Grade 7 | Life Skills

Parent teaching guide and answers

36 introductory chapters aligned to the school year. Week 1 is an optional introduction; the updated schedule begins in Week 2 on October 19, 2026. Every numbered chapter occupies one PDF page, so Chapter N starts on PDF page N + 1.

Use Monday/Wednesday for Art and Life Sciences; Tuesday/Thursday for Computer Science and Life Skills. Read and model in the first session; apply, revise, and demonstrate in the second. Adapt the pace to the child. This is an original introductory booklet and practical workbook, not a claim of a complete specialist textbook.

Grade 4: explain with concrete examples, labeled drawings, and a short paragraph. Grade 7: explain using precise vocabulary, two reasons or pieces of evidence, a counterexample or limitation, and a developed paragraph.

Use fictional situations and public information. Do not require disclosure of personal beliefs, health, sexual experience, addresses, passwords, or family finances. Adults supervise tools, heat, cleaning products, health discussions, and first-aid practice. Religion is studied descriptively, without devotional participation or grading belief.

Chapter 1 | Routines and checklists

Module 1 | Week 1 | PDF page 2

Read and discuss

Routines repeat actions for recurring tasks. Checklists make completion visible. Use observable actions and inspect results rather than simply checking boxes.

First session: guided practice

Create and test a school-setup checklist, then revise an unclear step.

Second session: apply and revise

Extend the activity with a comparison, two supporting reasons or observations, and a limitation; explain your conclusion in a developed paragraph. Review the first attempt with your parent and improve one specific feature.

Check your understanding

What makes a checklist useful?

Expected answer

Specific actions and a way to check actual completion.

Teaching sequence and scoring

Before teaching: read the explanation and selected publisher reference; prepare safe household/paper materials. Ask the child for an example, model one response, then complete the activity together. Correct the idea rather than labeling the learner. Accept different justified examples. Use the second session to test, compare, and revise.

Four-point performance rubric: 1 accurate concept, 1 relevant example/evidence, 1 completed suitable activity, 1 clear explanation or revision. Evaluate reasoning and skill, not the student's beliefs, private experiences, or artistic taste. Revisit missing elements rather than requiring unnecessary repeated work.

Chapter 2 | Time and task estimates

Module 1 | Week 2 | PDF page 3

Read and discuss

Estimates predict approximate time or amount. Compare estimates with observations to improve planning. Include setup and cleanup as well as the main task.

First session: guided practice

Estimate and time a harmless organizing task; explain the difference.

Second session: apply and revise

Extend the activity with a comparison, two supporting reasons or observations, and a limitation; explain your conclusion in a developed paragraph. Review the first attempt with your parent and improve one specific feature.

Check your understanding

Why compare estimates and observations?

Expected answer

To improve planning and identify omitted steps.

Teaching sequence and scoring

Before teaching: read the explanation and selected publisher reference; prepare safe household/paper materials. Ask the child for an example, model one response, then complete the activity together. Correct the idea rather than labeling the learner. Accept different justified examples. Use the second session to test, compare, and revise.

Four-point performance rubric: 1 accurate concept, 1 relevant example/evidence, 1 completed suitable activity, 1 clear explanation or revision. Evaluate reasoning and skill, not the student's beliefs, private experiences, or artistic taste. Revisit missing elements rather than requiring unnecessary repeated work.

Chapter 3 | Pet care

Module 1 | Week 3 | PDF page 4

Read and discuss

Animals need species-appropriate food, water, shelter, exercise, and health care. Follow adult-approved care plans rather than guessing. Wash hands after appropriate animal-care tasks.

First session: guided practice

Make a fictional pet-care schedule from an adult-provided plan and identify whom to tell about concerns.

Second session: apply and revise

Extend the activity with a comparison, two supporting reasons or observations, and a limitation; explain your conclusion in a developed paragraph. Review the first attempt with your parent and improve one specific feature.

Check your understanding

Do all pets need identical care?

Expected answer

No; needs depend on species, age, and individual health.

Teaching sequence and scoring

Before teaching: read the explanation and selected publisher reference; prepare safe household/paper materials. Ask the child for an example, model one response, then complete the activity together. Correct the idea rather than labeling the learner. Accept different justified examples. Use the second session to test, compare, and revise.

Four-point performance rubric: 1 accurate concept, 1 relevant example/evidence, 1 completed suitable activity, 1 clear explanation or revision. Evaluate reasoning and skill, not the student's beliefs, private experiences, or artistic taste. Revisit missing elements rather than requiring unnecessary repeated work.

Chapter 4 | Organizing shared spaces

Module 1 | Week 4 | PDF page 5

Read and discuss

Organization groups items by use and makes them easy to find. Shared spaces require agreed responsibilities. Test whether someone else can locate and return supplies.

First session: guided practice

Sort and label school materials, then ask a partner to test the system.

Second session: apply and revise

Extend the activity with a comparison, two supporting reasons or observations, and a limitation; explain your conclusion in a developed paragraph. Review the first attempt with your parent and improve one specific feature.

Check your understanding

How can organization be tested?

Expected answer

Another person can find and return items correctly.

Teaching sequence and scoring

Before teaching: read the explanation and selected publisher reference; prepare safe household/paper materials. Ask the child for an example, model one response, then complete the activity together. Correct the idea rather than labeling the learner. Accept different justified examples. Use the second session to test, compare, and revise.

Four-point performance rubric: 1 accurate concept, 1 relevant example/evidence, 1 completed suitable activity, 1 clear explanation or revision. Evaluate reasoning and skill, not the student's beliefs, private experiences, or artistic taste. Revisit missing elements rather than requiring unnecessary repeated work.

