GET READY

Read this line aloud: "Old Marley was as dead as a door-nail." Why would a story begin by insisting that someone is dead?

READ IN YOUR READER

A Christmas Carol · Introduction and Stave One (first section) · pages 2–11

As you read, think about: Who is Scrooge? How do other people react to him on Christmas Eve?

Dickens wrote A Christmas Carol in 1843, so most of his words are familiar, but some are old-fashioned or British, and his sentences can be long. Three strategies help: read aloud for meaning, translate old words, and break long sentences at their semicolons and commas.

Dickens's word	Modern meaning
'Change	the Exchange, where merchants met to do business
counting-house	a business office
humbug	nonsense; a fraud
dog-days	the hottest days of summer
rime	frost
comforter	a long woolen scarf
workhouse	a grim public home for the very poor

READING · NOVELLA EXCERPT

From A Christmas Carol, Stave One (original text)

Charles Dickens, A Christmas Carol (1843). Public domain.

MARLEY was dead: to begin with. There is no doubt whatever about that. The register of his burial was signed by the clergyman, the clerk, the undertaker, and the chief mourner. Scrooge signed it: and Scrooge's name was good upon 'Change, for anything he chose to put his hand to. Old Marley was as dead as a door-nail.

"Bah!" said Scrooge, "Humbug!"

MODEL · TRANSLATE A SENTENCE

"Scrooge's name was good upon 'Change, for anything he chose to put his hand to."

1 'Change = the Exchange, where merchants did business.

2 his name was good = people trusted his signature.

3 anything he chose to put his hand to = any deal he signed.

Model answer: "The merchants trusted Scrooge's signature on any deal he made." He is respected in business, which tells us money is what he is known for.

★ KEY IDEA

Read aloud, translate old words, and break long sentences into parts. Meaning first, then details.

In "Many saved for months by joining a goose club, paying a few pennies each week to a shopkeeper," what is a goose club?

READING · INFORMATIONAL TEXT

Christmas in Dickens's London

An original informational text

1 In 1843, London was the largest city in the world, home to about two million people. Its factories, banks, and docks made some families very rich. Yet many Londoners lived crowded into a single damp room, and a coal fire, a hot meal, or a pair of boots was a luxury.

2 For a working family, the Christmas feast took planning. Many saved for months by joining a **goose club**, paying a few pennies each week to a shopkeeper so that they could collect a goose at Christmas. Families with no oven of their own carried their dinner to the local baker's shop, where it was roasted in the big bread ovens for a small fee.

3 People who could not support themselves at all might be sent to a **workhouse**. Under the Poor Law of 1834, workhouses were made deliberately unpleasant: families were separated, the work was hard, and the food was plain and meager, so that only the truly desperate would ask to enter.

4 Christmas itself was changing. The first Christmas card for sale was printed in London in 1843, the same year *A Christmas Carol* appeared. Over the following decades, the holiday grew from a modest celebration into the family festival of gifts, feasting, and charity that Dickens's story helped to shape.

1 The sentence restates it: "paying a few pennies each week to a shopkeeper."

2 The purpose follows: "so that they could collect a goose at Christmas."

GET READY

What does Dickens mean when he says Scrooge is "solitary as an oyster"?

READING · NOVELLA EXCERPT

Scrooge, Stave One (original text)

Charles Dickens, A Christmas Carol. Public domain.

Oh! But he was a tight-fisted hand at the grind-stone, Scrooge! a squeezing, wrenching, grasping, scraping, clutching, covetous, old sinner! Hard and sharp as flint, from which no steel had ever struck out generous fire; secret, and self-contained, and solitary as an oyster. The cold within him froze his old features, nipped his pointed nose, shrivelled his cheek, stiffened his gait; made his eyes red, his thin lips blue; and spoke out shrewdly in his grating voice. A frosty rime was on his head, and on his eyebrows, and his wiry chin. He carried his own low temperature always about with him; he iced his office in the dog-days; and didn't thaw it one degree at Christmas.

External heat and cold had little influence on Scrooge. No warmth could warm, no wintry weather chill him. No wind that blew was bitterer than he, no falling snow was more intent upon its purpose, no pelting rain less open to entreaty.

MODEL · INTERPRET

"Hard and sharp as flint, from which no steel had ever struck out generous fire."

1 Literal: flint is a hard stone; striking it with steel makes sparks for a fire.

2 Figurative: no one has ever struck even a spark of generosity out of Scrooge.

3 Effect: Scrooge seems cold, hard, and impossible to warm.

Model answer: The simile and the image of fire show that generosity cannot be struck out of Scrooge.

Cold runs through the whole paragraph as an extended metaphor: the cold inside Scrooge freezes his face, he “iced his office,” and he never thaws, even at Christmas. Today, calling someone “a Scrooge” means he or she is stingy, which shows how strongly Dickens's character has shaped our language.

★ KEY IDEA

Identify the device, explain the comparison, then explain its effect on meaning or mood.

GET READY

Why might a writer pile up a long list of words instead of choosing just one?

Dickens wrote A Christmas Carol to be read aloud, and later performed it himself in theaters. His sentences have rhythm: he piles up lists, repeats patterns, and repeats sounds. Sound and rhythm help reveal character and mood.

MODEL · HEAR THE LIST

"a squeezing, wrenching, grasping, scraping, clutching, covetous, old sinner!"

1 Six words in a row all describe greed.

2 Most end in -ing and are full of harsh sounds (sq, wr, gr, scr, cl).

3 Effect: the list sounds like grabbing hands that won't let go.

Model answer: The harsh, piled-up list makes Scrooge's greed sound ugly and endless.

MODEL · HEAR THE PATTERN

"No warmth could warm, no wintry weather chill him. No wind that blew was bitterer than he…"

1 Parallelism: "No warmth… no wintry weather… No wind…"

2 Alliteration: warmth, warm, wintry, weather, wind.

Model answer: The repeated "No…" builds the idea that nothing at all can reach Scrooge.

★ KEY IDEA

Lists, repetition, parallelism, and repeated sounds create mood and reveal character.

6	Read the first paragraph of the passage aloud. Copy one place where Dickens repeats a sound or pattern. What effect does it have?	Answers vary, e.g. the -ing list sounds harsh and grasping; “The cold within him froze…, nipped…, shrivelled…, stiffened…” builds a chilling picture.
7	Fred describes Christmas as “a kind, forgiving, charitable, pleasant time.” How does the sound of his list compare with the narrator's list about Scrooge?	Fred's list is soft and warm; the list about Scrooge is harsh. The sounds match their opposite attitudes.

Grade 7 analysis requires several pieces of evidence. Choose evidence from different parts of the text, and introduce each with a phrase that shows where it comes from (Early in the stave… Later, at Fezziwig's party…).

MODEL · BUILD A CLAIM WITH EVIDENCE

Claim: Scrooge's memories begin to soften him.

Why might Dickens have thought a story could change more minds than a report?

READING · INFORMATIONAL TEXT

Why Dickens Wrote A Christmas Carol

An original informational text based on historical accounts

1 Early in 1843, the British government published a report on children working in mines, mills, and workshops. It described children as young as five or six working twelve hours a day. Charles Dickens read it and was horrified. He told a friend he planned to write a pamphlet, an appeal on behalf of "the poor man's child."

2 That autumn he visited a ragged school, a free school run by volunteers for the poorest children in London. He saw children who were hungry, dirty, and had never been taught to read. A few weeks later, speaking to a crowd in Manchester, he argued that education was the best hope for children like these.

3 Dickens never wrote the pamphlet. Instead, he decided that a story would strike a much harder blow, because readers who would ignore a report might be moved by characters they cared about. Within about six weeks he had written *A Christmas Carol*.

4 Dickens also remembered his own childhood. When he was twelve, his father was imprisoned for debt, and Charles was sent to work in a factory, pasting labels on pots of boot polish. Many readers believe that this experience is one reason his story takes the side of poor children so fiercely.

MODEL · INFER

Why did Dickens decide to write a story instead of a pamphlet?

1 Evidence: readers "who would ignore a report might be moved by characters they cared about."

2 Reasoning: people feel more for a person than for a statistic.

Model answer: Dickens believed a story would make readers feel for poor children and act.

★ KEY IDEA

Connect several facts to infer what the author implies but doesn't state.

#	Question	Answer
1	What was a ragged school?	a free school run by volunteers for the poorest children
2	What report did Dickens read in 1843?	a government report on children working in mines, mills, and workshops
3	How long did it take Dickens to write the story?	about six weeks
4	Year of the story	1843
5	Dickens's job at age twelve	pasting labels on pots of boot polish
6	Infer why the ragged school made such a strong impression on Dickens. Cite two details.	The children were hungry and had never learned to read; it reminded him of his own hard childhood.
7	What can you infer about how Dickens felt about education? Cite evidence.	He believed it was the best hope for poor children: he argued this in his Manchester speech.

#	Question	Answer
8	How might Dickens's own childhood have shaped A Christmas Carol? Make two connections.	He worked in a factory as a poor child, as many children in the report did; the story takes the side of poor children like Tiny Tim.
9	Which words in paragraph 4 show the author is careful not to claim too much?	“Many readers believe” / “one reason”

What separates a summary from an analysis?

An analytical paragraph makes a claim, supports it with two or three pieces of evidence, and explains each with reasoning. It ends with a concluding sentence that connects back to the claim.

MODEL · CER PARAGRAPH

How does Dickens present Scrooge in Stave One?

1 Claim: Scrooge is presented as a man whose greed has cut him off from everyone.

2 Evidence 1 + reasoning: “solitary as an oyster.”

3 Evidence 2 + reasoning: his words about the poor.

4 Conclusion.

Model answer: In Stave One, Dickens presents Scrooge as a man whose greed has cut him off from other people. The narrator calls him “solitary as an oyster,” a creature shut tight inside a hard shell. When the gentlemen ask him to help the poor, he answers that if they would rather die, they should “decrease the surplus population,” showing that he sees suffering people as numbers. Dickens creates a character so cold that readers wonder whether anything could ever change him.

★ KEY IDEA

Claim → evidence → reasoning (repeat) → concluding sentence.

What ideas keep coming up in A Christmas Carol so far?

