How to use this book

Every lesson starts on a new page with the same parts, so you always know where to look. Read the Model boxes to see how a strong reader thinks, then answer the Your Turn questions. Your practice pages are in your Student Workbook, labeled with the same lesson number.

- Today's Goal (the box with the target) says what you will be able to do by the end of the lesson.
- Today's Assignment is your checklist for the day. Tick each box as you finish it, including the pages to read in your Grade 7 Reader.
- Each lesson page has three panels. The wide center panel is the lesson, in numbered steps: 1 Get Ready, 2 Learn, and 3 Your Turn.
- The left panel holds things to remember: Key Ideas (the most important rule or fact; learn these), Watch Out warnings about common mistakes, tips, and a Remember note that sums up the lesson. Each one sits beside the part of the lesson it goes with.
- The right panel holds Words to Know (definitions), what to read in your Reader, and other extras.
- Pages that look like a page from a book, on cream paper with a brown READING tab, are things to read: stories, excerpts, and articles.
- At the end of each week of lessons there is a short Weekly Check in your workbook. Each unit ends with the Unit Test.

UNIT 1

Language and Meaning

Dickens's language, roots and context, connotation and figurative language, evidence and inference, theme and objective summary, with A Christmas Carol, Introduction–Stave Three.

A cold-hearted miser, a ghost in chains, and three Spirits who visit on Christmas Eve: A Christmas Carol is one of the most famous stories ever written. In this unit you'll learn to read Dickens's language with confidence, unlock words with roots and context, analyze connotation and figurative language, support inferences with several pieces of evidence, and trace themes as they develop.

In this unit you will…

- Read a classic novella's language using translation strategies.
- Use roots, affixes, context, and reference tools to determine meaning.
- Analyze connotation, figurative language, word relationships, and sound.
- Cite several pieces of evidence to support inferences and claims.
- Determine and trace themes and central ideas; write objective summaries.

WHY IT MATTERS

Dickens wrote this story to change how readers treated the poor, and it worked; analyzing connotation and figurative language helps you see how ads, speeches, and news shape opinion today.

UNIT VOCABULARY

archaic	No longer in common use.
connotation	The feeling a word carries.
simile	A comparison using like or as.
theme	A message about life.
objective summary	A neutral, concise retelling.
parallelism	Repeating a grammatical pattern.

1 Get Ready

GET READY

Read this line aloud: "Old Marley was as dead as a door-nail." Why would a story begin by insisting that someone is dead?

2 Learn

Dickens wrote A Christmas Carol in 1843, so most of his words are familiar, but some are old-fashioned or British, and his sentences can be long. Three strategies help: read aloud for meaning, translate old words, and break long

WORDS & MORE

WORDS TO KNOW

novella
A story longer than a short story but shorter than a novel.

archaic
Old-fashioned; no longer in common use.

narrator
The voice that tells a story. Dickens's narrator often speaks directly to the reader.

READ IN YOUR READER

A Christmas Carol Introduction and Stave One (first section), pages 2–11

As you read, think about: Who is Scrooge? How do other people react to him on Christmas Eve?

REMEMBER

sentences at their semicolons and commas.

WORDS & MORE

Dickens's word	Modern meaning
'Change	the Exchange, where merchants met to do business
counting-house	a business office
humbug	nonsense; a fraud
dog-days	the hottest days of summer
rime	frost
comforter	a long woolen scarf
workhouse	a grim public home for the very poor

READING · NOVELLA EXCERPT

From A Christmas Carol, Stave One (original text)

Charles Dickens, A Christmas Carol (1843). Public domain.

MARLEY was dead: to begin with. There is no doubt whatever about that. The register of his burial was signed by the clergyman, the clerk, the undertaker, and the chief mourner. Scrooge signed it: and Scrooge's name was good upon 'Change, for anything he chose to put his hand to. Old Marley was as dead as a door-nail.

"Bah!" said Scrooge, "Humbug!"

KEY IDEA

Read aloud, translate old words, and break long sentences into parts. Meaning first, then details.

MODEL · TRANSLATE A SENTENCE

"Scrooge's name was good upon 'Change, for anything he chose to put his hand to."

1. 'Change = the Exchange, where merchants did business.
2. his name was good = people trusted his signature.
3. anything he chose to put his hand to = any deal he signed.

Model answer: "The merchants trusted Scrooge's signature on any deal he made." He is respected in business, which tells us money is what he is known for.

Complex texts often define words indirectly. Use the sentence, the paragraph, and the overall meaning. Clues include definitions, restatements, examples, contrasts, and cause-effect relationships.

REMEMBER

READING · INFORMATIONAL TEXT

Christmas in Dickens's London

An original informational text

1 In 1843, London was the largest city in the world, home to about two million people. Its factories, banks, and docks made some families very rich. Yet many Londoners lived crowded into a single damp room, and a coal fire, a hot meal, or a pair of boots was a luxury.

2 For a working family, the Christmas feast took planning. Many saved for months by joining a **goose club**, paying a few pennies each week to a shopkeeper so that they could collect a goose at Christmas. Families with no oven of their own carried their dinner to the local baker's shop, where it was roasted in the big bread ovens for a small fee.

3 People who could not support themselves at all might be sent to a **workhouse**. Under the Poor Law of 1834, workhouses were made deliberately unpleasant: families were separated, the work was hard, and the food was plain and meager, so that only the truly desperate would ask to enter.

4 Christmas itself was changing. The first Christmas card for sale was printed in London in 1843, the same year *A Christmas Carol* appeared. Over the following decades, the holiday grew from a modest celebration into the family festival of gifts, feasting, and charity that Dickens's story helped to shape.

WORDS & MORE

KEY IDEA

REMEMBER

✓ REMEMBER

2 The purpose follows: “so that they could collect a goose at Christmas.”

Model answer: a savings plan for buying a Christmas goose a little at a time

miser (MY-zer), noun. A person who hoards money and spends as little as possible. [Latin miser, wretched, unhappy]

1 Pronunciation: MY-zer.

2 Part of speech: noun.

3 Etymology: from the Latin word for “wretched.”

Two Reviews of the Same Restaurant

Original examples

Review A. The Harbor Grill is a cozy little spot with a relaxed atmosphere. The menu is simple, and the portions are generous. Service is unhurried, giving diners time to enjoy their meal.