Chapter 5 | Cleaning and product safety

Module 2 | Week 1 | PDF page 6

Read and discuss

Cleaning removes dirt; disinfecting targets germs according to product instructions. Products are not interchangeable. Use parent-approved methods and never mix cleaners.

First session: guided practice

Create a room-cleaning checklist and identify adult-only product use.

Second session: apply and revise

Extend the activity with a comparison, two supporting reasons or observations, and a limitation; explain your conclusion in a developed paragraph. Review the first attempt with your parent and improve one specific feature.

Check your understanding

Why must cleaners not be mixed?

Expected answer

Mixtures can create hazardous reactions or fumes.

Teaching sequence and scoring

Before teaching: read the explanation and selected publisher reference; prepare safe household/paper materials. Ask the child for an example, model one response, then complete the activity together. Correct the idea rather than labeling the learner. Accept different justified examples. Use the second session to test, compare, and revise.

Four-point performance rubric: 1 accurate concept, 1 relevant example/evidence, 1 completed suitable activity, 1 clear explanation or revision. Evaluate reasoning and skill, not the student's beliefs, private experiences, or artistic taste. Revisit missing elements rather than requiring unnecessary repeated work.

Chapter 6 | Laundry and fabric care

Read and discuss

Laundry choices depend on fabric, color, and care labels. Follow garment, appliance, and product instructions. An adult teaches unfamiliar equipment use.

First session: guided practice

Sort clean clothes by care needs and plan washing/drying steps with a parent.

Second session: apply and revise

Extend the activity with a comparison, two supporting reasons or observations, and a limitation; explain your conclusion in a developed paragraph. Review the first attempt with your parent and improve one specific feature.

Check your understanding

What guides laundry choices?

Expected answer

Care labels and appliance/product instructions.

Teaching sequence and scoring

Before teaching: read the explanation and selected publisher reference; prepare safe household/paper materials. Ask the child for an example, model one response, then complete the activity together. Correct the idea rather than labeling the learner. Accept different justified examples. Use the second session to test, compare, and revise.

Four-point performance rubric: 1 accurate concept, 1 relevant example/evidence, 1 completed suitable activity, 1 clear explanation or revision. Evaluate reasoning and skill, not the student's beliefs, private experiences, or artistic taste. Revisit missing elements rather than requiring unnecessary repeated work.

Chapter 7 | Dishes and kitchen cleanup

Module 2 | Week 3 | PDF page 8

Read and discuss

Dishes and food-contact surfaces need suitable washing and storage. Separate sharp objects and follow appliance instructions. Clean as work proceeds to reduce clutter.

First session: guided practice

Plan a parent-approved dishwashing routine and check its result.

Second session: apply and revise

Extend the activity with a comparison, two supporting reasons or observations, and a limitation; explain your conclusion in a developed paragraph. Review the first attempt with your parent and improve one specific feature.

Check your understanding

Why keep sharp objects out of hidden dishwater?

Expected answer

To reduce accidental cuts.

Teaching sequence and scoring

Before teaching: read the explanation and selected publisher reference; prepare safe household/paper materials. Ask the child for an example, model one response, then complete the activity together. Correct the idea rather than labeling the learner. Accept different justified examples. Use the second session to test, compare, and revise.

Four-point performance rubric: 1 accurate concept, 1 relevant example/evidence, 1 completed suitable activity, 1 clear explanation or revision. Evaluate reasoning and skill, not the student's beliefs, private experiences, or artistic taste. Revisit missing elements rather than requiring unnecessary repeated work.

Chapter 8 | Recurring chores and responsibility

Module 2 | Week 4 | PDF page 9

Read and discuss

Recurring tasks need schedules and completion standards. Fair responsibility can consider time, ability, and availability rather than only the number of tasks.

First session: guided practice

Build a chore chart with estimates and revise an uneven workload.

Second session: apply and revise

Extend the activity with a comparison, two supporting reasons or observations, and a limitation; explain your conclusion in a developed paragraph. Review the first attempt with your parent and improve one specific feature.

Check your understanding

Does equal task count mean equal effort?

Expected answer

No; tasks differ in difficulty, duration, and support needed.

Teaching sequence and scoring

Before teaching: read the explanation and selected publisher reference; prepare safe household/paper materials. Ask the child for an example, model one response, then complete the activity together. Correct the idea rather than labeling the learner. Accept different justified examples. Use the second session to test, compare, and revise.

Four-point performance rubric: 1 accurate concept, 1 relevant example/evidence, 1 completed suitable activity, 1 clear explanation or revision. Evaluate reasoning and skill, not the student's beliefs, private experiences, or artistic taste. Revisit missing elements rather than requiring unnecessary repeated work.

Chapter 9 | Seeds and plant needs

Module 3 | Week 1 | PDF page 10

Read and discuss

Garden plants need suitable water, light, temperature, nutrients, and space. Germination and later growth differ. Follow local planting guidance and avoid unknown plants and chemicals.

First session: guided practice

Set up an approved seed container with labels and an observation record.

Second session: apply and revise

Extend the activity with a comparison, two supporting reasons or observations, and a limitation; explain your conclusion in a developed paragraph. Review the first attempt with your parent and improve one specific feature.

Check your understanding

Why label planting conditions?

Expected answer

So observations can be interpreted and compared.

Teaching sequence and scoring

Before teaching: read the explanation and selected publisher reference; prepare safe household/paper materials. Ask the child for an example, model one response, then complete the activity together. Correct the idea rather than labeling the learner. Accept different justified examples. Use the second session to test, compare, and revise.