READ IN YOUR READER

A Christmas Carol · Stave Three (first section) · pages 36–46

As you read, think about: What does the Ghost of Christmas Present show Scrooge? How do the Cratchits celebrate with so little?

Grade 7 readers track how a theme develops: how it is introduced, how events and characters complicate it, and how it is resolved. Recurring motifs (cold and warmth, chains, money, light) point to themes.

Possible theme topic	Evidence so far (Staves 1–3)
generosity vs greed	Scrooge refuses to give; Fezziwig and Fred give freely; the Cratchits share a small dinner joyfully
isolation	"solitary as an oyster"; Scrooge alone at school; Belle leaves him
the chance to change	Marley warns Scrooge he still has "a chance and hope"; Scrooge weeps and wishes he had been kinder

MODEL · DEVELOP A THEME STATEMENT

Topic: greed

1 Introduced: Scrooge's coldness and Marley's chain.

2 Repeated: Belle says money has become Scrooge's idol.

3 Complicated: the poor Cratchits, with almost nothing, are happier than rich Scrooge.

Model answer: Theme: Greed cuts people off from the love and joy that make life worth living.

★ KEY IDEA

Track a theme through introduction, repetition, and complication; state it as a full sentence.

Longer informational texts often develop two or more central ideas. Identify each and trace how details develop it.

MODEL · TWO CENTRAL IDEAS

1 Central idea 1: Dickens was moved by the suffering of poor children in 1843 (paragraphs 1–2).

2 Central idea 2: He chose to answer that suffering with a story, shaped by his own childhood (paragraphs 3–4).

2	Which paragraph connects to his childhood?	4
3	Central idea of “Christmas in Dickens's London”	London had great wealth and great poverty, and poor families worked hard to celebrate Christmas.
4	Central idea =	a main idea the author develops
5	Can a text have two?	Yes
6	Identify two central ideas in “Christmas in Dickens's London.” Cite a detail for each.	1) Many Londoners were very poor: one damp room; workhouses. 2) Christmas was becoming a bigger celebration: goose clubs, bakers' ovens, the first Christmas card.
7	How do the two ideas work together?	Even very poor families saved and planned for Christmas, which shows how much the holiday meant, and why Dickens set his story then.
8	Write a one-sentence statement combining both central ideas of “Why Dickens Wrote A Christmas Carol.”	Moved by the suffering of poor children and his own memories, Dickens wrote a story instead of a pamphlet to change readers' hearts.

Why does it matter that A Christmas Carol takes place in a cold, foggy London on Christmas Eve?

Setting can create conflict, limit choices, and reveal character. Dickens's London is full of fog, cold, and poverty, but also of bright shops and warm homes. Christmas is the one time of year when Scrooge's coldness stands out most.

MODEL · ANALYZE INTERACTION

How does the setting shape the story?

1. Time: Christmas Eve, when everyone else is celebrating, makes Scrooge's meanness obvious.
2. Place: the foggy, freezing counting-house matches Scrooge's cold heart, while the Cratchits' small, warm home matches their love.
3. Effect: the contrast between cold and warm places shows what Scrooge is missing.

Model answer: The Christmas setting and the contrast between cold and warm places reveal Scrooge's character and set up his journey.

★ KEY IDEA

Analyze how setting creates conflict, limits choices, and reveals character.

✎ YOUR TURN

2. How is the Cratchits' home different from Scrooge's office?

3. How did London's poverty shape Dickens's purpose?

Answer: He wanted readers to care about the poor people all around them.

4	Setting =	time and place
5	Setting of A Christmas Carol	London, Christmas Eve and Christmas Day, 1840s
6	How does the setting shape two different characters? Use evidence.	Answers vary; e.g. Scrooge's cold counting-house matches his cold heart; the Cratchits make their small home warm and joyful.
7	How would A Christmas Carol change if it took place in July?	Scrooge's refusal to celebrate wouldn't stand out; the ideas of charity, family, and the cold of poverty would lose their force.

How many different Christmases does the Ghost of Christmas Present show Scrooge?

READ IN YOUR READER

A Christmas Carol · Stave Three (second section) · pages 47–54

As you read, think about: Follow each group the Spirit shows Scrooge: the miners, the lighthouse keepers, the sailors, Fred's party, and the two children under the Spirit's robe.

A Christmas Carol follows Scrooge, but the Spirits also show him other people's stories. Each plotline develops separately, but they mirror Scrooge's story and connect to it.

Plotline	Characters	What happens in Stave Three	Connection
The Cratchits	Bob, Mrs. Cratchit, Tiny Tim, and the children	a joyful dinner; Tiny Tim is ill; Bob toasts Scrooge	Scrooge learns that his clerk's son may die
Fred's party	Fred, his wife, and their guests	games, music, and a toast to "Uncle Scrooge"	the family Scrooge refused still welcomes him
Strangers	miners, lighthouse keepers, sailors	people in lonely, hard places still keep Christmas	shows that joy does not depend on money

★ KEY IDEA

Track each plotline separately, then ask how it mirrors or connects to the main character's story.

Why would Dickens give two starving children the names Ignorance and Want?

READING · NOVELLA EXCERPT

The Ghost of Christmas Present, Stave Three (original text, excerpt)

Charles Dickens, A Christmas Carol. Public domain.

"They are Man's," said the Spirit, looking down upon them. "And they cling to me, appealing from their fathers. This boy is Ignorance. This girl is Want. Beware them both, and all of their degree, but most of all beware this boy, for on his brow I see that written which is Doom, unless the writing be erased."

"Have they no refuge or resource?" cried Scrooge.

"Are there no prisons?" said the Spirit, turning on him for the last time with his own words. "Are there no workhouses?"

At the end of Stave Three, the Ghost reveals two children hiding under his robe. Close reading asks: What does it say? How does it say it? Why does it matter?

MODEL · CLOSE READ

"This boy is Ignorance. This girl is Want. Beware them both… but most of all beware this boy."

1. What: the Spirit names the children as symbols of society's problems.
2. How: short, blunt sentences; warning words (beware, Doom).
3. Why: the children belong to all of "Man," so everyone, including Scrooge, is responsible for them.

Model answer: The Ghost turns two children into symbols to warn that ignoring poverty and lack of education will bring disaster.

★ KEY IDEA

What does it say? How does it say it? Why does it matter for character or theme?

✎ YOUR TURN

Answers are shown in color.

1. What does “Want” mean here?

Answer: need; poverty; lack of food and care

2. Why must Scrooge “most of all beware this boy”?

3. Whose words does the Spirit repeat?

Answer: Scrooge's own: “Are there no prisons? Are there no workhouses?”

4	A symbol stands for…	a larger idea

6	Why does the Spirit say the children are “Man’s” and not his own?	They belong to all of humanity; society created them and is responsible for them.
7	How does repeating Scrooge's own words make the moment more powerful?	It forces Scrooge to hear how cruel his words sound when applied to real, suffering children.

GET READY

Why might some people in 1843 have opposed helping poor children?

READING · INFORMATIONAL TEXT

Ignorance and Want in 1843

An original informational text based on historical facts

1 When the Ghost of Christmas Present reveals two starving children named Ignorance and Want, Dickens was not inventing a fantasy. In 1843, thousands of children in London never went to school. Many worked from the age of six or seven, sweeping chimneys, selling matches, or sorting rags. Others had no work and no home at all.

2 Some reformers tried to help. Volunteers opened **ragged schools**, so called because the children who came were dressed in rags. The schools were free and met in whatever rooms could be found, often in the poorest streets. Teachers taught reading, writing, arithmetic, and religion, and some schools gave out bread and clothing.

3 Dickens visited one of these schools in September 1843. He wrote to a wealthy friend, Angela Burdett-Coutts, who gave large sums to charity, describing the crowded room and the children's hunger, and asking her to support the school. He believed that a child who was never taught anything would grow up with no choices except crime or the workhouse.

4 Not everyone agreed. Many comfortable people argued that the poor would only become idle if they were helped, and that prisons and workhouses were enough. Dickens put those very words in Scrooge's mouth, and then had the Ghost throw them back at him.

5 Over the next decades, Britain slowly changed. Laws limited children's working hours, and in 1870 Parliament began creating schools for every child. Dickens did not live to see all of these changes, but his story helped persuade a generation of readers that the poor were not a "surplus population" but neighbors.

MODEL · INFER ACROSS PARAGRAPHS

What can you infer about why Dickens included Ignorance and Want in his story?

1 Paragraph 1: many real children had no school and no home.

2 Paragraph 3: Dickens had just seen a ragged school and believed uneducated children had no future.

3 Paragraph 4: he used his story to answer people who refused to help.

Model answer: Dickens included the two children to make readers face a real problem he had seen himself.

★ KEY IDEA

Connect details from several paragraphs to draw well-supported inferences.

✎ YOUR TURN

Answers are shown in color.

1. Why were ragged schools given that name?

Answer: The children who attended were dressed in rags.

2. Who was Angela Burdett-Coutts?

Answer: a wealthy friend of Dickens who gave to charity

3. What happened in 1870?

Answer: Parliament began creating schools for every child.

Workbook Answer Key · Lesson 2.3

#	Question	Answer
1	Why were ragged schools given that name?	The children who attended were dressed in rags.
2	Who was Angela Burdett-Coutts?	a wealthy friend of Dickens who gave to charity
3	What happened in 1870?	Parliament began creating schools for every child.
4	A reformer...	works to improve society
5	Dickens visited a ragged school in...	September 1843
6	Infer why the author includes the letter to Angela Burdett-Coutts. Cite two details.	To show Dickens acted, not just wrote: he described the children's hunger and asked her to support the school.
7	What can you infer about why the Spirit warns most of all against Ignorance? Use the text and the story.	Dickens believed a child who was never educated would have no choices except crime or the workhouse, so ignorance does the deepest harm.
8	Which sentence best states a central idea? A. Ragged schools met in small rooms. B. Dickens drew on the real suffering of uneducated, poor children to challenge readers to help them. C. Parliament passed a law in 1870.	B. Dickens drew on the real suffering of uneducated, poor children to challenge readers to help them.
9	Do you think Dickens's story could change readers' minds more than a report could? Use one detail from the article and one from the story.	Answers vary.

Integrate quotations instead of dropping them in. Use a lead-in, a short quote, and analysis.