Review B. The Harbor Grill is a cramped little spot with a sleepy atmosphere. The menu is limited, and the portions are excessive. Service is slow, leaving diners waiting for their meal.

WORDS & MORE

KEY IDEA

Same denotation, different connotation. Word choice shapes the reader's feelings.

READING · NOVELLA EXCERPT

Scrooge, Stave One (original text)

Charles Dickens, A Christmas Carol. Public domain.

Oh! But he was a tight-fisted hand at the grind-stone, Scrooge! a squeezing, wrenching, grasping, scraping, clutching, covetous, old sinner! Hard and sharp as flint, from which no steel had ever struck out generous fire; secret, and self-contained, and solitary as an oyster. The cold within him froze his old features, nipped his pointed nose, shrivelled his cheek, stiffened his gait; made his eyes red, his thin lips blue; and spoke out shrewdly in his grating voice. A frosty rime was on his head, and on his eyebrows, and his wiry chin. He carried his own low temperature always about with him; he iced his office in the dog-days; and didn't thaw it one degree at Christmas.

External heat and cold had little influence on Scrooge. No warmth could warm, no wintry weather chill him. No wind that blew was bitterer than he, no falling snow was more intent upon its purpose, no pelting rain less open to entreaty.

WORDS & MORE

MODEL · INTERPRET

"Hard and sharp as flint, from which no steel had ever struck out generous fire."

1. Literal: flint is a hard stone; striking it with steel makes sparks for a fire.
2. Figurative: no one has ever struck even a spark of generosity out of Scrooge.

REMEMBER

3 Effect: Scrooge seems cold, hard, and impossible to warm.

Model answer: The simile and the image of fire show that generosity cannot be struck out of Scrooge.

KEY IDEA

Identify the device, explain the comparison, then explain its effect on meaning or mood.

✓ REMEMBER

Device → comparison → effect.

Cold runs through the whole paragraph as an extended metaphor: the cold inside Scrooge freezes his face, he “iced his office,” and he never thaws, even at Christmas. Today, calling someone “a Scrooge” means he or she is stingy, which shows how strongly Dickens's character has shaped our language.

GET READY

Why might a writer pile up a long list of words instead of choosing just one?

2 Learn

Dickens wrote A Christmas Carol to be read aloud, and later performed it himself in theaters. His sentences have rhythm: he piles up lists, repeats patterns, and repeats sounds. Sound and rhythm help reveal character and mood.

MODEL · HEAR THE LIST

"a squeezing, wrenching, grasping, scraping, clutching, covetous, old sinner!"

WORDS & MORE

WORDS TO KNOW

alliteration
Repetition of beginning consonant sounds.

parallelism
Repeating the same grammatical pattern, such as "no warmth could warm, no wintry weather chill him."

read-aloud prose
Prose written to be heard as well as read. Dickens performed this story on stage.

REMEMBER

1 Six words in a row all describe greed.

2 Most end in -ing and are full of harsh sounds (sq, wr, gr, scr, cl).

3 Effect: the list sounds like grabbing hands that won't let go.

Model answer: The harsh, piled-up list makes Scrooge's greed sound ugly and endless.

WORDS & MORE

KEY IDEA

Lists, repetition, parallelism, and repeated sounds create mood and reveal character.

MODEL · HEAR THE PATTERN

"No warmth could warm, no wintry weather chill him. No wind that blew was bitterer than he…"

READING · INFORMATIONAL TEXT

Why Dickens Wrote A Christmas Carol

An original informational text based on historical accounts

1 Early in 1843, the British government published a report on children working in mines, mills, and workshops. It described children as young as five or six working twelve hours a day. Charles Dickens read it and was horrified. He told a friend he planned to write a pamphlet, an appeal on behalf of "the poor man's child."

2 That autumn he visited a ragged school, a free school run by volunteers for the poorest children in London. He saw children who were hungry, dirty, and had never been taught to read. A few weeks later, speaking to a crowd in Manchester, he argued that education was the best hope for children like these.

3 Dickens never wrote the pamphlet. Instead, he decided that a story would strike a much harder blow, because readers who would ignore a report might be moved by characters they cared about. Within about six weeks he had written *A Christmas Carol*.

4 Dickens also remembered his own childhood. When he was twelve, his father was imprisoned for debt, and Charles was sent to work in a factory, pasting labels on pots of boot polish. Many readers believe that this experience is one reason his story takes the side of poor children so fiercely.

KEY IDEA

Connect several facts to infer what the author implies but doesn't state.

MODEL · INFER

Why did Dickens decide to write a story instead of a pamphlet?

claim

MODEL · CER PARAGRAPH

How does Dickens present Scrooge in Stave One?

1 Claim: Scrooge is presented as a man whose greed has cut him off from everyone.

2 Evidence 1 + reasoning: “solitary as an oyster.”

3 Evidence 2 + reasoning: his words about the poor.

4 Conclusion.

Model answer: In Stave One, Dickens presents Scrooge as a man whose greed has cut him off from other people. The narrator calls him “solitary as an oyster,” a creature shut tight inside a hard shell. When the gentlemen ask him to help the poor, he answers that if they would rather die, they should “decrease the surplus population,” showing that he sees suffering people as numbers. Dickens creates a character so cold that readers wonder whether anything could ever change him.

Ignorance and Want in 1843

An original informational text based on historical facts

1 When the Ghost of Christmas Present reveals two starving children named Ignorance and Want, Dickens was not inventing a fantasy. In 1843, thousands of children in London never went to school. Many worked from the age of six or seven, sweeping chimneys, selling matches, or sorting rags. Others had no work and no home at all.

2 Some reformers tried to help. Volunteers opened **ragged schools**, so called because the children who came were dressed in rags. The schools were free and met in whatever rooms could be found, often in the poorest streets. Teachers taught reading, writing, arithmetic, and religion, and some schools gave out bread and clothing.

3 Dickens visited one of these schools in September 1843. He wrote to a wealthy friend, Angela Burdett-Coutts, who gave large sums to charity, describing the crowded room and the children's hunger, and asking her to support the school. He believed that a child who was never taught anything would grow up with no choices except crime or the workhouse.

4 Not everyone agreed. Many comfortable people argued that the poor would only become idle if they were helped, and that prisons and workhouses were enough. Dickens put those very words in Scrooge's mouth, and then had the Ghost throw them back at him.