Four-point performance rubric: 1 accurate concept, 1 relevant example/evidence, 1 completed suitable activity, 1 clear explanation or revision. Evaluate reasoning and skill, not the student's beliefs, private experiences, or artistic taste. Revisit missing elements rather than requiring unnecessary repeated work.

Chapter 10 | Soil, drainage, and compost

Module 3 | Week 2 | PDF page 11

Read and discuss

Soil structure affects water and air around roots. Compost is decomposed organic material. Suitable ingredients and handling matter; roots can be harmed by waterlogged conditions.

First session: guided practice

Compare drainage in two approved growing media and explain a watering adjustment.

Second session: apply and revise

Extend the activity with a comparison, two supporting reasons or observations, and a limitation; explain your conclusion in a developed paragraph. Review the first attempt with your parent and improve one specific feature.

Check your understanding

Why does drainage matter?

Expected answer

Roots require suitable moisture and air.

Teaching sequence and scoring

Before teaching: read the explanation and selected publisher reference; prepare safe household/paper materials. Ask the child for an example, model one response, then complete the activity together. Correct the idea rather than labeling the learner. Accept different justified examples. Use the second session to test, compare, and revise.

Four-point performance rubric: 1 accurate concept, 1 relevant example/evidence, 1 completed suitable activity, 1 clear explanation or revision. Evaluate reasoning and skill, not the student's beliefs, private experiences, or artistic taste. Revisit missing elements rather than requiring unnecessary repeated work.

Chapter 11 | Garden measurement and records

Module 3 | Week 3 | PDF page 12

Read and discuss

Records connect measurements with dates and conditions. Use a consistent reference point and units. A measurement-method change can look like a growth change.

First session: guided practice

Measure a seedling or fictional data and graph changes with stated units.

Second session: apply and revise

Extend the activity with a comparison, two supporting reasons or observations, and a limitation; explain your conclusion in a developed paragraph. Review the first attempt with your parent and improve one specific feature.

Check your understanding

Why use a consistent method?

Expected answer

To make comparisons meaningful.

Teaching sequence and scoring

Before teaching: read the explanation and selected publisher reference; prepare safe household/paper materials. Ask the child for an example, model one response, then complete the activity together. Correct the idea rather than labeling the learner. Accept different justified examples. Use the second session to test, compare, and revise.

Four-point performance rubric: 1 accurate concept, 1 relevant example/evidence, 1 completed suitable activity, 1 clear explanation or revision. Evaluate reasoning and skill, not the student's beliefs, private experiences, or artistic taste. Revisit missing elements rather than requiring unnecessary repeated work.

Chapter 12 | Garden care and harvesting

Module 3 | Week 4 | PDF page 13

Read and discuss

Plant care depends on observation and appropriate timing. Identify plants reliably before touching or eating them. Use local guidance for weather, pests, and harvest readiness.

First session: guided practice

Plan care for an approved plant and revise for a fictional weather change.

Second session: apply and revise

Extend the activity with a comparison, two supporting reasons or observations, and a limitation; explain your conclusion in a developed paragraph. Review the first attempt with your parent and improve one specific feature.

Check your understanding

Is an unknown garden plant safe to taste?

Expected answer

No; a knowledgeable adult must identify edible plants and safe handling.

Teaching sequence and scoring

Before teaching: read the explanation and selected publisher reference; prepare safe household/paper materials. Ask the child for an example, model one response, then complete the activity together. Correct the idea rather than labeling the learner. Accept different justified examples. Use the second session to test, compare, and revise.

Four-point performance rubric: 1 accurate concept, 1 relevant example/evidence, 1 completed suitable activity, 1 clear explanation or revision. Evaluate reasoning and skill, not the student's beliefs, private experiences, or artistic taste. Revisit missing elements rather than requiring unnecessary repeated work.

Chapter 13 | Kitchen tools and food hygiene

Module 4 | Week 1 | PDF page 14

Read and discuss

Safe cooking starts with clean hands, suitable tools, and an organized space. Separate raw and ready-to-eat foods appropriately. Adults supervise blades, heat, and unfamiliar equipment.

First session: guided practice

Identify adult-only steps in a recipe and prepare a safe workspace.

Second session: apply and revise

Extend the activity with a comparison, two supporting reasons or observations, and a limitation; explain your conclusion in a developed paragraph. Review the first attempt with your parent and improve one specific feature.

Check your understanding

Why separate raw and ready-to-eat food?

Expected answer

To reduce cross-contamination.

Teaching sequence and scoring

Before teaching: read the explanation and selected publisher reference; prepare safe household/paper materials. Ask the child for an example, model one response, then complete the activity together. Correct the idea rather than labeling the learner. Accept different justified examples. Use the second session to test, compare, and revise.

Four-point performance rubric: 1 accurate concept, 1 relevant example/evidence, 1 completed suitable activity, 1 clear explanation or revision. Evaluate reasoning and skill, not the student's beliefs, private experiences, or artistic taste. Revisit missing elements rather than requiring unnecessary repeated work.

Chapter 14 | Recipe fractions and measuring

Module 4 | Week 2 | PDF page 15

Read and discuss

Recipes specify quantities, units, and order. Use appropriate marked tools. Scaling changes ingredient amounts consistently, but cooking time needs separate judgment.

First session: guided practice

Measure water and scale a simple adult-approved no-heat recipe.

Second session: apply and revise

Extend the activity with a comparison, two supporting reasons or observations, and a limitation; explain your conclusion in a developed paragraph. Review the first attempt with your parent and improve one specific feature.