Dropped quote (weak)	Integrated quote (strong)

Each scene has a job: advancing plot, developing character, building theme, or creating mood and suspense. Ask: What would be lost if this scene were removed?

Can the future be changed, or is it already written?

READING · NOVELLA EXCERPT

Scrooge, Stave Four (original text, excerpt)

Charles Dickens, A Christmas Carol. Public domain.

"Men's courses will foreshadow certain ends, to which, if persevered in, they must lead," said Scrooge. "But if the courses be departed from, the ends will change. Say it is thus with what you show me!"

"Spirit!" he cried, tight clutching at its robe, "hear me! I am not the man I was. I will not be the man I must have been but for this intercourse. Why show me this, if I am past all hope!"

MODEL · ANALYZE

"Men's courses will foreshadow certain ends, to which, if persevered in, they must lead. But if the courses be departed from, the ends will change."

1 Metaphor: a person's life is a course, or path, that leads to an end, or destination.

2 Structure: two balanced sentences, the second turning on "But."

3 Connection: Scrooge argues that the future the Spirit shows can still change if he changes his path.

Model answer: Scrooge turns the image of a path into an argument for hope: change the road, and you change where it ends.

★ KEY IDEA

Identify the figurative language, explain it, then connect it to the story's larger meaning.

✎ YOUR TURN

Answers are shown in color.

1. What does “courses” mean here?

Answer: paths; the ways people live their lives

2. What does “I am not the man I was” show?

Answer: Scrooge has already begun to change.

3. What is the speech's larger message?

Answer: The future is not fixed; people can change.

Workbook Answer Key · Lesson 2.6

#	Question	Answer
1	What does “courses” mean here?	paths; the ways people live their lives
2	What does “I am not the man I was” show?	Scrooge has already begun to change.
3	What is the speech's larger message?	The future is not fixed; people can change.
4	foreshadow =	hint at what will happen
5	persevered in =	continued
6	Explain the comparison of a life to a course or path.	Our choices lead us somewhere, as a road leads to a place; a different road leads somewhere else.
7	Why does Scrooge ask this question before looking at the gravestone?	He is afraid of what it says and wants to know whether he can still change his fate.
8	How does this speech connect to Marley's warning in Stave One?	Marley said Scrooge still had “a chance and hope” of escaping his fate; Scrooge now begs for that chance.
9	Rewrite Scrooge's first sentence in modern English.	The way people live leads to certain endings, but if they change how they live, the endings will change.

If you staged the arrival of the last, silent Spirit, how would you make the audience feel Scrooge's fear?

A Christmas Carol has been adapted for the stage and screen hundreds of times; Dickens even performed it himself. Directors make choices about sets, lighting, sound, costumes, and acting. Each choice changes how the audience experiences the text.

READING · INFORMATIONAL TEXT

Two Ways to Stage the Last Spirit

Original descriptions

Production A. The stage goes dark except for one cold spotlight. An actor on hidden stilts, wrapped in a tall black robe and hood, glides slowly toward Scrooge without a sound. The Spirit never speaks; it only points. The audience hears nothing but Scrooge's breathing.

Production B. A film version fills the screen with swirling black shadow. Deep, booming music swells, the Spirit's huge shape looms over the rooftops of London, and computer effects send Scrooge flying through the streets. The scenes move quickly, and some of Scrooge's lines are cut.

MODEL · ANALYZE CHOICES

Compare Productions A and B.

1 A: silent and simple; relies on the actor and the audience's imagination.

2 B: spectacular; overwhelming effects; some lines lost.

3 Effect: A makes the Spirit eerie and close; B makes it huge and terrifying.

Model answer: Each production highlights different parts of the scene.

★ KEY IDEA

Compare what the text says with what the production shows; analyze the effect of each choice.

MODEL · TOPIC SENTENCE

Stave Four

1 Name the scene.

2 State its contribution.

Model answer: In Stave Four, Dickens shows the lonely, unmourned death of a greedy man so that Scrooge, and the reader, can see where his path is leading while there is still time to change it.

GET READY

Which is easier to draw: “a chain” or “greed”? Why?

READ IN YOUR READER

A Christmas Carol · Stave Five · pages 69–74

As you read, think about: How has Scrooge changed? What does he do first, and how do other people react?

Kind	Examples from A Christmas Carol
concrete	chain, crutch, turkey, gravestone, fire
abstract	greed, charity, fear, joy, hope
collective	family, crowd, party, flock
compound	counting-house, door-knocker, schoolboy
proper	Scrooge, London, Camden Town, Tiny Tim

Writers use abstract nouns to name big ideas (themes) and concrete nouns to make those ideas visible. Marley's chain (concrete) stands for the greed and selfishness (abstract) he forged “link by link” in life.

★ KEY IDEA

Concrete nouns can be sensed; abstract nouns name ideas. Writers use concrete nouns to symbolize abstract ones.

✎ YOUR TURN

Answers are shown in color.

1. Concrete or abstract: generosity

Answer: abstract

2. Collective noun for a group of carol singers

Answer: choir

3. What abstract idea does Marley's chain represent?

Answer: greed / selfish choices

Workbook Answer Key · Lesson 2.9

#	Question	Answer
1	Concrete or abstract: generosity	abstract
2	Collective noun for a group of carol singers	choir
3	What abstract idea does Marley's chain represent?	greed / selfish choices
4	Abstract noun example	joy, charity
5	Collective noun example	family, crowd

7	audience	collective
8	churchyard	compound (concrete)
9	Belle	proper
10	loyalty	abstract
11	lantern	concrete
12	flock	collective
13	mercy	abstract
14	In Stave Three the Spirit sees “a crutch without an owner, carefully preserved.” In Stave Five, Tiny Tim does not die. What abstract ideas do the crutch and the chain represent? What does Scrooge's change mean for them?	The chain stands for greed and its punishment; the crutch stands for Tiny Tim's life, need, and the family's love. Scrooge's change breaks the chain and saves Tim.

GET READY

What makes a mystery story hard to put down?

READ IN YOUR READER

Strange Case of Dr. Jekyll and Mr. Hyde · Chapter 1: Story of the Door · pages 15–28

As you read, think about: What story does Mr. Enfield tell? Why does it disturb Mr. Utterson?

Strange Case of Dr. Jekyll and Mr. Hyde (1886) is a Gothic mystery. Stevenson withholds the truth until the very end. Much of the story reaches us secondhand: in Chapter 1, Mr. Enfield tells Mr. Utterson a story within the story, a frame narrative.

Mystery element	In Chapter 1
a puzzle	Why would respectable Dr. Jekyll's name be on a cheque given by the brutal Mr. Hyde?
clues	the door, the cheque, Hyde's strange appearance
an investigator	Mr. Utterson, the lawyer
withheld information	Enfield refuses to name the signer at first

READING · CLASSIC NOVEL EXCERPT

From Chapter 1, "Story of the Door" (original 1886 text)

Robert Louis Stevenson, Strange Case of Dr. Jekyll and Mr. Hyde (1886). Public domain.

Mr. Utterson the lawyer was a man of a rugged countenance that was never lighted by a smile; cold, scanty and embarrassed in discourse; backward in sentiment; lean, long, dusty, dreary and yet somehow lovable.

MODEL · ANALYZE CHARACTERIZATION

What kind of investigator is Utterson?

1 "never lighted by a smile"; "cold, scanty and embarrassed in discourse": reserved, serious.

2 "and yet somehow lovable": loyal, trustworthy.

Model answer: Utterson is a reserved, serious man whom readers can trust to pursue the truth.

★ KEY IDEA

Mysteries withhold information and plant clues; frame narratives filter events through a character's telling.

✎ YOUR TURN

Answers are shown in color.

1. Who tells the story of the door?

Answer: Mr. Enfield

2. What crime does Hyde commit in Enfield's story?

Answer: He tramples a young girl.

3. What is the central puzzle?

Answer: why Jekyll's name is connected to Hyde (on the cheque)

Workbook Answer Key · Lesson 3.1

#	Question	Answer
1	Who tells the story of the door?	Mr. Enfield
2	What crime does Hyde commit in Enfield's story?	He tramples a young girl.
3	What is the central puzzle?	why Jekyll's name is connected to Hyde (on the cheque)

#	Question	Answer
4	A frame narrative is...	a story within a story
5	Gothic fiction has...	dark settings, mystery, dread
6	Explain how the frame narrative affects what readers know about Hyde.	We only know Hyde through Enfield's secondhand account and feelings; it keeps him mysterious.
7	List three clues from Chapter 1 and the questions each raises.	Answers vary: the door (where does it lead?), the cheque (why Jekyll?), Hyde's appearance (what is wrong with him?).
8	Paraphrase Stevenson's description of Utterson.	Utterson had a rough face that never smiled; he was cold, spoke little and awkwardly, didn't show feelings, was thin and dull, yet people loved him.
9	Predict: what do you think connects Jekyll and Hyde? Cite one clue.	Answers vary.

Why might a reader find Hyde more frightening if no one can describe him clearly?

READING · CLASSIC NOVEL EXCERPT

Enfield Describes Hyde, Chapter 1 (original text, excerpt)

"There is something wrong with his appearance; something displeasing, something down-right detestable. I never saw a man I so disliked, and yet I scarce know why."

MODEL · ANALYZE

1 He can't say what is wrong: "I scarce know why."

2 Repeated "something" words build unease.

3 Effect: Hyde is frightening because he cannot be explained.

Which is correct: “Everyone took their seat” or “Everyone took his or her seat”?

Indefinite pronoun	Number	Example
each, everyone, everybody, someone, anyone, nobody, either, neither	singular	Each of the servants knows his or her duties.

all, some, most, none, any	depends on the noun after “of”	Some of the money was missing. Some of the doors were locked.

In formal writing, singular indefinite pronouns take singular verbs. Many style guides now also accept singular they for a person whose gender is unknown; choose one approach and use it consistently. Rewriting with a plural noun often avoids the problem: All of the guests took their seats.

Which sounds more dramatic: “Hyde struck the man” or “The man was struck”?

READING · NEWS WRITING

The Museum Robbery: Two Reports

Original examples

Report A. Last night, a thief broke a window at the city museum, climbed inside, and stole a gold necklace from the Egyptian exhibit. A guard spotted the thief and called the police.