WORDS & MORE

REMEMBER

5 Over the next decades, Britain slowly changed. Laws limited children's working hours, and in 1870 Parliament began creating schools for every child. Dickens did not live to see all of these changes, but his story helped persuade a generation of readers that the poor were not a "surplus population" but neighbors.

WORDS & MORE

KEY IDEA

Connect details from several paragraphs to draw well-supported inferences.

MODEL · INFER ACROSS PARAGRAPHS

What can you infer about why Dickens included Ignorance and Want in his story?

1 Paragraph 1: many real children had no school and no home.

2 Paragraph 3: Dickens had just seen a ragged school and believed uneducated children had no future.

3 Paragraph 4: he used his story to answer people who refused to help.

Model answer: Dickens included the two children to make readers face a real problem he had seen himself.

READING · NOVELLA EXCERPT

Scrooge, Stave Four (original text, excerpt)

Charles Dickens, A Christmas Carol. Public domain.

"Men's courses will foreshadow certain ends, to which, if persevered in, they must lead," said Scrooge. "But if the courses be departed from, the ends will change. Say it is thus with what you show me!"

"Spirit!" he cried, tight clutching at its robe, "hear me! I am not the man I was. I will not be the man I must have been but for this intercourse. Why show me this, if I am past all hope!"

KEY IDEA

Identify the figurative language, explain it, then connect it to the story's larger meaning.

MODEL · ANALYZE

"Men's courses will foreshadow certain ends, to which, if persevered in, they must lead. But if the courses be departed from, the ends will change."

1 Metaphor: a person's life is a course, or path, that leads to an end, or destination.

2 Structure: two balanced sentences, the second turning on "But."

3 Connection: Scrooge argues that the future the Spirit shows can still change if he changes his path.

Model answer: Scrooge turns the image of a path into an argument for hope: change the road, and you change where it ends.

Figurative language in a speech can express the story's biggest ideas.

A Christmas Carol has been adapted for the stage and screen hundreds of times; Dickens even performed it himself. Directors make choices about sets, lighting, sound, costumes, and acting. Each choice changes how the audience experiences the text.

WORDS & MORE

director
The person who decides how a story is staged or filmed.

adaptation
A version of a story changed for a new medium, such as a play or film.

WORDS & MORE

READING · INFORMATIONAL TEXT

Two Ways to Stage the Last Spirit

Original descriptions

Production A. The stage goes dark except for one cold spotlight. An actor on hidden stilts, wrapped in a tall black robe and hood, glides slowly toward Scrooge without a sound. The Spirit never speaks; it only points. The audience hears nothing but Scrooge's breathing.

Production B. A film version fills the screen with swirling black shadow. Deep, booming music swells, the Spirit's huge shape looms over the rooftops of London, and computer effects send Scrooge flying through the streets. The scenes move quickly, and some of Scrooge's lines are cut.

KEY IDEA

Compare what the text says with what the production shows; analyze the effect of each choice.

MODEL · ANALYZE CHOICES

Compare Productions A and B.

1. A: silent and simple; relies on the actor and the audience's imagination.
2. B: spectacular; overwhelming effects; some lines lost.
3. Effect: A makes the Spirit eerie and close; B makes it huge and terrifying.

Model answer: Each production highlights different parts of the scene.

WORDS & MORE

WORDS TO KNOW

concrete noun
Names something you can perceive with the senses: chain, turkey.

abstract noun
Names an idea, quality, or feeling: greed, generosity.

WORDS & MORE

WORDS TO KNOW

nominalization
Turning a verb or adjective into a noun, such as generous → generosity.

REMEMBER

Suffix	Base word	Noun
-ness	kind, happy	kindness, happiness
-tion / -sion	transform, decide	transformation, decision
-ment	punish, astonish	punishment, astonishment
-ity	generous, charitable	generosity, charity
-ance / -ence	repent / obey	repentance, obedience
-dom	free, wise	freedom, wisdom

KEY IDEA

UNIT 3

Mystery and Grammar

Mystery structure and characterization, pronouns, verb tense, voice, and mood, with Strange Case of Dr. Jekyll and Mr. Hyde, Chapters 1–4.

Fog-filled London streets, a sinister stranger, and a respectable doctor with a secret: Stevenson's Strange Case of Dr. Jekyll and Mr. Hyde is one of the most famous mysteries ever written. As you investigate alongside Mr. Utterson, you'll also investigate how grammar works: how pronouns keep meaning clear and how verbs control time, focus, and attitude.

In this unit you will...

- Analyze mystery structure, frame narratives, characterization, clues, and foreshadowing.
- Use pronoun case, clear reference, and agreement correctly.
- Use and analyze verb tenses, active and passive voice, and moods.
- Avoid shifts; write and edit an objective news report.

WHY IT MATTERS

Clear pronouns and consistent verbs matter in every report, email, and essay, and noticing passive voice helps you see when someone is avoiding responsibility.

UNIT VOCABULARY

frame narrative	A story within a story.
antecedent	The noun a pronoun refers to.
passive voice	The subject receives the action.
subjunctive	The mood for wishes and contrary-to-fact ideas.
foreshadowing	Hints about later events.

GET READY

What makes a mystery story hard to put down?

2 Learn

Strange Case of Dr. Jekyll and Mr. Hyde (1886) is a Gothic mystery. Stevenson withholds the truth until the very end. Much of the story reaches us secondhand: in Chapter 1, Mr. Enfield tells Mr. Utterson a story within the story, a frame

WORDS & MORE

WORDS TO KNOW

mystery
A genre built around a puzzle or crime that characters try to solve.

Mystery element	In Chapter 1
a puzzle	Why would respectable Dr. Jekyll's name be on a cheque given by the brutal Mr. Hyde?
clues	the door, the cheque, Hyde's strange appearance
an investigator	Mr. Utterson, the lawyer
withheld information	Enfield refuses to name the signer at first

READING · CLASSIC NOVEL EXCERPT

From Chapter 1, "Story of the Door" (original 1886 text)

Robert Louis Stevenson, Strange Case of Dr. Jekyll and Mr. Hyde (1886). Public domain.

Mr. Utterson the lawyer was a man of a rugged countenance that was never lighted by a smile; cold, scanty and embarrassed in discourse; backward in sentiment; lean, long, dusty, dreary and yet somehow lovable.

KEY IDEA

Mysteries withhold information and plant clues; frame narratives filter events through a character's telling.