Check your understanding

When doubling a recipe, what changes?

Expected answer

Ingredient amounts double; cooking time is not automatically doubled.

Teaching sequence and scoring

Before teaching: read the explanation and selected publisher reference; prepare safe household/paper materials. Ask the child for an example, model one response, then complete the activity together. Correct the idea rather than labeling the learner. Accept different justified examples. Use the second session to test, compare, and revise.

Four-point performance rubric: 1 accurate concept, 1 relevant example/evidence, 1 completed suitable activity, 1 clear explanation or revision. Evaluate reasoning and skill, not the student's beliefs, private experiences, or artistic taste. Revisit missing elements rather than requiring unnecessary repeated work.

Chapter 15 | Nutrition and meal planning

Module 4 | Week 3 | PDF page 16

Read and discuss

Foods supply different nutrients. Meal planning should consider varied foods, individual needs, allergies, access, and cultural practices. Avoid judging health from body size.

First session: guided practice

Plan a varied meal from available foods and explain an allergy-safe substitution with an adult.

Second session: apply and revise

Extend the activity with a comparison, two supporting reasons or observations, and a limitation; explain your conclusion in a developed paragraph. Review the first attempt with your parent and improve one specific feature.

Check your understanding

Why check allergies?

Expected answer

An ingredient can cause a serious reaction for someone with that allergy.

Teaching sequence and scoring

Before teaching: read the explanation and selected publisher reference; prepare safe household/paper materials. Ask the child for an example, model one response, then complete the activity together. Correct the idea rather than labeling the learner. Accept different justified examples. Use the second session to test, compare, and revise.

Four-point performance rubric: 1 accurate concept, 1 relevant example/evidence, 1 completed suitable activity, 1 clear explanation or revision. Evaluate reasoning and skill, not the student's beliefs, private experiences, or artistic taste. Revisit missing elements rather than requiring unnecessary repeated work.

Chapter 16 | Cooking and evaluation

Module 4 | Week 4 | PDF page 17

Read and discuss

Preparation, observation, and review make procedures more reliable. Compare a recipe's result with its goal and record changes. Adults supervise heat and cutting.

First session: guided practice

Prepare an approved recipe or no-heat alternative; record amounts, cleanup, and one improvement.

Second session: apply and revise

Extend the activity with a comparison, two supporting reasons or observations, and a limitation; explain your conclusion in a developed paragraph. Review the first attempt with your parent and improve one specific feature.

Check your understanding

Why record recipe changes?

Expected answer

To understand results and make the process repeatable.

Teaching sequence and scoring

Before teaching: read the explanation and selected publisher reference; prepare safe household/paper materials. Ask the child for an example, model one response, then complete the activity together. Correct the idea rather than labeling the learner. Accept different justified examples. Use the second session to test, compare, and revise.

Four-point performance rubric: 1 accurate concept, 1 relevant example/evidence, 1 completed suitable activity, 1 clear explanation or revision. Evaluate reasoning and skill, not the student's beliefs, private experiences, or artistic taste. Revisit missing elements rather than requiring unnecessary repeated work.

Chapter 17 | Handwashing and hygiene

Module 5 | Week 1 | PDF page 18

Read and discuss

Hygiene routines support comfort and reduce spread of some germs. Use reliable guidance and adapt routines to individual needs. Hand care matters after gardening, animal care, and before food preparation.

First session: guided practice

Create a practical personal-care reminder chart and explain two task-related hygiene steps.

Second session: apply and revise

Extend the activity with a comparison, two supporting reasons or observations, and a limitation; explain your conclusion in a developed paragraph. Review the first attempt with your parent and improve one specific feature.

Check your understanding

Why wash hands after gardening?

Expected answer

Soil can carry contaminants that should not be transferred to food or the face.

Teaching sequence and scoring

Before teaching: read the explanation and selected publisher reference; prepare safe household/paper materials. Ask the child for an example, model one response, then complete the activity together. Correct the idea rather than labeling the learner. Accept different justified examples. Use the second session to test, compare, and revise.

Four-point performance rubric: 1 accurate concept, 1 relevant example/evidence, 1 completed suitable activity, 1 clear explanation or revision. Evaluate reasoning and skill, not the student's beliefs, private experiences, or artistic taste. Revisit missing elements rather than requiring unnecessary repeated work.

Chapter 18 | Movement and physical activity

Module 5 | Week 2 | PDF page 19

Read and discuss

Physical activity includes play, dance, walking, and sports. Choose safe accessible movement with rest as needed. The goal is participation rather than comparing bodies.

First session: guided practice

Plan and perform an adapted movement break with a parent, then record an adjustment.

Second session: apply and revise

Extend the activity with a comparison, two supporting reasons or observations, and a limitation; explain your conclusion in a developed paragraph. Review the first attempt with your parent and improve one specific feature.

Check your understanding

Must activity be identical for everyone?

Expected answer

No; activities can be adapted to abilities, needs, and space.

Teaching sequence and scoring

Before teaching: read the explanation and selected publisher reference; prepare safe household/paper materials. Ask the child for an example, model one response, then complete the activity together. Correct the idea rather than labeling the learner. Accept different justified examples. Use the second session to test, compare, and revise.

Four-point performance rubric: 1 accurate concept, 1 relevant example/evidence, 1 completed suitable activity, 1 clear explanation or revision. Evaluate reasoning and skill, not the student's beliefs, private experiences, or artistic taste. Revisit missing elements rather than requiring unnecessary repeated work.