Report B. Last night, a window at the city museum was broken, and a gold necklace was stolen from the Egyptian exhibit. The police were called after a suspicious figure was spotted.

MODEL · COMPARE

Report A vs Report B

1 A (active): a thief broke, climbed, stole; the actor is clear and vivid.

2 B (passive): was broken, was stolen; the actor is hidden.

3 Effect: B is vaguer; useful when the actor is unknown, but less vivid.

Model answer: Active voice is clearer and more direct; passive voice hides or downplays who acted.

- Form passive voice with a form of be + past participle: was stolen, were called.
- Use passive when the actor is unknown or unimportant, or to emphasize the receiver.
- Prefer active voice for clear, lively writing.

★ KEY IDEA

Active: subject acts. Passive: subject receives. Choose voice on purpose.

How can a sentence's grammar make a scene feel mysterious?

READING · MYSTERY

Fog over the City

An original story

1 By ten o'clock the fog had swallowed the city whole. Gas lamps glowed like dim orange moons, and the cobblestones gleamed with damp. Somewhere a church bell struck the hour, its sound muffled as if wrapped in wool.

2 Inspector Hale turned up his collar and listened. A door creaked. Footsteps hurried away. When he reached the alley, it was empty, except for a single silver button lying in a puddle, catching the lamplight.

3 Hale picked it up. It was engraved with two letters, so worn he could barely read them. Someone had left in a hurry. Someone, he suspected, who had very good reasons not to be seen.

MODEL · ANALYZE EFFECTS

"Someone had left in a hurry."

1 Indefinite pronoun "someone": the actor is unknown.

2 Past perfect: the event happened before Hale arrived.

3 Effect: suspense: we only see the aftermath.

Model answer: The grammar hides the culprit and places the action just out of reach.

★ KEY IDEA

Grammar choices (voice, mood, tense, pronouns) create effects like suspense, distance, or urgency.

Craft and Perspective

Word choice and tone, structure and delayed revelation, point of view and purpose, symbolism, and comparing fiction with history, with Strange Case of Dr. Jekyll and Mr. Hyde, Chapters 5–10.

What words would you use to describe a house where something terrible has happened?

READ IN YOUR READER

Strange Case of Dr. Jekyll and Mr. Hyde · Chapters 5–6: Incident of the Letter; Remarkable Incident of Dr. Lanyon · pages 67–85

As you read, think about: What does Guest notice about the handwriting? What happens to Dr. Lanyon?

Stevenson's diction is precise and often dark: words like dreary, sinister, ghastly, loathing. Analyze how specific words build a tone of dread and a mood of suspense.

Word or phrase type	Example effect
dark adjectives	build dread: “dismal,” “ghastly”
weather and light	fog and darkness mirror secrecy
restrained narration	Utterson's calm voice makes horror feel more real
physical reactions	pallor, trembling, and fainting show fear without explaining it

MODEL · ANALYZE DICTION

Lanyon's change in Chapter 6

1 Details: Lanyon looks pale, aged, and frightened; he refuses to speak of Jekyll.

2 Effect: his sudden decline signals that he has seen something terrible.

Model answer: Stevenson uses Lanyon's physical collapse to suggest a horror too great to describe.

★ KEY IDEA

Diction creates tone and mood. Explain how specific words produce the effect.

4	Diction =	word choice
5	Mood =	the reader's feeling
6	Copy three words or phrases from Chapters 5–6 that create a dark mood. Explain each.	Answers vary.
7	How does Stevenson use Lanyon's physical condition instead of direct explanation? Why is this effective?	He shows the shock through appearance and refusal to speak, letting readers imagine something horrible.

GET READY

Why might an author give the reader sealed letters that can't be opened yet?

Stevenson builds his novel from documents: a will, letters, Lanyon's sealed narrative, and Jekyll's statement. Some documents must wait to be opened, which delays the revelation and makes readers impatient for the truth.

Document	Where	Effect on suspense
Jekyll's will	Ch. 2	raises the question of Hyde's hold on Jekyll
Hyde's letter and Jekyll's note	Ch. 5	the handwriting clue
Lanyon's sealed letter	Ch. 6	a secret promised but withheld
Lanyon's narrative and Jekyll's statement	Ch. 9–10	the final revelation

★ KEY IDEA

Documents and delayed revelations structure the mystery and build suspense.

✎ YOUR TURN

2. Why delay the revelation?

Answer: to build suspense and keep the mystery alive

3. Which chapters reveal the truth?

Answer: 9 and 10

4	Delayed revelation =	withholding key information
5	A document in Chapter 5	Hyde's letter / Jekyll's note
6	Why does Stevenson have Utterson promise not to open Lanyon's letter? How does this affect readers?	It delays the truth; readers share Utterson's frustration and curiosity, increasing suspense.
7	How would the novel change if it were told in order by Jekyll from the start?	No mystery; readers would know the secret, losing suspense.

How might the setting of Victorian London have shaped Stevenson's story?

READING · INFORMATIONAL TEXT

Fog and Gaslight: Victorian London

An original informational text

A City of Contrasts

In the 1880s, London was the largest city in the world, home to more than four million people. Its wealthy neighborhoods had grand squares and elegant houses. Only a short walk away, poor families crowded into narrow lanes and dark courtyards.

The Famous Fog

London's fogs were thick, yellow-brown, and sometimes deadly. Coal fires in homes and factories filled the damp air with smoke. On the worst days, people could not see their own hands, and travelers lost their way on familiar streets.

Light in the Darkness

Gas streetlamps lit the main roads at night. Lamplighters walked the streets each evening, lighting lamps one by one. But the light was dim, and alleys and back streets remained in deep shadow.

Respectability and Secrets

Victorian society placed great value on **respectability**, a reputation for proper behavior. Gentlemen were expected to control their emotions and hide any private weaknesses. Many historians believe this pressure to appear perfect is one reason stories about hidden second selves fascinated Victorian readers.

MODEL · ANALYZE SECTIONS

How does the final section connect to the rest?

1 Sections 1–3 describe contrasts, fog, and shadow.

2 Section 4 explains respectability and hidden selves.

3 Together: a city of light and darkness mirrors people with public and private sides.

Model answer: The sections build toward the idea that Victorian London's contrasts mirrored the double lives that fascinated readers.

★ KEY IDEA

Each section contributes; analyze how the sections build the central idea.

✎ YOUR TURN

Answers are shown in color.

1. Why was London's fog so thick?

Answer: coal smoke mixed with damp air

2. What does respectability mean?

Answer: a reputation for proper behavior

3. How does the setting mirror Jekyll and Hyde?

Answer: contrasts of light and dark, public and hidden lives

Workbook Answer Key · Lesson 4.3

#	Question	Answer
1	Why was London's fog so thick?	coal smoke mixed with damp air
2	What does respectability mean?	a reputation for proper behavior
3	How does the setting mirror Jekyll and Hyde?	contrasts of light and dark, public and hidden lives
4	Number of sections	four
5	Population of London in the 1880s	more than four million

#	Question	Answer
6	Explain how each section contributes to the article's central idea.	Contrasts → fog → dim light and shadows → respectability and secrets: London's literal and social darkness explains the appeal of double-life stories.
7	Connect the article to one scene in the novel.	Answers vary, e.g. fog in the Carew murder; Hyde's door in a shabby street near a respectable square.

What clue does handwriting give Utterson in Chapter 5?

READING · INFORMATIONAL TEXT

Handwriting as Evidence

An original informational text

1 When a document's author is in doubt, investigators may call on a **forensic document examiner**, an expert who analyzes handwriting, paper, and ink.

2 No two people write exactly alike. Examiners compare **exemplars**, samples known to be written by a person, with the **questioned document**. They look at letter shapes, spacing, slant, pen pressure, and the way letters connect.

3 A clever forger may copy the shapes of letters but often writes too slowly and carefully. The result can show shaky lines, blunt starts and stops, and unnatural pauses, which examiners call signs of **hesitation**.

4 Handwriting analysis cannot prove guilt by itself, but combined with other evidence it can be powerful. In *Strange Case of Dr. Jekyll and Mr. Hyde*, a clerk's observation about two handwriting samples gives Mr. Utterson a chilling clue.

MODEL · USE CONTEXT

What is a questioned document?

1 Paragraph 2 contrasts it with exemplars (known samples).

2 So a questioned document is one whose author is unknown or disputed.

Model answer: a document whose author is in doubt

★ KEY IDEA

Technical words are often defined by context or contrast. Use them precisely in your own writing.

GET READY

Why does Jekyll slam the window shut in Chapter 7?

READ IN YOUR READER

Strange Case of Dr. Jekyll and Mr. Hyde · Chapters 7–8: Incident at the Window; The Last Night · pages 86–112

As you read, think about: What do Utterson and Enfield see at the window? What do Utterson and Poole find when they break down the door?

The novel's narrator follows Utterson closely. We learn what he learns, when he learns it. Because many readers today already know the twist, they experience dramatic irony: understanding clues that Utterson misreads.

MODEL · ANALYZE

The window scene

1 Utterson sees only Jekyll's face freeze in terror.

2 Readers may suspect a transformation beginning.

3 Effect: horror for readers; confusion for Utterson.

Model answer: The limited point of view keeps Utterson in the dark while readers sense the horror.

★ KEY IDEA

Point of view controls what characters and readers know; gaps create suspense or irony.

✎ YOUR TURN

Answers are shown in color.

1. Whose perspective does the narrator follow?

Answer: Utterson's

2. What is dramatic irony?

Answer: readers knowing more than a character

3. What do they find in Chapter 8?

Answer: Hyde's body (dead), and documents left by Jekyll; Jekyll is gone

Workbook Answer Key · Lesson 4.5

#	Question	Answer
1	Whose perspective does the narrator follow?	Utterson's
2	What is dramatic irony?	readers knowing more than a character
3	What do they find in Chapter 8?	Hyde's body (dead), and documents left by Jekyll; Jekyll is gone
4	Limited third-person follows...	one character
5	Dramatic irony =	readers know more than a character
6	How does the limited point of view build suspense in Chapter 8?	We only know what Utterson and Poole hear and see: strange voices, footsteps, the cabinet door, so the mystery stays unsolved until they break in.
7	Explain a moment of dramatic irony in Chapters 7–8.	Answers vary, e.g. Poole thinks his master has been murdered.
8	If the story were told by Jekyll from the start, what would be lost?	the suspense and mystery

What would Dr. Jekyll say about whether science should have limits?