MODEL · ANALYZE CHARACTERIZATION

What kind of investigator is Utterson?

1 "never lighted by a smile"; "cold, scanty and embarrassed in discourse": reserved, serious.

2 "and yet somehow lovable": loyal, trustworthy.

Model answer: Utterson is a reserved, serious man whom readers can trust to pursue the truth.

A pronoun must clearly point to one antecedent. Ambiguous pronouns could refer to two people. Vague pronouns (it, this, they) refer to no specific noun.

Problem	Example	Fix
ambiguous	Utterson told Enfield that he was worried.	Utterson told Enfield, "I am worried." / Utterson was worried, and he told Enfield.
vague "they"	In the newspaper, they said Hyde fled.	The newspaper reported that Hyde fled.

WORDS & MORE

KEY IDEA

Analyze both what the author says directly and what is shown through reactions and details.

MODEL · ANALYZE

What does Enfield's description reveal?

1 He can't say what is wrong: "I scarce know why."

2 Repeated "something" words build unease.

WORDS TO KNOW

indefinite pronoun
A pronoun that doesn't refer to a specific person or thing: everyone, each, someone, several.

REMEMBER

Indefinite pronoun	Number	Example
each, everyone, everybody, someone, anyone, nobody, either, neither	singular	Each of the servants knows his or her duties.
both, few, many, several	plural	Several of the witnesses gave their accounts.
all, some, most, none, any	depends on the noun after "of"	Some of the money was missing. Some of the doors were locked.

WORDS & MORE

KEY IDEA

Match number: singular antecedents with singular pronouns and verbs; plural with plural.

In formal writing, singular indefinite pronouns take singular verbs. Many style guides now also accept singular they for a person whose gender is unknown; choose one approach and use it consistently. Rewriting with a plural noun often avoids the problem: All of the guests took their seats.

The Museum Robbery: Two Reports

Original examples

Report A. Last night, a thief broke a window at the city museum, climbed inside, and stole a gold necklace from the Egyptian exhibit. A guard spotted the thief and called the police.

Report B. Last night, a window at the city museum was broken, and a gold necklace was stolen from the Egyptian exhibit. The police were called after a suspicious figure was spotted.

MODEL · COMPARE

Report A vs Report B

1 A (active): a thief broke, climbed, stole; the actor is clear and vivid.

2 B (passive): was broken, was stolen; the actor is hidden.

3 Effect: B is vaguer; useful when the actor is unknown, but less vivid.

Model answer: Active voice is clearer and more direct; passive voice hides or downplays who acted.

Fog over the City

An original story

1 By ten o'clock the fog had swallowed the city whole. Gas lamps glowed like dim orange moons, and the cobblestones gleamed with damp. Somewhere a church bell struck the hour, its sound muffled as if wrapped in wool.

2 Inspector Hale turned up his collar and listened. A door creaked. Footsteps hurried away. When he reached the alley, it was empty, except for a single silver button lying in a puddle, catching the lamplight.

3 Hale picked it up. It was engraved with two letters, so worn he could barely read them. Someone had left in a hurry. Someone, he suspected, who had very good reasons not to be seen.

KEY IDEA

Grammar choices (voice, mood, tense, pronouns) create effects like suspense, distance, or urgency.

News reports use the inverted pyramid: the most important facts first, details after. They are objective, use past tense consistently, and quote witnesses.

KEY IDEA

Lead with the 5 Ws and H, then add details in order of importance. Stay objective and consistent.

3 Where/when: a London street, late at night.

4 How: beaten with a cane; a maid witnessed it.

Model answer: Sir Danvers Carew, a respected member of Parliament, was beaten to death on a London street late last night, according to a maid who witnessed the attack from her window.

UNIT 4

Craft and Perspective

Word choice and tone, structure and delayed revelation, point of view and purpose, symbolism, and comparing fiction with history, with Strange Case of Dr. Jekyll and Mr. Hyde, Chapters 5–10.

The mystery deepens, the truth is revealed, and Stevenson's craft comes into full view. You'll analyze how word choice creates tone, how documents and delays build suspense, how point of view controls what we know, and how symbols carry the novel's theme of duality. Then you'll compare Jekyll's fictional experiment with real scientists who experimented on themselves.

In this unit you will…

- Analyze diction, tone, and mood; analyze structure and pacing.
- Analyze point of view, dramatic irony, reliability, and arguments with counterclaims.
- Analyze symbols and theme development.
- Compare fiction with historical accounts; write craft and comparative analyses.

WHY IT MATTERS

Analyzing tone, perspective, and argument helps you read news, reviews, and debates critically, and the question of science's limits is debated today.

UNIT VOCABULARY

tone	The author's attitude.
dramatic irony	Readers know more than a character.
symbol	An object that represents an idea.
duality	Having two sides.

mood
The feeling a text creates in the reader.

diction
An author's choice of words.

Chapters 5–6: Incident of the Letter; Remarkable Incident of Dr. Lanyon, pages 67–85

As you read, think about: What does Guest notice about the handwriting? What happens to Dr. Lanyon?

REMEMBER

KEY IDEA

Diction creates tone and mood. Explain how specific words produce the effect.

✓ REMEMBER

Word choice creates tone (author's attitude) and mood (reader's feeling).

Word or phrase type	Example effect
dark adjectives	build dread: “dismal,” “ghastly”
weather and light	fog and darkness mirror secrecy
restrained narration	Utterson's calm voice makes horror feel more real
physical reactions	pallor, trembling, and fainting show fear without explaining it

MODEL · ANALYZE DICTION

Lanyon's change in Chapter 6

1 Details: Lanyon looks pale, aged, and frightened; he refuses to speak of Jekyll.

Fog and Gaslight: Victorian London

An original informational text

A City of Contrasts

In the 1880s, London was the largest city in the world, home to more than four million people. Its wealthy neighborhoods had grand squares and elegant houses. Only a short walk away, poor families crowded into narrow lanes and dark courtyards.

The Famous Fog

London's fogs were thick, yellow-brown, and sometimes deadly. Coal fires in homes and factories filled the damp air with smoke. On the worst days, people could not see their own hands, and travelers lost their way on familiar streets.

Light in the Darkness

Gas streetlamps lit the main roads at night. Lamplighters walked the streets each evening, lighting lamps one by one. But the light was dim, and alleys and back streets remained in deep shadow.