Chapter 19 | Sleep, rest, and wellness

Module 5 | Week 3 | PDF page 20

Read and discuss

Consistent rest routines support daily functioning. Needs vary with age and individual circumstances. Ongoing health concerns belong with trusted adults and qualified clinicians, not worksheet diagnoses.

First session: guided practice

Plan a realistic evening routine and identify a manageable improvement.

Second session: apply and revise

Extend the activity with a comparison, two supporting reasons or observations, and a limitation; explain your conclusion in a developed paragraph. Review the first attempt with your parent and improve one specific feature.

Check your understanding

Why avoid diagnosing from one observation?

Expected answer

Health assessment needs professional evaluation and context.

Teaching sequence and scoring

Before teaching: read the explanation and selected publisher reference; prepare safe household/paper materials. Ask the child for an example, model one response, then complete the activity together. Correct the idea rather than labeling the learner. Accept different justified examples. Use the second session to test, compare, and revise.

Four-point performance rubric: 1 accurate concept, 1 relevant example/evidence, 1 completed suitable activity, 1 clear explanation or revision. Evaluate reasoning and skill, not the student's beliefs, private experiences, or artistic taste. Revisit missing elements rather than requiring unnecessary repeated work.

Chapter 20 | Evaluating health information

Module 5 | Week 4 | PDF page 21

Read and discuss

Health claims need reliable evidence and context. Advertisements and personal stories do not prove that a product works for everyone. Consult a trusted adult or qualified clinician about concerns.

First session: guided practice

Evaluate a fictional health advertisement using source, evidence, and risk questions.

Second session: apply and revise

Extend the activity with a comparison, two supporting reasons or observations, and a limitation; explain your conclusion in a developed paragraph. Review the first attempt with your parent and improve one specific feature.

Check your understanding

Does a testimonial establish treatment effectiveness?

Expected answer

No; a personal account does not establish effectiveness or safety.

Teaching sequence and scoring

Before teaching: read the explanation and selected publisher reference; prepare safe household/paper materials. Ask the child for an example, model one response, then complete the activity together. Correct the idea rather than labeling the learner. Accept different justified examples. Use the second session to test, compare, and revise.

Four-point performance rubric: 1 accurate concept, 1 relevant example/evidence, 1 completed suitable activity, 1 clear explanation or revision. Evaluate reasoning and skill, not the student's beliefs, private experiences, or artistic taste. Revisit missing elements rather than requiring unnecessary repeated work.

Chapter 21 | Puberty and variation

Module 6 | Week 1 | PDF page 22

Read and discuss

Puberty includes physical, emotional, and social changes as bodies mature. Timing and pace vary. Use correct terms and trusted-adult support; no student needs to describe personal development.

First session: guided practice

Read the selected grade-level puberty lesson with a parent and sort fictional changes into categories.

Second session: apply and revise

Extend the activity with a comparison, two supporting reasons or observations, and a limitation; explain your conclusion in a developed paragraph. Review the first attempt with your parent and improve one specific feature.

Check your understanding

Does everyone begin puberty at the same age?

Expected answer

No; timing and pace vary.

Teaching sequence and scoring

Before teaching: read the explanation and selected publisher reference; prepare safe household/paper materials. Ask the child for an example, model one response, then complete the activity together. Correct the idea rather than labeling the learner. Accept different justified examples. Use the second session to test, compare, and revise.

Four-point performance rubric: 1 accurate concept, 1 relevant example/evidence, 1 completed suitable activity, 1 clear explanation or revision. Evaluate reasoning and skill, not the student's beliefs, private experiences, or artistic taste. Revisit missing elements rather than requiring unnecessary repeated work.

Chapter 22 | Body boundaries and consent

Module 6 | Week 2 | PDF page 23

Read and discuss

People deserve respect for their bodies and boundaries. Consent should be freely given, specific, and reversible. Unsafe touch or coercion is not a child's fault; keep asking trusted adults until someone helps.

First session: guided practice

Practice fictional boundary statements and a trusted-adult help plan.

Second session: apply and revise

Extend the activity with a comparison, two supporting reasons or observations, and a limitation; explain your conclusion in a developed paragraph. Review the first attempt with your parent and improve one specific feature.

Check your understanding

Can consent be withdrawn?

Expected answer

Yes; someone can change their mind.

Teaching sequence and scoring

Before teaching: read the explanation and selected publisher reference; prepare safe household/paper materials. Ask the child for an example, model one response, then complete the activity together. Correct the idea rather than labeling the learner. Accept different justified examples. Use the second session to test, compare, and revise.

Four-point performance rubric: 1 accurate concept, 1 relevant example/evidence, 1 completed suitable activity, 1 clear explanation or revision. Evaluate reasoning and skill, not the student's beliefs, private experiences, or artistic taste. Revisit missing elements rather than requiring unnecessary repeated work.

Chapter 23 | Anatomy and reproduction

Module 6 | Week 3 | PDF page 24

Read and discuss

Ovaries contain egg cells; testes produce sperm cells after puberty begins. A pregnancy can begin when a sperm fertilizes an egg, usually in a fallopian tube, and the resulting developing structure implants in the uterus. Puberty does not mean someone is ready to become a parent. Private body parts have correct anatomical names, and questions deserve accurate respectful answers. Grade 7 extension: sexually transmitted infections can spread through sexual contact, sometimes without symptoms. Avoiding sexual contact prevents sexual transmission; correctly used condoms reduce but do not eliminate infection risk. Other birth-control methods do not protect against STIs. A trusted adult or health professional can answer questions.