READING · ARGUMENT

Should Science Have Limits?

An original opinion essay

1 Scientific discoveries have given us vaccines, electricity, and the internet. Some people argue that science should never be restricted, because we cannot know which experiment will lead to the next great breakthrough.

2 I disagree. Science must have limits, especially when experiments involve human beings. History offers painful examples of researchers who harmed people in the name of progress, often people who never agreed to take part.

3 Of course, limits can slow discovery, and rules written by people who don't understand the research may block valuable work. These concerns are real. But careful review by independent experts, who weigh risks and benefits before an experiment begins, protects both the public and the trust that science depends on.

4 Freedom to explore is one of science's greatest strengths. Responsibility is another. A scientist who ignores the second may lose the first.

MODEL · IDENTIFY POSITION AND PURPOSE

"Should Science Have Limits?"

1 Position: “I disagree. Science must have limits.”

2 Purpose: to persuade readers to support independent review of experiments.

3 Reasons: past harm to people; protects public trust.

Model answer: The author argues that science needs limits, especially for experiments on people.

★ KEY IDEA

Find the position (often signaled by I believe, I disagree, must) and the purpose (persuade, inform, explain).

✎ YOUR TURN

Answers are shown in color.

1. What is the author's position?

Answer: Science must have limits, especially for human experiments.

2. What view does the author disagree with?

Answer: that science should never be restricted

3. What solution does the author propose?

Answer: careful review by independent experts

3	What solution does the author propose?	careful review by independent experts
4	Position =	the author's stance
5	Purpose of an argument	to persuade

MODEL · FIND CONCESSION AND REBUTTAL

Paragraph 3 of "Should Science Have Limits?"

1 Counterclaim: limits can slow discovery; rules may block valuable work.

2 Concession: "These concerns are real."

3 Rebuttal: independent expert review weighs risks and protects trust.

Model answer: The author strengthens the argument by admitting valid concerns and then answering them.

Signal phrases
Counterclaim: Some argue… / Critics claim… / It is true that…
Concession: Admittedly… / Of course… / These concerns are real.
Rebuttal: However… / But… / Still, the evidence shows…

Why would Stevenson let Lanyon, a rational scientist, describe the transformation?

READ IN YOUR READER

Strange Case of Dr. Jekyll and Mr. Hyde · Chapter 9: Dr. Lanyon's Narrative · pages 113–128

As you read, think about: What does Lanyon witness? How does it affect him?

Lanyon's narrative is written like testimony. Because he is a skeptical scientist who doubted Jekyll's theories, his shocked account is especially convincing.

MODEL · EVALUATE RELIABILITY

Is Lanyon reliable?

1 He is a respected doctor and skeptic.

2 He records specific details calmly.

3 His shock shows he didn't want to believe it.

Model answer: Yes; his skepticism makes his testimony more believable.

★ KEY IDEA

Consider the narrator's background, motives, and tone when judging reliability.

✎ YOUR TURN

Answers are shown in color.

1. What does Lanyon witness?

Answer: Hyde drinking a potion and transforming into Jekyll

2. Why is a skeptic a good witness?

Answer: He wouldn't believe without proof, so his account is convincing.

3. What happens to Lanyon afterward?

Answer: He is shattered and dies soon after.

Workbook Answer Key · Lesson 4.9

#	Question	Answer

3	What happens to Lanyon afterward?	He is shattered and dies soon after.
4	Testimony =	a formal statement of what someone witnessed
5	Lanyon's profession	doctor / scientist
6	Find two details showing Lanyon tries to stay rational. Then find one detail showing his horror.	Answers vary.
7	Why is it powerful that the transformation is described by Lanyon rather than Jekyll?	An outside skeptical witness makes the impossible believable and shows its horror from outside.

How can sentence length make your heart beat faster?

At a climax, authors often slow time down with detail or speed it up with short, sharp sentences. Long, building sentences create tension; a sudden short sentence delivers shock.

MODEL · ANALYZE PACING

"The house was silent. Wind pressed against the windows, and somewhere upstairs a floorboard creaked, slow and deliberate, as though someone heavy were shifting from one foot to the other, waiting. Then the lights went out."

1 The long middle sentence stretches time with sound details, building tension.

2 The final short sentence arrives suddenly.

3 Effect: the reader's tension breaks into shock.

Model answer: A long, building sentence followed by a short one creates a sudden shock at the climax.

★ KEY IDEA

Long sentences build; short sentences strike. Paragraph breaks control pace.

✎ YOUR TURN

Answers are shown in color.

1. Effect of a one-sentence paragraph

Answer: emphasis, shock, a turning point

2. Effect of detailed slow description at a climax

Technique: delayed revelation

1 Technique: Stevenson delays the truth through sealed documents.

2 Example: Lanyon's letter must not be opened until Jekyll's death.

3 Effect: readers share Utterson's frustration, heightening suspense.

Model answer: Stevenson builds suspense by delaying the truth through sealed documents. When Lanyon gives Utterson a letter that must not be opened until Jekyll's death or disappearance, readers, like Utterson, are forced to wait. This delay makes the final revelation in Chapters 9 and 10 far more shocking.

Did real scientists ever test dangerous ideas on themselves?

READING · INFORMATIONAL TEXT

Scientists Who Experimented on Themselves

An original informational text based on historical facts

The Doctor Who Reached His Own Heart

In 1929, a young German doctor named Werner Forssmann believed a thin tube could be guided through a vein all the way to the heart, a procedure many experts considered deadly. When his supervisors refused permission, Forssmann numbed his own arm, inserted a tube into a vein, and pushed it toward his heart. Then he walked to the X-ray room to photograph the result.

Forssmann's colleagues were not impressed, and he was criticized for his reckless act. Decades later, however, the technique, called cardiac catheterization, became a standard part of medicine. In 1956, Forssmann shared the Nobel Prize in Physiology or Medicine.

The Doctor Who Drank Bacteria

In the early 1980s, Australian doctors Barry Marshall and Robin Warren argued that many stomach ulcers were caused by bacteria, not stress. Other scientists doubted them. In 1984, Marshall drank a culture of the bacteria. Within days he became ill with stomach inflammation, supporting the doctors' claim. Marshall and Warren received the Nobel Prize in 2005.

A Risky Tradition

Self-experimentation has produced important discoveries, but it can also cause serious harm, and its results can be misleading because they involve only one person. Today, research involving people is reviewed by ethics committees designed to protect volunteers, including the scientists themselves.

	Jekyll (fiction)	Forssmann and Marshall (history)
Goal	to separate good and evil	to prove a medical idea
Method	a secret potion	a catheter; drinking bacteria
Result	loses control; destruction	risky but useful discoveries; Nobel Prizes
Shared idea	willingness to take personal risk	willingness to take personal risk

★ KEY IDEA

Compare how fiction and history portray a similar topic; notice what fiction exaggerates or changes for its purpose.

✎ YOUR TURN

Answers are shown in color.

1. What did Forssmann do?

Answer: inserted a tube into his own vein to his heart (1929)

2. What did Marshall do?

Answer: drank bacteria to show they cause stomach illness (1984)

3. What protects research volunteers today?

Answer: ethics committees

Workbook Answer Key · Lesson 4.15

#	Question	Answer
1	What did Forssmann do?	inserted a tube into his own vein to his heart (1929)
2	What did Marshall do?	drank bacteria to show they cause stomach illness (1984)
3	What protects research volunteers today?	ethics committees
4	Self-experimentation =	testing on oneself
5	Nobel year for Marshall and Warren	2005

#	Question	Answer
6	How are Jekyll's and the real doctors' motives different?	Jekyll wanted personal escape/pleasure; the real doctors wanted to prove medical ideas that could help others.
7	Why might Stevenson's story end in disaster while the real stories led to discoveries?	Fiction warns about unchecked ambition and moral danger; the real experiments were narrow and aimed at verifiable knowledge.
8	Does the informational text present self-experimentation as heroic, reckless, or both? Cite evidence.	Both: important discoveries (Nobel) but serious harm and misleading results; ethics committees now protect volunteers.
9	Connect “Should Science Have Limits?” to these texts in one sentence.	Answers vary.

What can Jekyll's story teach us about real science?

A comparative analysis has a thesis that names both texts and the point of comparison, body paragraphs organized point by point, integrated evidence from both texts, and a conclusion about what the comparison reveals.

MODEL · THESIS

Compare Jekyll with Forssmann and Marshall.

1 Name both texts.

2 Point of comparison: risk and responsibility.

Model answer: Both Stevenson's Dr. Jekyll and the real doctors Forssmann and Marshall risked their own bodies for knowledge, but while their experiments advanced medicine, Jekyll's selfish secrecy shows how ambition without responsibility leads to ruin.

GET READY

If you could travel in time, would you go to the past or the future? Why?

READ IN YOUR READER

The Time Machine · Chapter 1: The Inventor · pages 15–26

As you read, think about: What does the Time Traveller explain to his guests? How do they react?

The Time Machine (1895) by H. G. Wells helped invent modern science fiction. Like Jekyll and Hyde, it uses a frame: an unnamed narrator describes the Time Traveller's dinner guests and then retells the Traveller's own story.

READING · CLASSIC NOVEL EXCERPT

From The Time Machine, Chapter 1 (original 1895 text)

H. G. Wells, The Time Machine (1895). Public domain.

The Time Traveller (for so it will be convenient to speak of him) was expounding a recondite matter to us. His grey eyes shone and twinkled, and his usually pale face was flushed and animated.

MODEL · ANALYZE THE OPENING

What do we learn in the first two sentences?

1 The narrator doesn't name the Time Traveller.

2 “Recondite” means obscure or difficult.

3 Shining eyes and flushed face show excitement.

Model answer: The Traveller is an enthusiastic, brilliant scientist explaining a difficult idea to his guests.

★ KEY IDEA

Science fiction imagines scientific possibilities; a frame narrator filters the Traveller's story through a listener.

✎ YOUR TURN

Answers are shown in color.