Respectability and Secrets

REMEMBER

Victorian society placed great value on **respectability**, a reputation for proper behavior. Gentlemen were expected to control their emotions and hide any private weaknesses. Many historians believe this pressure to appear perfect is one reason stories about hidden second selves fascinated Victorian readers.

WORDS & MORE

KEY IDEA

Each section contributes; analyze how the sections build the central idea.

MODEL · ANALYZE SECTIONS

How does the final section connect to the rest?

1 Sections 1–3 describe contrasts, fog, and shadow.

2 Section 4 explains respectability and hidden selves.

3 Together: a city of light and darkness mirrors people with public and private sides.

Model answer: The sections build toward the idea that Victorian London's contrasts mirrored the double lives that fascinated readers.

READING · INFORMATIONAL TEXT

Handwriting as Evidence

An original informational text

1 When a document's author is in doubt, investigators may call on a **forensic document examiner**, an expert who analyzes handwriting, paper, and ink.

2 No two people write exactly alike. Examiners compare **exemplars**, samples known to be written by a person, with the **questioned document**. They look at letter shapes, spacing, slant, pen pressure, and the way letters connect.

3 A clever forger may copy the shapes of letters but often writes too slowly and carefully. The result can show shaky lines, blunt starts and stops, and unnatural pauses, which examiners call signs of **hesitation**.

4 Handwriting analysis cannot prove guilt by itself, but combined with other evidence it can be powerful. In *Strange Case of Dr. Jekyll and Mr. Hyde*, a clerk's observation about two handwriting samples gives Mr. Utterson a chilling clue.

WORDS & MORE

KEY IDEA

Technical words are often defined by context or contrast. Use them precisely in your own writing.

MODEL · USE CONTEXT

What is a questioned document?

1 Paragraph 2 contrasts it with exemplars (known samples).

2 So a questioned document is one whose author is unknown or disputed.

Model answer: a document whose author is in doubt

Should Science Have Limits?

An original opinion essay

1 Scientific discoveries have given us vaccines, electricity, and the internet. Some people argue that science should never be restricted, because we cannot know which experiment will lead to the next great breakthrough.

2 I disagree. Science must have limits, especially when experiments involve human beings. History offers painful examples of researchers who harmed people in the name of progress, often people who never agreed to take part.

3 Of course, limits can slow discovery, and rules written by people who don't understand the research may block valuable work. These concerns are real. But careful review by independent experts, who weigh risks and benefits before an experiment begins, protects both the public and the trust that science depends on.

4 Freedom to explore is one of science's greatest strengths. Responsibility is another. A scientist who ignores the second may lose the first.

WORDS & MORE

KEY IDEA

Find the position (often signaled by I believe, I disagree, must) and the purpose (persuade, inform, explain).

MODEL · IDENTIFY POSITION AND PURPOSE

2 Purpose: to persuade readers to support independent review of experiments.

pacing
The speed at which events unfold in a story.

REMEMBER

KEY IDEA

Long sentences build; short sentences strike. Paragraph breaks control pace.

✓ REMEMBER

Pacing and sentence length heighten climaxes.

1 The long middle sentence stretches time with sound details, building tension.

Technique: delayed revelation

1 Technique: Stevenson delays the truth through sealed documents.

REMEMBER

2 Example: Lanyon's letter must not be opened until Jekyll's death.

3 Effect: readers share Utterson's frustration, heightening suspense.

Model answer: Stevenson builds suspense by delaying the truth through sealed documents. Scientists Who Experimented on Themselves

An original informational text based on historical facts

The Doctor Who Reached His Own Heart

In 1929, a young German doctor named Werner Forssmann believed a thin tube could be guided through a vein all the way to the heart, a procedure many experts considered deadly. When his supervisors refused permission, Forssmann numbed his own arm, inserted a tube into a vein, and pushed it toward his heart. Then he walked to the X-ray room to photograph the result.

Forssmann's colleagues were not impressed, and he was criticized for his reckless act. Decades later, however, the technique, called cardiac catheterization, became a standard part of medicine. In 1956, Forssmann shared the Nobel Prize in Physiology or Medicine.

The Doctor Who Drank Bacteria

In the early 1980s, Australian doctors Barry Marshall and Robin Warren argued that many stomach ulcers were caused by bacteria, not stress. Other scientists doubted them. In 1984, Marshall drank a culture of the bacteria. Within days he became ill with stomach inflammation, supporting the doctors' claim. Marshall and Warren received the Nobel Prize in 2005.

A Risky Tradition

REMEMBER

Self-experimentation has produced important discoveries, but it can also cause serious harm, and its results can be misleading because they involve only one person. Today, research involving people is reviewed by ethics committees designed to protect volunteers, including the scientists themselves.

KEY IDEA

Compare how fiction and history portray a similar topic; notice what fiction exaggerates or changes for its purpose.

	Jekyll (fiction)	Forssmann and Marshall (history)

Result	loses control; destruction	risky but useful discoveries; Nobel Prizes

MODEL · THESIS

1 Name both texts.

REMEMBER

2 Point of comparison: risk and responsibility.

UNIT 5

Modifiers and Precise Description

Adjectives, adverbs, comparison, modifier placement, prepositions, interjections, conjunctions, and science-fiction writing, with The Time Machine, Chapters 1–4.

H. G. Wells imagined a machine that could travel through time, and he had to describe something no one had ever experienced. In this unit you'll study how writers use modifiers to make description vivid and precise, master the grammar of adjectives, adverbs, phrases, and clauses, and write your own science-fiction scene.

In this unit you will…

- Analyze science fiction, frame narratives, and descriptive craft.
- Use and punctuate adjectives and adverbs; form comparisons correctly.
- Place modifiers correctly; use prepositions, interjections, and conjunctions.
- Write and revise a vivid, concise science-fiction scene.

WHY IT MATTERS

Precise, concise language makes everything from product descriptions to science reports clearer, and GPS really does depend on Einstein's ideas about time.

UNIT VOCABULARY

coordinate adjectives	Equal adjectives separated by a comma.
dangling modifier	A modifier with no clear word to describe.
comparative	Compares two.
interjection	Expresses sudden emotion.
redundancy	Saying the same thing twice.

READ IN YOUR READER

The Time Machine
Chapter 1: The Inventor, pages 15–26

As you read, think about: What does the Time Traveller explain to his guests? How do they react?