First session: guided practice

Make a word-to-function matching chart for ovary, testis, sperm, egg, and uterus using only the reading. Grade 7: also distinguish pregnancy prevention from STI prevention using a reliable health source. Use fictional examples; no personal disclosures.

Second session: apply and revise

Extend the activity with a comparison, two supporting reasons or observations, and a limitation; explain your conclusion in a developed paragraph. Review the first attempt with your parent and improve one specific feature.

Check your understanding

Which organ supports an implanted developing pregnancy, and which cells can combine in fertilization?

Expected answer

The uterus supports an implanted pregnancy; a sperm cell and egg cell can combine in fertilization.

Teaching sequence and scoring

Before teaching: read the explanation and selected publisher reference; prepare safe household/paper materials. Ask the child for an example, model one response, then complete the activity together. Correct the idea rather than labeling the learner. Accept different justified examples. Use the second session to test, compare, and revise.

Four-point performance rubric: 1 accurate concept, 1 relevant example/evidence, 1 completed suitable activity, 1 clear explanation or revision. Evaluate reasoning and skill, not the student's beliefs, private experiences, or artistic taste. Revisit missing elements rather than requiring unnecessary repeated work.

Chapter 24 | Healthy relationships

Module 6 | Week 4 | PDF page 25

Read and discuss

Respectful relationships allow communication and freedom from coercion. Threats, pressure, and secrecy about unsafe behavior are warning signs. Trusted adults and qualified services can offer support.

First session: guided practice

Compare fictional interactions and practice a refusal and help request.

Second session: apply and revise

Extend the activity with a comparison, two supporting reasons or observations, and a limitation; explain your conclusion in a developed paragraph. Review the first attempt with your parent and improve one specific feature.

Check your understanding

Name a warning sign.

Expected answer

Coercion, threats, isolation, or pressure to ignore boundaries.

Teaching sequence and scoring

Before teaching: read the explanation and selected publisher reference; prepare safe household/paper materials. Ask the child for an example, model one response, then complete the activity together. Correct the idea rather than labeling the learner. Accept different justified examples. Use the second session to test, compare, and revise.

Four-point performance rubric: 1 accurate concept, 1 relevant example/evidence, 1 completed suitable activity, 1 clear explanation or revision. Evaluate reasoning and skill, not the student's beliefs, private experiences, or artistic taste. Revisit missing elements rather than requiring unnecessary repeated work.

Chapter 25 | First aid and getting help

Module 7 | Week 1 | PDF page 26

Read and discuss

First aid begins with recognizing danger and obtaining appropriate help. Do not enter unsafe scenes. Learn response procedures from current qualified instruction with an adult; classroom practice is not certification.

First session: guided practice

Locate supplies and emergency contacts; role-play a fictional help request without placing a real emergency call.

Second session: apply and revise

Extend the activity with a comparison, two supporting reasons or observations, and a limitation; explain your conclusion in a developed paragraph. Review the first attempt with your parent and improve one specific feature.

Check your understanding

What precedes helping at an unsafe scene?

Expected answer

Protect yourself from danger and seek appropriate adult/emergency help.

Teaching sequence and scoring

Before teaching: read the explanation and selected publisher reference; prepare safe household/paper materials. Ask the child for an example, model one response, then complete the activity together. Correct the idea rather than labeling the learner. Accept different justified examples. Use the second session to test, compare, and revise.

Four-point performance rubric: 1 accurate concept, 1 relevant example/evidence, 1 completed suitable activity, 1 clear explanation or revision. Evaluate reasoning and skill, not the student's beliefs, private experiences, or artistic taste. Revisit missing elements rather than requiring unnecessary repeated work.

Chapter 26 | Home hazards and preparedness

Module 7 | Week 2 | PDF page 27

Read and discuss

Preparedness identifies safe routes, contacts, hazards, and supplies before an emergency. Plans should fit the home and local risks. Practice with an adult without creating a real hazard.

First session: guided practice

Review an approved exit/meeting-place plan and adapt it to a fictional weather warning.

Second session: apply and revise

Extend the activity with a comparison, two supporting reasons or observations, and a limitation; explain your conclusion in a developed paragraph. Review the first attempt with your parent and improve one specific feature.

Check your understanding

Why choose a meeting place beforehand?

Expected answer

To help reunite people and notice who may need assistance.

Teaching sequence and scoring

Before teaching: read the explanation and selected publisher reference; prepare safe household/paper materials. Ask the child for an example, model one response, then complete the activity together. Correct the idea rather than labeling the learner. Accept different justified examples. Use the second session to test, compare, and revise.

Four-point performance rubric: 1 accurate concept, 1 relevant example/evidence, 1 completed suitable activity, 1 clear explanation or revision. Evaluate reasoning and skill, not the student's beliefs, private experiences, or artistic taste. Revisit missing elements rather than requiring unnecessary repeated work.

Chapter 27 | Mechanics and simple machines

Module 7 | Week 3 | PDF page 28

Read and discuss

Mechanisms transmit or change motion and force. Levers, wheels, and pulleys have parts and constraints. Practice with safe models rather than hazardous equipment.

First session: guided practice

Build a cardboard lever and identify pivot, load, and applied force; Grade 7 compares lever arms.

Second session: apply and revise

Extend the activity with a comparison, two supporting reasons or observations, and a limitation; explain your conclusion in a developed paragraph. Review the first attempt with your parent and improve one specific feature.

Check your understanding

What is a fulcrum?

Expected answer

The pivot point of a lever.