1. What does “recondite” mean?

Answer: obscure, difficult to understand

2. Why might the narrator not name the Time Traveller?

Answer: to keep him mysterious / focus on his role

3. How do the guests react to his ideas?

Answer: skeptical, doubtful

Workbook Answer Key · Lesson 5.1

#	Question	Answer
1	What does “recondite” mean?	obscure, difficult to understand
2	Why might the narrator not name the Time Traveller?	to keep him mysterious / focus on his role
3	How do the guests react to his ideas?	skeptical, doubtful
4	Author of The Time Machine	H. G. Wells
5	Year published	1895
6	What evidence does the Time Traveller give for a fourth dimension? How do the guests respond?	Answers vary; he argues time is a dimension like length, width, height; the guests are doubtful.
7	Compare the frame narrative here with Jekyll and Hyde's.	Both filter the story through observers and delay the main character's own account.
8	Which guest would you be: believer or skeptic? Why?	Answers vary.

What do “shone and twinkled” and “flushed and animated” tell you about the Time Traveller?

Modifiers do the heavy lifting in description. Ask: Which modifiers stand out? What image or feeling do they create? How do they shape the reader's view of the character or scene?

MODEL · ANALYZE WELLS'S MODIFIERS

“His grey eyes shone and twinkled, and his usually pale face was flushed and animated.”

1 “usually pale”: the adverb tells us this is unusual excitement.

2 “flushed and animated”: pairs of adjectives show energy.

3 “shone and twinkled”: verbs pair with light imagery.

Model answer: Wells's modifiers show a normally quiet scientist made radiant by excitement about his idea.

★ KEY IDEA

Analyze specific modifiers: what image, what feeling, what effect on the reader.

Is the Time Machine “more faster” than a train?

READ IN YOUR READER

The Time Machine · Chapter 2: The Machine · pages 27–35

As you read, think about: What happens to the small model machine? How do the guests explain it?

Rule	Comparative	Superlative
one syllable: -er, -est	faster	fastest
most two+ syllables: more, most	more careful	most careful
two syllables ending in -y: -ier, -iest	happier	happiest
irregular good/well	better	best
irregular bad/badly	worse	worst
irregular many/much	more	most

Fewer is for things you can count (fewer guests); less is for amounts you can't count (less time). Never double up: more faster is incorrect.

Comparative for two, superlative for three or more; no double comparisons; fewer for countable, less for uncountable.

GET READY

How would you explain the "fourth dimension" to a ten-year-old?

READING · SCIENCE TEXT

What Is the Fourth Dimension?

An original informational text

1 We usually describe space with three **dimensions**: length, width, and height. A shoebox, for example, is a certain number of inches long, wide, and tall. To find any point inside it, you need exactly three measurements.

2 But objects also exist in **time**. A shoebox that sits on a shelf for ten years has a past and a future as well as a size. Scientists and writers have long wondered whether time might be thought of as a fourth dimension, one that we move through steadily in one direction.

3 In 1895, H. G. Wells imagined a machine that could travel along this fourth dimension as easily as a train travels along a track. Ten years later, the physicist Albert Einstein published his theory of special relativity, which treats space and time as closely connected, and which soon led scientists to describe the universe as four-dimensional "spacetime."

4 Einstein's work showed that time is not the same for everyone: a clock moving very fast ticks more slowly than one at rest. This effect is tiny at everyday speeds but measurable. Satellites in the GPS system must correct their clocks for it, or the maps on our phones would quickly become inaccurate.

MODEL · ANALYZE PRECISION

"a clock moving very fast ticks more slowly than one at rest"

1 Comparative "more slowly" compares two clocks precisely.

2 "very fast" and "at rest" define the conditions.

Model answer: Precise modifiers make a surprising scientific claim clear and specific.

★ KEY IDEA

Scientific writers use precise modifiers and comparisons to explain complex ideas clearly.

✎ YOUR TURN

Answers are shown in color.

1. What are the three spatial dimensions?

Answer: length, width, height

2. Who published the theory of special relativity, and when?

Answer: Albert Einstein, 1905

3. Why must GPS correct its clocks?

Answer: Time passes differently for fast-moving satellites; maps would become inaccurate.

Workbook Answer Key · Lesson 5.8

#	Question	Answer
1	What are the three spatial dimensions?	length, width, height
2	Who published the theory of special relativity, and when?	Albert Einstein, 1905
3	Why must GPS correct its clocks?	Time passes differently for fast-moving satellites; maps would become inaccurate.
4	Dimension =	a measurable extent
5	Spacetime combines...	space and time
6	How does the shoebox example help explain dimensions?	A familiar object shows three measurements locate any point, and its existence over time suggests a fourth.
7	How does the passage connect Wells's fiction to real science?	Wells imagined time as a dimension; Einstein's theory later treated spacetime as four-dimensional.

What does “Oh!” add to a character's line?

Interjections show emotion. Strong ones take an exclamation point; mild ones take a comma: Wow! It worked. / Well, I suppose so. Use them sparingly in formal writing; they're most at home in dialogue.

READING · SCIENCE FICTION

The First Jump

An original science-fiction story

1 Mara gripped the brass lever with both hands. The machine hummed softly, then louder, until the whole laboratory trembled. She took a long breath and pushed.

2 Instantly, the room dissolved. Sunlight and darkness flickered across the walls faster than she could blink, day and night racing like the pages of a book flipped by an impatient thumb. The plant on the windowsill shot upward, bloomed, withered, and crumbled into dust. Outside, buildings rose like mushrooms after rain, then sagged, then vanished.

3 Her stomach lurched. Wow! she thought, half terrified and half thrilled. She pulled the lever back, gently, carefully, and the flickering slowed to a dizzy blur.

MODEL · ANALYZE AN INTERJECTION

“Wow! she thought, half terrified and half thrilled.”

1 “Wow!” bursts with sudden emotion.

2 The phrase “half terrified and half thrilled” explains the mixed feeling.

GET READY

Would a world with no work, no war, and no disease be perfect?

READ IN YOUR READER

The Time Machine · Chapters 5–6: In the Golden Age; The Sunset · pages 58–80

As you read, think about: What are the Eloi like? What does the Traveller first conclude about their world?

READING · INFORMATIONAL TEXT

Utopias and Dystopias

An original informational text

1 A **utopia** is an imagined perfect society, where everyone is happy and no one suffers. The word was coined in 1516 by the English writer Thomas More, who combined Greek roots meaning "no place," a sly hint that such a perfect world may not exist.

2 A **dystopia** is the opposite: an imagined society in which something has gone terribly wrong, often hidden behind a surface that looks peaceful or orderly. Dystopian stories usually exaggerate a problem in the writer's own time to warn readers about where it might lead.

3 When the Time Traveller first arrives in the year 802,701, he believes he has found a utopia. The Eloi live in a garden-like world without work, war, or disease. But as he explores, he discovers that the beautiful surface hides a disturbing truth. Many readers see *The Time Machine* as an early dystopian warning about the growing divide between the wealthy and the working poor in Victorian England.

MODEL · ANALYZE THE FIRST IMPRESSION

What does the Traveller first believe?

1 He sees gardens, peace, and no labor.

2 He concludes humanity has achieved an easy, comfortable life.

Model answer: He believes the future is a kind of utopia, though readers sense something is missing.

★ KEY IDEA

Utopias and dystopias comment on the author's own time. Look beneath the surface.

GET READY

Why might an author follow a long sentence with a very short one?

READING · DESCRIPTIVE WRITING

The Lighthouse at Dawn

An original passage

1 The storm ended. Gray light crept over the water, and the waves, which had roared all night, settled into a slow, tired rhythm. Because the beam had stayed lit through the darkness, every boat had found the harbor.

2 Exhausted but proud, the keeper climbed down the tower. She had not slept, she had not eaten, and she had not once doubted that the light mattered.

MODEL · ANALYZE

"The storm ended."

1 Simple, three words, the first sentence.

2 Effect: a sudden calm after the chaos; emphasis on relief.

Model answer: The short sentence enacts the sudden stillness.

MODEL · ANALYZE REPETITION

"She had not slept, she had not eaten, and she had not once doubted…"

1 Compound sentence with repeated structure.

2 Builds to the most important clause.

Model answer: The repetition builds to a climax: her faith in the light.

★ KEY IDEA

Short sentences emphasize; long sentences build; repeated structures create rhythm and climax.

What does a good scientist do when the evidence doesn't fit the theory?

READ IN YOUR READER

The Time Machine · Chapters 7–8: A Sudden Shock; Explanation · pages 81–114

As you read, think about: What happens to the machine? What new creatures does the Traveller glimpse? How does his explanation change?

The Traveller thinks like a scientist. He forms a hypothesis about the future, then revises it when new evidence appears. Tracking these revisions shows how Wells builds suspense and develops theme.

Evidence	Traveller's explanation
peaceful gardens, no labor (Ch. 5–6)	humanity has reached a comfortable, easy life
machine stolen; strange wells; pale creatures at night (Ch. 7–8)	another species lives underground
Morlocks' behavior (later)	the two species descend from divided social classes

Why might the Eloi live above ground and the Morlocks below?

READ IN YOUR READER

The Time Machine · Chapters 9–10: Morlocks; Night · pages 115–140

As you read, think about: What does the Traveller discover underground? What is the relationship between the Eloi and the Morlocks?

The Traveller concludes that the Eloi descended from the leisured upper class and the Morlocks from the laboring class who worked underground. Over time, the divide became so extreme that humanity split into two species. Many readers see this as Wells's social commentary on class inequality in Victorian England.

Story element	May represent
Eloi above ground in gardens	the wealthy who don't work
Morlocks underground with machines	industrial workers
Morlocks preying on Eloi	the danger of extreme inequality
Eloi helplessness	comfort without effort leading to weakness

The Harlem Renaissance

An original informational text

1 In the 1920s and early 1930s, the New York City neighborhood of Harlem became the center of an extraordinary flowering of African American art, music, literature, and ideas. This movement is now called the **Harlem Renaissance**. *Renaissance* means "rebirth."

2 Writers such as Langston Hughes, Zora Neale Hurston, Claude McKay, Countee Cullen, and Georgia Douglas Johnson published poems, stories, and novels that celebrated Black life and challenged racism. Musicians such as Duke Ellington and Louis Armstrong helped make jazz one of the most important art forms in America. Painters such as Aaron Douglas created bold images inspired by African art and modern design.