REMEMBER

KEY IDEA

Science fiction imagines scientific possibilities; a frame narrator filters the Traveller's story through a listener.

✓ REMEMBER

Science fiction imagines scientific possibilities; the frame filters the story.

READING · CLASSIC NOVEL EXCERPT

From The Time Machine, Chapter 1 (original 1895 text)

H. G. Wells, The Time Machine (1895). Public domain.

The Time Traveller (for so it will be convenient to speak of him) was expounding a recondite matter to us. His grey eyes shone and twinkled, and his usually pale face was flushed and animated.

MODEL · ANALYZE THE OPENING

What do we learn in the first two sentences?

1 The narrator doesn't name the Time Traveller.

2 “Recondite” means obscure or difficult.

3 Shining eyes and flushed face show excitement.

WORDS TO KNOW

coordinate adjectives
Two or more adjectives that equally describe a noun; separated by a comma.

compound adjective
Two or more words joined to act as one adjective, often hyphenated.

compound adjective before a noun	a well-known inventor, a time-traveling machine	hyphenate
coordinate adjectives	a cold, dark night	comma (could use “and”; order can switch)
cumulative adjectives	a large brass lever	no comma (can't use “and”; order fixed)

KEY IDEA

If you can add “and” or switch the order, use a comma. Hyphenate compound adjectives before nouns. Capitalize proper adjectives.

✓ REMEMBER

Comma for coordinate adjectives; hyphens for compound adjectives; capitals for proper adjectives.

MODEL · COMMA TEST

KEY IDEA

Analyze specific modifiers: what image, what feeling, what effect on the reader.

REMEMBER

✓ REMEMBER

Modifiers create images and tone.

MODEL · ANALYZE WELLS'S MODIFIERS

"His grey eyes shone and twinkled, and his usually pale face was flushed and animated."

1 "usually pale": the adverb tells us this is unusual excitement.

superlative
Compares three or more: fastest, most careful.

READ IN YOUR READER

The Time Machine
Chapter 2: The Machine, pages 27–35

As you read, think about: What happens to the small model machine? How do the guests explain it?

REMEMBER

Rule	Comparative	Superlative
one syllable: -er, -est	faster	fastest
most two+ syllables: more, most	more careful	most careful
two syllables ending in -y: -ier, -iest	happier	happiest
irregular good/well	better	best
irregular bad/badly	worse	worst
irregular many/much	more	most

KEY IDEA

Comparative for two, superlative for three or more; no double comparisons; fewer for countable, less for uncountable.

✓ REMEMBER

Comparatives for two, superlatives for more; fewer vs less.

Fewer is for things you can count (fewer guests); less is for amounts you can't count (less time). Never double up: more faster is incorrect.

What Is the Fourth Dimension?

An original informational text

1 We usually describe space with three **dimensions**: length, width, and height. A shoebox, for example, is a certain number of inches long, wide, and tall. To find any point inside it, you need exactly three measurements.

2 But objects also exist in **time**. A shoebox that sits on a shelf for ten years has a past and a future as well as a size. Scientists and writers have long wondered whether time might be thought of as a fourth dimension, one that we move through steadily in one direction.

3 In 1895, H. G. Wells imagined a machine that could travel along this fourth dimension as easily as a train travels along a track. Ten years later, the physicist Albert Einstein published his theory of special relativity, which treats space and time as closely connected, and which soon led scientists to describe the universe as four-dimensional "spacetime."

4 Einstein's work showed that time is not the same for everyone: a clock moving very fast ticks more slowly than one at rest. This effect is tiny at everyday speeds but measurable. Satellites in the GPS system must correct their clocks for it, or the maps on our phones would quickly become inaccurate.

The First Jump

An original science-fiction story

1 Mara gripped the brass lever with both hands. The machine hummed softly, then louder, until the whole laboratory trembled. She took a long breath and pushed.

2 Instantly, the room dissolved. Sunlight and darkness flickered across the walls faster than she could blink, day and night racing like the pages of a book flipped by an impatient thumb. The plant on the windowsill shot upward, bloomed, withered, and crumbled into dust. Outside, buildings rose like mushrooms after rain, then sagged, then vanished.

3 Her stomach lurched. Wow! she thought, half terrified and half thrilled. She pulled the lever back, gently, carefully, and the flickering slowed to a dizzy blur.

KEY IDEA

Interjections convey sudden emotion; use exclamation points for strong feeling, commas for mild.

MODEL · ANALYZE AN INTERJECTION

"Wow! she thought, half terrified and half thrilled."

1 "Wow!" bursts with sudden emotion.

2 The phrase "half terrified and half thrilled" explains the mixed feeling.

Model answer: The interjection captures Mara's shock in a single word.

Interjections express emotion; punctuate by strength.

coordinating conjunction
Joins equal parts: for, and, nor, but, or, yet, so.

subordinating conjunction
Begins a dependent clause: because, although, when, if, since, while.

correlative conjunctions
Work in pairs: either…or, neither…nor, both…and, not only…but also.

UNIT 6

Sentence Craft

Clauses and sentence types, phrases, combining, variety, parallelism, and analytical writing, with The Time Machine, Chapters 5–12.

In the year 802,701, the Time Traveller discovers that a beautiful world hides a terrible secret. As you follow him into the darkness, you'll master the building blocks of strong sentences: clauses, phrases, and the four sentence types. You'll combine and vary sentences for clarity and power, and write an essay about Wells's warning to the future.

In this unit you will…

- Analyze utopia, dystopia, allegory, and symbolism.
- Identify clauses and write all four sentence types.
- Identify and use prepositional, appositive, participial, gerund, and infinitive phrases.
- Combine sentences precisely; vary sentences; use parallel structure; revise an analytical essay.

WHY IT MATTERS

Writers, lawyers, and leaders use sentence variety and parallelism to make arguments memorable, and dystopian stories still shape debates about technology and fairness.

UNIT VOCABULARY

independent clause	Can stand alone.
dependent clause	Cannot stand alone.
gerund	An -ing verb used as a noun.
allegory	A story representing larger ideas.
parallel structure	Same grammatical form in a series.

READING · INFORMATIONAL TEXT

Utopias and Dystopias

An original informational text

1 A **utopia** is an imagined perfect society, where everyone is happy and no one suffers. The word was coined in 1516 by the English writer Thomas More, who combined Greek roots meaning "no place," a sly hint that such a perfect world may not exist.