Teaching sequence and scoring

Before teaching: read the explanation and selected publisher reference; prepare safe household/paper materials. Ask the child for an example, model one response, then complete the activity together. Correct the idea rather than labeling the learner. Accept different justified examples. Use the second session to test, compare, and revise.

Four-point performance rubric: 1 accurate concept, 1 relevant example/evidence, 1 completed suitable activity, 1 clear explanation or revision. Evaluate reasoning and skill, not the student's beliefs, private experiences, or artistic taste. Revisit missing elements rather than requiring unnecessary repeated work.

Chapter 28 | Tools and maintenance

Module 7 | Week 4 | PDF page 29

Read and discuss

Use tools only when their purpose, condition, and safe operation are understood. Unfamiliar electrical, pressurized, moving, sharp, or structural repairs need competent adults.

First session: guided practice

Sort fictional maintenance tasks by supervision needs and inspect a harmless object.

Second session: apply and revise

Extend the activity with a comparison, two supporting reasons or observations, and a limitation; explain your conclusion in a developed paragraph. Review the first attempt with your parent and improve one specific feature.

Check your understanding

Should a child do an unfamiliar hazardous repair alone?

Expected answer

No; obtain competent adult supervision.

Teaching sequence and scoring

Before teaching: read the explanation and selected publisher reference; prepare safe household/paper materials. Ask the child for an example, model one response, then complete the activity together. Correct the idea rather than labeling the learner. Accept different justified examples. Use the second session to test, compare, and revise.

Four-point performance rubric: 1 accurate concept, 1 relevant example/evidence, 1 completed suitable activity, 1 clear explanation or revision. Evaluate reasoning and skill, not the student's beliefs, private experiences, or artistic taste. Revisit missing elements rather than requiring unnecessary repeated work.

Chapter 29 | Measuring tape and scale

Module 8 | Week 1 | PDF page 30

Read and discuss

Measurements include numbers and units. Align the tape and start at the intended zero. Scaled drawings represent real dimensions through a consistent ratio.

First session: guided practice

Measure a harmless object twice; draw it with labeled dimensions or a Grade 7 scale factor.

Second session: apply and revise

Extend the activity with a comparison, two supporting reasons or observations, and a limitation; explain your conclusion in a developed paragraph. Review the first attempt with your parent and improve one specific feature.

Check your understanding

Why state a drawing's scale?

Expected answer

So drawing lengths relate to actual lengths.

Teaching sequence and scoring

Before teaching: read the explanation and selected publisher reference; prepare safe household/paper materials. Ask the child for an example, model one response, then complete the activity together. Correct the idea rather than labeling the learner. Accept different justified examples. Use the second session to test, compare, and revise.

Four-point performance rubric: 1 accurate concept, 1 relevant example/evidence, 1 completed suitable activity, 1 clear explanation or revision. Evaluate reasoning and skill, not the student's beliefs, private experiences, or artistic taste. Revisit missing elements rather than requiring unnecessary repeated work.

Chapter 30 | Area, perimeter, and planning

Module 8 | Week 2 | PDF page 31

Read and discuss

Perimeter measures a boundary; area measures surface coverage. Plans can estimate materials, but allowances and product dimensions matter. Check before buying or cutting.

First session: guided practice

Measure a rectangle or paper model and calculate its boundary and coverage.

Second session: apply and revise

Extend the activity with a comparison, two supporting reasons or observations, and a limitation; explain your conclusion in a developed paragraph. Review the first attempt with your parent and improve one specific feature.

Check your understanding

How do area and perimeter differ?

Expected answer

Area measures surface coverage; perimeter measures boundary length.

Teaching sequence and scoring

Before teaching: read the explanation and selected publisher reference; prepare safe household/paper materials. Ask the child for an example, model one response, then complete the activity together. Correct the idea rather than labeling the learner. Accept different justified examples. Use the second session to test, compare, and revise.

Four-point performance rubric: 1 accurate concept, 1 relevant example/evidence, 1 completed suitable activity, 1 clear explanation or revision. Evaluate reasoning and skill, not the student's beliefs, private experiences, or artistic taste. Revisit missing elements rather than requiring unnecessary repeated work.

Chapter 31 | Sewing and patterns

Module 8 | Week 3 | PDF page 32

Read and discuss

Patterns guide fabric shapes and sizes. Seam allowances leave room for joining. Use paper lacing, blunt practice tools, or parent-supervised needles and scissors.

First session: guided practice

Mark a simple paper pattern and seam allowance, then join a practice shape safely.

Second session: apply and revise

Extend the activity with a comparison, two supporting reasons or observations, and a limitation; explain your conclusion in a developed paragraph. Review the first attempt with your parent and improve one specific feature.

Check your understanding

Why include a seam allowance?

Expected answer

Joining uses space beyond the finished shape's boundary.

Teaching sequence and scoring

Before teaching: read the explanation and selected publisher reference; prepare safe household/paper materials. Ask the child for an example, model one response, then complete the activity together. Correct the idea rather than labeling the learner. Accept different justified examples. Use the second session to test, compare, and revise.

Four-point performance rubric: 1 accurate concept, 1 relevant example/evidence, 1 completed suitable activity, 1 clear explanation or revision. Evaluate reasoning and skill, not the student's beliefs, private experiences, or artistic taste. Revisit missing elements rather than requiring unnecessary repeated work.

Chapter 32 | Repair, reuse, and evaluation

Module 8 | Week 4 | PDF page 33

Read and discuss

Repair and reuse can conserve materials when an item remains safe and fit for use. A cosmetic patch is not necessarily a structural repair. Evaluate the function as well as appearance.

