To explore and communicate choices at a manageable scale.

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.

Life Sciences — Consequences and duties

Read before you begin

Some ethical approaches emphasize outcomes; others emphasize duties or rights. Careful decisions consider who is affected and which commitments matter. Good intentions do not guarantee good outcomes.

1. What is a consequence? (2 points)

Expected answer / rubric: An outcome or effect of an action.

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.

Computer Science — Coordinates and movement

Read before you begin

Coordinates locate positions with ordered values. On a standard plane, x is horizontal and y vertical. State units and scale when they matter.

1. What does changing x usually represent? (2 points)

Expected answer / rubric: A horizontal position change on a standard coordinate plane.

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.

Life Skills — Movement and physical activity

Read before you begin

Physical activity includes play, dance, walking, and sports. Choose safe accessible movement with rest as needed. The goal is participation rather than comparing bodies.

1. Must activity be identical for everyone? (2 points)

Expected answer / rubric: No; activities can be adapted to abilities, needs, and space.

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.