3 The movement grew out of the Great Migration, as hundreds of thousands of Black Southerners moved to Northern cities in search of opportunity. In Harlem, writers, thinkers, and artists found one another, and magazines and newspapers gave them places to publish.

4 The Harlem Renaissance did not end racism or segregation. But it changed how many Americans saw Black artists and how Black Americans expressed their own identity, and its influence can still be heard and read today.

READING · INFORMATIONAL TEXT

A Note on Historical Language

An original note for readers

1 Texts from the early 1900s, including titles such as *The New Negro*, use the word *Negro*. At that time, it was the respectful, standard term, and Black writers and organizations used it themselves; it was often capitalized as a sign of dignity. Today it is considered outdated, and most people say *Black* or *African American*.

2 When you quote or name historical works, use their original titles and words exactly. When you write in your own voice, use current, respectful terms. Understanding why language changes is part of understanding history.

★ KEY IDEA

Understand the historical context before analyzing texts; quote historical language accurately and write in current, respectful terms.

READING · POEM

We Wear the Mask

Paul Laurence Dunbar (1895). Public domain.

We wear the mask that grins and lies,
It hides our cheeks and shades our eyes,—
This debt we pay to human guile;
With torn and bleeding hearts we smile,
And mouth with myriad subtleties.

Why should the world be over-wise,
In counting all our tears and sighs?
Nay, let them only see us, while
We wear the mask.

We smile, but, O great Christ, we cry
To thee from tortured souls arise.
We sing, but oh the clay is vile
Beneath our feet, and long the mile;
But let the world dream otherwise,
We wear the mask!

MODEL · ANALYZE THE EXTENDED METAPHOR

What is "the mask"?

1 Literal: a face covering.

2 Figurative: the cheerful appearance Black Americans were forced to show to survive racism.

3 Evidence: "grins and lies," "torn and bleeding hearts we smile."

Model answer: The mask is an extended metaphor for hiding pain behind a smile in a hostile society.

Dunbar uses the rondeau, a strict European form, with the refrain "We wear the mask." Some readers see the controlled form itself as another mask over intense emotion.

★ KEY IDEA

Analyze extended metaphors, refrains, and form to understand a poem's meaning.

✎ YOUR TURN

Answers are shown in color.

1. What does "guile" mean?

Answer: deceit, trickery

2. What is the refrain?

Answer: "We wear the mask"

3. Why does the speaker say the world should not be "over-wise"?

Answer: The world shouldn't see their suffering; they choose to hide it.

#	Question	Answer
1	What does “guile” mean?	deceit, trickery
2	What is the refrain?	“We wear the mask”
3	Why does the speaker say the world should not be “over-wise”?	The world shouldn't see their suffering; they choose to hide it.
4	A refrain is...	a repeated line
5	Year the poem was published	1895
6	Identify two contrasts in the poem (outside vs inside). Explain their effect.	smile/torn and bleeding hearts; sing/clay is vile: shows the gap between appearance and suffering.
7	How does the final refrain (with an exclamation point) differ from the earlier one?	It sounds more forceful and defiant.
8	State the poem's theme.	People facing oppression may hide their pain to survive; appearances can conceal deep suffering.
9	Connect this poem to the theme of duality from Jekyll and Hyde. How are the ideas similar and different?	Both involve a hidden self; Dunbar's mask is imposed by oppression, while Jekyll chose to split himself.

Can two accurate sources give different impressions of the same person?

READING · SOURCE A

Source A: A Voice Ahead of His Time

An original informational text

Paul Laurence Dunbar (1872–1906), the son of formerly enslaved parents, became one of the first African American poets to win national fame. Though he is often remembered for poems written in dialect, much of his most powerful work, such as "We Wear the Mask" and "Sympathy," is written in standard English and expresses the pain of living under racism. Many Harlem Renaissance writers saw Dunbar as an important forerunner.

READING · SOURCE B

Source B: Fame and Its Limits

An original informational text

During his lifetime, Paul Laurence Dunbar's popularity with white audiences rested largely on his dialect poems, which some readers enjoyed as humorous portraits of plantation life. Dunbar himself was frustrated that critics praised these poems while overlooking his serious work. Some later writers criticized dialect poetry for reinforcing stereotypes, while others argued that Dunbar used it with skill and affection for Black speech.

	Source A	Source B
Focus	Dunbar's serious standard-English poems	his popularity and the dialect poems
Interpretation	a pioneering, powerful voice	a poet whose fame was limited by audience expectations
Shared facts	Dunbar became famous; wrote dialect and standard poems	Dunbar became famous; wrote dialect and standard poems

★ KEY IDEA

Accurate sources can differ in focus and interpretation; compare what each emphasizes and why.

5	Dunbar's lifespan	1872–1906
6	What fact do both sources share?	Dunbar wrote both dialect and standard-English poems and became famous.
7	How does each author shape the reader's view of Dunbar?	A presents him as a powerful pioneer; B presents his fame as complicated and limited by audience expectations.
8	Why is it valuable to read both sources?	Together they give a fuller, more balanced picture.
9	Which source would you cite to argue Dunbar was a forerunner of the Harlem Renaissance? Why?	Source A; it directly states Harlem writers saw him as a forerunner.

READING · INFORMATIONAL TEXT

The Great Migration

An original informational text based on historical facts

1 Between about 1910 and 1970, roughly six million African Americans left the rural South and moved to cities in the North, Midwest, and West. Historians call this movement the **Great Migration**. In its first wave, from about 1910 to 1940, more than a million and a half people made the journey.

2 People left for many reasons. In the South, Jim Crow laws enforced segregation and denied Black citizens the right to vote. Violence, including lynching, terrorized communities. Many families worked as sharecroppers, renting land and paying with a share of their crops, a system that often kept them in debt. Around 1915, an insect called the boll weevil destroyed cotton crops across the region.

3 At the same time, Northern cities offered new possibilities. When World War I began, factories needed workers, and immigration from Europe slowed. Black newspapers such as the *Chicago Defender* published job listings and encouraged readers to come north.

4 Life in the North was not free of racism. Migrants faced discrimination in housing and jobs, and some cities saw violent attacks. Still, many found better wages, better schools for their children, and the chance to vote. In neighborhoods like Harlem in New York and the South Side of Chicago, new communities formed, and their energy helped fuel the Harlem Renaissance.

Push factors (South)	Pull factors (North)
Jim Crow segregation; denied voting	factory jobs (World War I)
violence and lynching	better wages
sharecropping debt	better schools; right to vote
boll weevil destroyed cotton	Black newspapers encouraging migration

★ KEY IDEA

Historical movements have multiple causes (push and pull) and multiple effects.

Charles S. Johnson: Building a Movement

An original informational text based on historical facts

1 Charles S. Johnson was a sociologist, a scientist who studies how societies work. In 1923 he became the founding editor of *Opportunity*, the magazine of the National Urban League. Johnson believed that art and literature could change how Americans thought about race, and he used *Opportunity* to publish young Black writers and to award prizes for their work.

2 In 1924, Johnson organized a dinner at the Civic Club in New York, bringing together Black writers and white editors and publishers. Many historians see this event as a turning point: within a year, major magazines and publishing houses were seeking out Black writers. Johnson later became the first Black president of Fisk University, in 1946.

MODEL · EVALUATE A CLAIM

Claim: Charles S. Johnson helped launch the Harlem Renaissance.

1 Evidence 1: founded and edited Opportunity; published young writers; gave prizes. (relevant)

2 Evidence 2: organized the 1924 Civic Club dinner; publishers sought Black writers within a year. (relevant, specific)

3 Reasoning: connecting writers to publishers expanded their audience. (sound)

Model answer: The claim is well supported by relevant, specific evidence and sound reasoning.

Strong evidence	Weak evidence
specific facts, dates, statistics	vague generalizations
expert sources	unsupported opinions
relevant to the claim	off-topic details
enough to convince	a single anecdote

★ KEY IDEA

Evaluate relevance, sufficiency, and reasoning; watch for vague or unsupported evidence.

✎ YOUR TURN

Answer: Opportunity

2. Why was the Civic Club dinner important?

Answer: It connected Black writers with white editors and publishers.

4	Relevant =	connected to the claim
5	Sufficient =	enough to convince
6	Is the claim that Johnson helped launch the movement well supported? Explain using the criteria.	Yes; specific relevant facts (Opportunity, prizes, 1924 dinner, publishers' interest) and sound reasoning.

#	Question	Answer
7	What additional evidence would make the claim even stronger?	e.g. names of writers whose careers began through Opportunity; publishing data after 1924

READ IN YOUR READER

The Genius of the Harlem Renaissance · Harlem, the Black press, and J. A. Rogers · pages 8–9

As you read, think about: What role did newspapers and magazines play? What did J. A. Rogers write about?

READING · INFORMATIONAL TEXT

The Black Press

An original informational text based on historical facts

1 In the early twentieth century, mainstream newspapers often ignored or misrepresented Black communities. In response, Black journalists built their own press.

2 The *Chicago Defender*, founded by Robert S. Abbott in 1905, became one of the most widely read Black newspapers in the country. Railroad porters carried copies south, where they were passed from hand to hand. *The Crisis*, the magazine of the NAACP edited by W. E. B. Du Bois, began in 1910 and published essays, news, and poetry, including early work by Langston Hughes.

3 Journalists such as J. A. Rogers, a Jamaican-born writer who wrote for the *Pittsburgh Courier*, researched and published the achievements of people of African descent throughout history, challenging claims that Black people had no history worth studying.

4 The Black press informed readers, organized communities, and gave Harlem Renaissance writers a place to be heard. Without it, the movement might never have reached a national audience.

MODEL · TRACE IDEAS THROUGH INDIVIDUALS

How do the individuals develop the central idea?

1 Abbott: built a national newspaper that spread news and encouraged migration.

2 Du Bois: published essays and poetry, including Hughes.

3 Rogers: researched and published Black history.

Model answer: Each individual shows a different way the Black press gave Black Americans a voice.

★ KEY IDEA

Trace how key individuals and events develop central ideas across a long text.

Is changing a few words in someone's sentence enough to make it yours?

When you use a source: quote exact words in quotation marks, or paraphrase completely in your own words and sentence structure. Either way, cite the source.