First session: guided practice

Make an approved nonstructural repair or paper prototype and evaluate its limits.

Second session: apply and revise

Extend the activity with a comparison, two supporting reasons or observations, and a limitation; explain your conclusion in a developed paragraph. Review the first attempt with your parent and improve one specific feature.

Check your understanding

Does looking repaired guarantee safety?

Expected answer

No; function and structural safety need checking.

Teaching sequence and scoring

Before teaching: read the explanation and selected publisher reference; prepare safe household/paper materials. Ask the child for an example, model one response, then complete the activity together. Correct the idea rather than labeling the learner. Accept different justified examples. Use the second session to test, compare, and revise.

Four-point performance rubric: 1 accurate concept, 1 relevant example/evidence, 1 completed suitable activity, 1 clear explanation or revision. Evaluate reasoning and skill, not the student's beliefs, private experiences, or artistic taste. Revisit missing elements rather than requiring unnecessary repeated work.

Chapter 33 | Budgeting and priorities

Module 9 | Week 1 | PDF page 34

Read and discuss

Budgets plan income and spending. Needs, wants, savings, and tradeoffs guide decisions. Use fictional amounts rather than private family finances.

First session: guided practice

Create a fictional project budget and revise it after a price change.

Second session: apply and revise

Extend the activity with a comparison, two supporting reasons or observations, and a limitation; explain your conclusion in a developed paragraph. Review the first attempt with your parent and improve one specific feature.

Check your understanding

What is a budget?

Expected answer

A plan for allocating available money over a period or project.

Teaching sequence and scoring

Before teaching: read the explanation and selected publisher reference; prepare safe household/paper materials. Ask the child for an example, model one response, then complete the activity together. Correct the idea rather than labeling the learner. Accept different justified examples. Use the second session to test, compare, and revise.

Four-point performance rubric: 1 accurate concept, 1 relevant example/evidence, 1 completed suitable activity, 1 clear explanation or revision. Evaluate reasoning and skill, not the student's beliefs, private experiences, or artistic taste. Revisit missing elements rather than requiring unnecessary repeated work.

Chapter 34 | Planning steps and supplies

Module 9 | Week 2 | PDF page 35

Read and discuss

Project plans include requirements, materials, time, sequence, and completion checks. Dependencies mean some steps need others first. Include alternatives when supplies change.

First session: guided practice

Plan a small household/garden project and revise for a missing material.

Second session: apply and revise

Extend the activity with a comparison, two supporting reasons or observations, and a limitation; explain your conclusion in a developed paragraph. Review the first attempt with your parent and improve one specific feature.

Check your understanding

What is a dependency?

Expected answer

A task requiring another task or condition first.

Teaching sequence and scoring

Before teaching: read the explanation and selected publisher reference; prepare safe household/paper materials. Ask the child for an example, model one response, then complete the activity together. Correct the idea rather than labeling the learner. Accept different justified examples. Use the second session to test, compare, and revise.

Four-point performance rubric: 1 accurate concept, 1 relevant example/evidence, 1 completed suitable activity, 1 clear explanation or revision. Evaluate reasoning and skill, not the student's beliefs, private experiences, or artistic taste. Revisit missing elements rather than requiring unnecessary repeated work.

Chapter 35 | Independent task demonstration

Module 9 | Week 3 | PDF page 36

Read and discuss

Responsible independence includes completing suitable tasks and recognizing when help is needed. Check results against agreed standards and explain limitations honestly.

First session: guided practice

Complete an approved practical task using a checklist and evaluate the result.

Second session: apply and revise

Extend the activity with a comparison, two supporting reasons or observations, and a limitation; explain your conclusion in a developed paragraph. Review the first attempt with your parent and improve one specific feature.

Check your understanding

Does independence mean never asking for help?

Expected answer

No; recognizing when help is needed is part of independence.

Teaching sequence and scoring

Before teaching: read the explanation and selected publisher reference; prepare safe household/paper materials. Ask the child for an example, model one response, then complete the activity together. Correct the idea rather than labeling the learner. Accept different justified examples. Use the second session to test, compare, and revise.

Four-point performance rubric: 1 accurate concept, 1 relevant example/evidence, 1 completed suitable activity, 1 clear explanation or revision. Evaluate reasoning and skill, not the student's beliefs, private experiences, or artistic taste. Revisit missing elements rather than requiring unnecessary repeated work.

Chapter 36 | Life-skills portfolio

Module 9 | Week 4 | PDF page 37

Read and discuss

Plans, measurements, products, and reflection document skill. Photos are optional. Do not include private addresses, medical details, or credentials.

First session: guided practice

Select three completed tasks and present evidence, an improvement, and a next goal.

Second session: apply and revise

Extend the activity with a comparison, two supporting reasons or observations, and a limitation; explain your conclusion in a developed paragraph. Review the first attempt with your parent and improve one specific feature.

Check your understanding

What evidence shows a practical skill?

Expected answer

A demonstration, checklist, measurements, product, or clear process explanation.

Teaching sequence and scoring

Before teaching: read the explanation and selected publisher reference; prepare safe household/paper materials. Ask the child for an example, model one response, then complete the activity together. Correct the idea rather than labeling the learner. Accept different justified examples. Use the second session to test, compare, and revise.

Four-point performance rubric: 1 accurate concept, 1 relevant example/evidence, 1 completed suitable activity, 1 clear explanation or revision. Evaluate reasoning and skill, not the student's beliefs, private experiences, or artistic taste. Revisit missing elements rather than requiring unnecessary repeated work.