2 A **dystopia** is the opposite: an imagined society in which something has gone terribly wrong, often hidden behind a surface that looks peaceful or orderly. Dystopian stories usually exaggerate a problem in the writer's own time to warn readers about where it might lead.

3 When the Time Traveller first arrives in the year 802,701, he believes he has found a utopia. The Eloi live in a garden-like world without work, war, or disease. But as he explores, he discovers that the beautiful surface hides a disturbing truth. Many readers see *The Time Machine* as an early dystopian warning about the growing divide between the wealthy and the working poor in Victorian England.

WORDS & MORE

KEY IDEA

Utopias and dystopias comment on the author's own time. Look beneath the surface.

MODEL · ANALYZE THE FIRST IMPRESSION

What does the Traveller first believe?

The Harlem Renaissance

An original informational text

1 In the 1920s and early 1930s, the New York City neighborhood of Harlem became the center of an extraordinary flowering of African American art, music, literature, and ideas. This movement is now called the **Harlem Renaissance**. *Renaissance* means "rebirth."

2 Writers such as Langston Hughes, Zora Neale Hurston, Claude McKay, Countee Cullen, and Georgia Douglas Johnson published poems, stories, and novels that celebrated Black life and challenged racism. Musicians such as Duke Ellington and Louis Armstrong helped make jazz one of the most important art forms in America. Painters such as Aaron Douglas created bold images inspired by African art and modern design.

3 The movement grew out of the Great Migration, as hundreds of thousands of Black Southerners moved to Northern cities in search of opportunity. In Harlem, writers, thinkers, and artists found one another, and magazines and newspapers gave them places to publish.

4 The Harlem Renaissance did not end racism or segregation. But it changed how many Americans saw Black artists and how Black Americans expressed their own identity, and its influence can still be heard and read today.

A Note on Historical Language

An original note for readers

1 Texts from the early 1900s, including titles such as *The New Negro*, use the word *Negro*. At that time, it was the respectful, standard term, and Black writers and organizations used it themselves; it was often capitalized as a sign of dignity. Today it is considered outdated, and most people say *Black* or *African American*.

2 When you quote or name historical works, use their original titles and words exactly. When you write in your own voice, use current, respectful terms. Understanding why language changes is part of understanding history.

We Wear the Mask

Paul Laurence Dunbar (1895). Public domain.

We wear the mask that grins and lies,
It hides our cheeks and shades our eyes,—
This debt we pay to human guile;
With torn and bleeding hearts we smile,
And mouth with myriad subtleties.

Why should the world be over-wise,
In counting all our tears and sighs?
Nay, let them only see us, while
We wear the mask.

We smile, but, O great Christ, we cry
To thee from tortured souls arise.
We sing, but oh the clay is vile
Beneath our feet, and long the mile;
But let the world dream otherwise,
We wear the mask!

MODEL · ANALYZE THE EXTENDED METAPHOR

What is "the mask"?

1 Literal: a face covering.

2 Figurative: the cheerful appearance Black Americans were forced to show to survive racism.

3 Evidence: "grins and lies," "torn and bleeding hearts we smile."

Model answer: The mask is an extended metaphor for hiding pain behind a smile in a hostile society.

KEY IDEA

Though he is often remembered for poems written in dialect, much of his most powerful work, such as “We Wear the Mask” and “Sympathy,” is written in standard English and expresses the pain of living under racism. Many Harlem Renaissance writers saw Dunbar as an important forerunner.

During his lifetime, Paul Laurence Dunbar's popularity with white audiences rested largely on his dialect poems, which some readers enjoyed as humorous portraits of plantation life. The Great Migration

An original informational text based on historical facts

1 Between about 1910 and 1970, roughly six million African Americans left the rural South and moved to cities in the North, Midwest, and West. Historians call this movement the **Great Migration**. In its first wave, from about 1910 to 1940, more than a million and a half people made the journey.

2 People left for many reasons. In the South, Jim Crow laws enforced segregation and denied Black citizens the right to vote. Violence, including lynching, terrorized communities. Many families worked as sharecroppers, renting land and paying with a share of their crops, a system that often kept them in debt. Around 1915, an insect called the boll weevil destroyed cotton crops across the region.

3 At the same time, Northern cities offered new possibilities. When World War I began, factories needed workers, and immigration from Europe slowed. Black newspapers such as the *Chicago Defender* published job listings and encouraged readers to come north.

REMEMBER

4 Life in the North was not free of racism. Migrants faced discrimination in housing and jobs, and some cities saw violent attacks. Still, many found better wages, better schools for their children, and the chance to vote. In neighborhoods like Harlem in New York and the South Side of Chicago, new communities formed, and their energy helped fuel the Harlem Renaissance.

Charles S. Johnson: Building a Movement

An original informational text based on historical facts

1 Charles S. Johnson was a sociologist, a scientist who studies how societies work. In 1923 he became the founding editor of *Opportunity*, the magazine of the National Urban League. Johnson believed that art and literature could change how Americans thought about race, and he used *Opportunity* to publish young Black writers and to award prizes for their work.

2 In 1924, Johnson organized a dinner at the Civic Club in New York, bringing together Black writers and white editors and publishers. Many historians see this event as a turning point: within a year, major magazines and publishing houses were seeking out Black writers. Johnson later became the first Black president of Fisk University, in 1946.

MODEL · EVALUATE A CLAIM

Claim: Charles S. Johnson helped launch the Harlem Renaissance.

1 Evidence 1: founded and edited Opportunity; published young writers; gave prizes. (relevant)

2 Evidence 2: organized the 1924 Civic Club dinner; publishers sought Black writers within a year. (relevant, specific)

3 Reasoning: connecting writers to publishers expanded their audience. (sound)

Model answer: The claim is well supported by relevant, specific evidence and sound reasoning.

KEY IDEA

Evaluate relevance, sufficiency, and reasoning; watch for vague or unsupported evidence.

WORDS & MORE

REMEMBER

✓ REMEMBER

Evidence must be relevant, sufficient, and soundly connected.

The Black Press

An original informational text based on historical facts

1 In the early twentieth century, mainstream newspapers often ignored or misrepresented Black communities. In response, Black journalists built their own press.

2 The *Chicago Defender*, founded by Robert S. Abbott in 1905, became one of the most widely read Black newspapers in the country. Railroad porters carried copies south, where they were passed from hand to hand. *The Crisis*, the magazine of the NAACP edited by W. E. B. Du Bois, began in 1910 and published essays, news, and poetry, including early work by Langston Hughes.