	Example
Original	"The Black press informed readers, organized communities, and gave Harlem Renaissance writers a place to be heard."
Plagiarism (patchwriting)	The Black press informed readers, organized people, and gave writers a place to be heard.
Paraphrase + citation	By publishing news and new writing, Black newspapers built communities and helped writers find readers ("The Black Press").
Quotation + citation	One historian notes that the Black press gave writers "a place to be heard" ("The Black Press").

For a works cited list, include the author (if known), title, publication, and date. Example: "The Black Press." Grade 7 ELA Textbook, VenvLearning, 2027.

The Genius of the Harlem Renaissance · The New Negro: Locke and Kellogg · pages 10–12

As you read, think about: What did Locke argue? Why was the book important?

READING · INFORMATIONAL TEXT

Alain Locke and The New Negro

An original informational text based on historical facts

1 In March 1925, the magazine *Survey Graphic*, edited by Paul Kellogg, published a special issue devoted to Harlem. Its guest editor was Alain Locke, a philosopher at Howard University and the first African American Rhodes Scholar.

2 Later that year, Locke expanded the issue into a book, *The New Negro: An Interpretation*. It gathered essays, fiction, poetry, and art by many of the movement's leading figures.

3 In his essays, Locke argued that a new spirit of pride, self-respect, and creativity was rising among Black Americans, especially young people in cities. He believed that through art and literature, Black Americans could define themselves rather than be defined by others' stereotypes.

4 Not everyone agreed with Locke's emphasis on art. Some leaders argued that political and economic action, such as fighting for voting rights and better jobs, mattered more. The debate itself shows how many voices the Harlem Renaissance included.

MODEL · TRACE THE ARGUMENT

Locke's claim

1 Claim: a new spirit of pride and creativity was rising among Black Americans.

2 Reasoning: through art, Black Americans could define themselves instead of being defined by stereotypes.

Idea: Art expressed truths hidden behind "the mask."

1 Topic sentence.

2 Source 1: Dunbar's poem: "With torn and bleeding hearts we smile."

3 Source 2: Locke argued art let Black Americans define themselves.

4 Analysis connecting both.

Model answer: Harlem Renaissance artists used their work to reveal truths that had long been hidden. Decades earlier, Paul Laurence Dunbar described smiling "with torn and bleeding hearts," capturing the pain behind a forced appearance. Alain Locke later argued that through art, Black Americans could "define themselves" rather than be defined by stereotypes ("Alain Locke and The New Negro"). Together, these voices show art moving from hiding pain to claiming identity.

1	What does “The Negro Speaks of Rivers” connect Black Americans to?	ancient rivers such as the Euphrates, the Congo, and the Nile; a long history
2	Why did Hughes use blues and jazz rhythms?	so his poems sounded like Harlem's music and reflected ordinary people's lives

4	How did Hughes respond? Cite the source.	In “The Negro Artist and the Racial Mountain” he argued artists should express themselves freely and honestly (Source B).
5	How do the two sources shape their presentation of Hughes differently?	A celebrates his achievements and goals; B focuses on controversy and his defense.

Why might the open doors of the sphinx be a bad sign?

READ IN YOUR READER

The Time Machine · Chapter 13: The Trap of the White Sphinx · pages 15–169

As you read, think about: Why are the sphinx's doors open? How does the Traveller escape?

The climax brings the central conflict, the Traveller vs the Morlocks and his struggle to recover the machine, to its highest point. Wells uses darkness, confinement, and physical struggle to make it intense.

MODEL · ANALYZE THE CLIMAX

Chapter 13

1 Setup: the doors are open; the machine is inside.

2 Twist: it's a trap; the doors close.

3 Struggle: in darkness, with no matches that will light, he fights off the Morlocks.

4 Resolution: he escapes on the machine.

Model answer: Wells builds tension through false hope, darkness, and close combat, then resolves it with a narrow escape.

GET READY

If a friend told you they had traveled in time, what proof would you want?

READ IN YOUR READER

The Time Machine · Chapter 15 and After the Story · pages 15–192

As you read, think about: How do the guests react to the story? What evidence does the Traveller offer?

READING · INFORMATIONAL TEXT

Evidence and Belief

An original informational commentary

1 When the Time Traveller finishes his story, most of his guests do not believe him. The Medical Man examines the strange white flowers the Traveller brought back and admits he cannot identify them, yet he still doubts the tale. The Editor jokes that it is a pity the Traveller is not a writer of stories.

2 Their reaction raises an old question: what kind of evidence is enough to believe something extraordinary? Many scientists follow a principle often summed up as “extraordinary claims require extraordinary evidence.” Two unusual flowers and a battered machine are intriguing, but they are not proof.

3 Yet the narrator is not so sure. He returns the next day and sees the Traveller preparing to leave again, carrying a small camera and a knapsack, perhaps to bring back the proof his friends demanded.

★ KEY IDEA

Compare how characters weigh evidence; notice how the narrator's view differs from the skeptics'.

✎ YOUR TURN

Answers are shown in color.

1. What evidence does the Traveller show?

Answer: strange white flowers (and the battered machine)

2. How does the Editor respond to the story?

Answer: He jokes that it's a pity the Traveller isn't a writer of stories (he treats it as fiction).

3. How does the narrator differ from the other guests?

Answer: He is less sure it's a lie; he returns the next day.

Workbook Answer Key · Lesson 8.9

#	Question	Answer
1	What evidence does the Traveller show?	strange white flowers (and the battered machine)
2	How does the Editor respond to the story?	He jokes that it's a pity the Traveller isn't a writer of stories (he treats it as fiction).
3	How does the narrator differ from the other guests?	He is less sure it's a lie; he returns the next day.
4	Skeptic =	one who doubts without evidence
5	What did Weena give him?	flowers
6	Is the guests' skepticism reasonable? Use the principle in the passage.	Yes, partly: extraordinary claims require extraordinary evidence, and flowers aren't proof; but they also ignore puzzling evidence.
7	Why does Wells end with the narrator's uncertainty instead of clear proof?	It leaves readers to decide, preserving mystery and making them weigh the evidence too.

Why is it “beginning” but “opening”?

Rule	Examples
Double the final consonant (one-syllable or stressed last syllable, short vowel + one consonant) before a vowel suffix	stop → stopped; begin → beginning; but open → opening (stress not on last syllable)
Drop silent e before a vowel suffix; keep it before a consonant suffix	hope → hoping; hope → hopeful
Change y to i (consonant + y) except before -ing	carry → carried; carry → carrying
Adding a prefix doesn't change the base spelling	mis + spell → misspell; un + necessary → unnecessary
-able vs -ible: -able usually follows a complete word	comfortable, readable vs visible, credible

READING · INFORMATIONAL TEXT

Langston Hughes: Poet of the People

An original informational text

1 Langston Hughes (1901–1967) was one of the most important voices of the Harlem Renaissance. He grew up mostly in the Midwest, and as a young man he worked many jobs, including as a sailor and a busboy, while he wrote poetry. His first book of poems, *The Weary Blues*, appeared in 1926.

2 Hughes wanted his poems to sound like the people he knew. He borrowed the rhythms of jazz and the blues, repeated lines the way a singer repeats a chorus, and used everyday words instead of fancy ones. His tone could be proud, playful, sorrowful, or defiant, sometimes all in a single poem.

3 Some critics of his time thought that poetry should be formal and elevated. Hughes disagreed. He believed that the lives, speech, and music of ordinary Black Americans were worthy subjects for art, and generations of later writers followed his lead.

Style element	What to look for	Possible effect
rhythm	a steady beat; lines that swing like a song	musical, energetic
repetition / refrain	words or lines that return	emphasis; a chorus feeling
diction	everyday or formal words	conversational or elevated
line length	short, broken lines or long flowing ones	pauses, emphasis, speed

★ KEY IDEA

Style is the sum of a writer's choices: rhythm, repetition, diction, and line shape. Name the choice, then explain its effect.

How might a poet in 1895 and a poet in 1925 write differently about the same struggle?

We Wear the Mask

Paul Laurence Dunbar (1895). Public domain.

We wear the mask that grins and lies,
It hides our cheeks and shades our eyes,—
This debt we pay to human guile;
With torn and bleeding hearts we smile,
And mouth with myriad subtleties.

Why should the world be over-wise,
In counting all our tears and sighs?
Nay, let them only see us, while
We wear the mask.

We smile, but, O great Christ, we cry
To thee from tortured souls arise.
We sing, but oh the clay is vile
Beneath our feet, and long the mile;
But let the world dream otherwise,
We wear the mask!

Dunbar wrote “We Wear the Mask” in 1895 using a formal rhyme scheme, elevated diction, and a refrain. Thirty years later, Hughes often wrote in free or blues-shaped verse with everyday speech. Both poets address the experience of Black Americans facing racism, but their tones and styles differ.

Georgia Douglas Johnson and the S Street Salon

An original informational text based on historical facts

1 Georgia Douglas Johnson (1880–1966) was a poet, playwright, and teacher who lived in Washington, D.C. Her first book of poems, *The Heart of a Woman*, was published in 1918, and she went on to publish several more collections and to write many plays.

2 Johnson is also remembered as a host. For years, on Saturday evenings, writers and artists gathered at her home on S Street to read their work aloud, trade ideas, and encourage one another. Young writers such as Langston Hughes and Jean Toomer were among the visitors. As a result, her home became one of the meeting places that connected the Harlem Renaissance to Washington.

3 In contrast to some writers who became famous quickly, Johnson spent much of her life balancing her writing with work and family. Nevertheless, she kept writing, and her support for other artists helped the movement grow.

READING · INFORMATIONAL TEXT

Elise Johnson McDougald

An original informational text based on historical facts

1 Elise Johnson McDougald (1885–1971) was an educator and writer in New York City. She worked to improve schools and job opportunities for Black children and women, and she became one of the first Black women to serve as a principal in the city's public schools.

2 Her essay "The Task of Negro Womanhood" appeared in *The New Negro* (1925), the influential collection edited by Alain Locke. In it, she describes the many kinds of work Black women were doing in Harlem, from homes and factories to offices and professions, and argues that they faced the double burden of racism and sexism. She supports her claims with observations of real working lives rather than with stereotypes.

Remember the Unit 7 note on historical language: use the original title when you name McDougald's essay, and current terms when you write in your own voice.
