Grade 7 — Weekly review — Module 8 Week 2 — TEACHER KEY

Date: 2027-06-04

Eight-subject review of taught work; practical evidence may replace a written response. Friday remains flexible.

Math — Scale drawings and proportional lengths

1. At scale 1 cm : 6 m, what actual length is 5 cm? (1 points)

Expected answer / rubric: 30 m

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.

ELA — Edit conventions in context

1. Write a short response to today’s Khan reading or grammar lesson. Include a specific example. (3 points)

Expected answer / rubric: Relevant response and an accurate example of the day’s skill.

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.

Physical Sciences — Analyze multi- variable data

1. What is a confounding variable? (1 points)

Expected answer / rubric: A factor that varies with the tested condition and can influence the outcome.

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.

Social Studies — Reformation

W2 background: Religious reform movements and challenges to church practices/authority, with political/social consequences. Texts could be reproduced and shared more quickly. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. Explain a reform argument’s circulation. (3 points)

Expected answer / rubric: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Idea/text, printing/network, differing responses, and context; avoid universal agreement.

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.

Art — Craft and function

Read before you begin

Craft combines function and appearance. Materials and use constrain designs. Decoration alone does not guarantee that something is strong or useful.

1. Why evaluate function? (2 points)

Expected answer / rubric: An attractive object may not perform its intended task.

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.

Life Sciences — Social influence

Read before you begin

People are influenced by peers, families, institutions, and media. Influence does not remove responsibility and does not affect everyone identically. A causal claim needs more than a single example.

1. Does influence always determine an action? (2 points)

Expected answer / rubric: No; people can evaluate, resist, or respond differently.

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.

Computer Science — CSS and layout

Read before you begin

CSS describes presentation, including spacing and color. Consistency helps navigation. Check whether a design remains readable at different sizes.

1. How does CSS differ from HTML? (2 points)

Expected answer / rubric: CSS controls presentation; HTML describes structure.

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.

Life Skills — Area, perimeter, and planning

Read before you begin

Perimeter measures a boundary; area measures surface coverage. Plans can estimate materials, but allowances and product dimensions matter. Check before buying or cutting.

1. How do area and perimeter differ? (2 points)

Expected answer / rubric: Area measures surface coverage; perimeter measures boundary length.

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.