3 Journalists such as J. A. Rogers, a Jamaican-born writer who wrote for the *Pittsburgh Courier*, researched and published the achievements of people of African descent throughout history, challenging claims that Black people had no history worth studying.

4 The Black press informed readers, organized communities, and gave Harlem Renaissance writers a place to be heard. Without it, the movement might never have reached a national audience.

Alain Locke and The New Negro

An original informational text based on historical facts

1 In March 1925, the magazine *Survey Graphic*, edited by Paul Kellogg, published a special issue devoted to Harlem. Its guest editor was Alain Locke, a philosopher at Howard University and the first African American Rhodes Scholar.

2 Later that year, Locke expanded the issue into a book, *The New Negro: An Interpretation*. It gathered essays, fiction, poetry, and art by many of the movement's leading figures.

3 In his essays, Locke argued that a new spirit of pride, self-respect, and creativity was rising among Black Americans, especially young people in cities. He believed that through art and literature, Black Americans could define themselves rather than be defined by others' stereotypes.

4 Not everyone agreed with Locke's emphasis on art. Some leaders argued that political and economic action, such as fighting for voting rights and better jobs, mattered more. The debate itself shows how many voices the Harlem Renaissance included.

Decades earlier, Paul Laurence Dunbar described smiling "with torn and bleeding hearts," capturing the pain behind a forced appearance. UNIT 8

Conventions and Word Choice

Commas, semicolons, colons, dashes, quotation and title punctuation, editing, roots, confusing words, spelling, and precise formal style, with The Time Machine, Chapters 13–15 and Epilogue.

The Time Traveller escapes the Morlocks, glimpses the end of the world, and returns home to skeptical friends. As his story ends, you'll sharpen the conventions that make writing clear and credible: advanced punctuation, careful editing, word roots and confusing words, spelling rules, and precise, formal style.

In this unit you will...

- Analyze the novel's climax, imagery, evidence, and open ending.
- Use commas, semicolons, colons, dashes, parentheses, ellipses, and capitalization correctly.
- Punctuate quotations and titles; edit for splices, fragments, and agreement in context.
- Use roots, confusable words, spelling rules, references, and formal concise style.

WHY IT MATTERS

Polished conventions make applications, emails, and reports credible; a single misplaced comma can change meaning.

UNIT VOCABULARY

semicolon	Joins related independent clauses.
colon	Introduces after a complete sentence.
comma splice	Two sentences joined by only a comma.
nuance	A subtle difference in meaning.

Evidence and Belief

An original informational commentary

1 When the Time Traveller finishes his story, most of his guests do not believe him. The Medical Man examines the strange white flowers the Traveller brought back and admits he cannot identify them, yet he still doubts the tale. The Editor jokes that it is a pity the Traveller is not a writer of stories.

2 Their reaction raises an old question: what kind of evidence is enough to believe something extraordinary? Many scientists follow a principle often summed up as “extraordinary claims require extraordinary evidence.” Two unusual flowers and a battered machine are intriguing, but they are not proof.

3 Yet the narrator is not so sure. He returns the next day and sees the Traveller preparing to leave again, carrying a small camera and a knapsack, perhaps to bring back the proof his friends demanded.

Langston Hughes: Poet of the People

An original informational text

1 Langston Hughes (1901–1967) was one of the most important voices of the Harlem Renaissance. He grew up mostly in the Midwest, and as a young man he worked many jobs, including as a sailor and a busboy, while he wrote poetry. His first book of poems, *The Weary Blues*, appeared in 1926.

2 Hughes wanted his poems to sound like the people he knew. He borrowed the rhythms of jazz and the blues, repeated lines the way a singer repeats a chorus, and used everyday words instead of fancy ones. His tone could be proud, playful, sorrowful, or defiant, sometimes all in a single poem.

3 Some critics of his time thought that poetry should be formal and elevated. Hughes disagreed. He believed that the lives, speech, and music of ordinary Black Americans were worthy subjects for art, and generations of later writers followed his lead.

We Wear the Mask

Paul Laurence Dunbar (1895). Public domain.

We wear the mask that grins and lies,
It hides our cheeks and shades our eyes,—
This debt we pay to human guile;
With torn and bleeding hearts we smile,
And mouth with myriad subtleties.

Why should the world be over-wise,
In counting all our tears and sighs?
Nay, let them only see us, while
We wear the mask.

We smile, but, O great Christ, we cry
To thee from tortured souls arise.
We sing, but oh the clay is vile
Beneath our feet, and long the mile;
But let the world dream otherwise,
We wear the mask!

WORDS & MORE

Dunbar wrote “We Wear the Mask” in 1895 using a formal rhyme scheme, elevated diction, and a refrain. Thirty years later, Hughes often wrote in free or blues-shaped verse with everyday speech. Both poets address the experience of Black Americans facing racism, but their tones and styles differ.

Georgia Douglas Johnson and the S Street Salon

An original informational text based on historical facts

1 Georgia Douglas Johnson (1880–1966) was a poet, playwright, and teacher who lived in Washington, D.C. Her first book of poems, *The Heart of a Woman*, was published in 1918, and she went on to publish several more collections and to write many plays.

2 Johnson is also remembered as a host. For years, on Saturday evenings, writers and artists gathered at her home on S Street to read their work aloud, trade ideas, and encourage one another. Young writers such as Langston Hughes and Jean Toomer were among the visitors. As a result, her home became one of the meeting places that connected the Harlem Renaissance to Washington.

3 In contrast to some writers who became famous quickly, Johnson spent much of her life balancing her writing with work and family. Nevertheless, she kept writing, and her support for other artists helped the movement grow.

Elise Johnson McDougald

An original informational text based on historical facts

1 Elise Johnson McDougald (1885–1971) was an educator and writer in New York City. She worked to improve schools and job opportunities for Black children and women, and she became one of the first Black women to serve as a principal in the city's public schools.

2 Her essay "The Task of Negro Womanhood" appeared in *The New Negro* (1925), the influential collection edited by Alain Locke. In it, she describes the many kinds of work Black women were doing in Harlem, from homes and factories to offices and professions, and argues that they faced the double burden of racism and sexism. She supports her claims with observations of real working lives rather than with stereotypes.
