Grade 7 - Khan Primary Curriculum: Printable Gap Assessments

Khan Academy is the primary source for Math and core ELA. Use its named units in course order within the calendar pacing. Grade 7 Science and early World History use appropriate Khan unit selections with required gap materials. Grade 4 Science, Mississippi/regional studies, Spanish, composition, and hands-on work require the listed gap curriculum. Friday weeks 1-3: Khan quiz or teacher-assigned exercise checks plus the printable gap quiz. Friday week 4: completed-unit Khan tests plus comprehensive printable gap assessment. Record first-attempt scores before retakes; keep Khan mastery progress separately. Assign these items in the existing Khan teacher accounts; links on VenvLearning do not create assignments or sync scores. Advance only after sufficient practice; unfinished units carry forward. Printed original assessment books are archived and no longer the current sequence.

Grade 7 · Module 1 Week 1 Friday gap quiz

Scheduled: 2026-10-16 | Required writing, hands-on/science, social studies, and Spanish gap work. Complete the separately listed Khan assessments for primary-course coverage.

Student: _____ Date completed: _____

Math: 7.RP.1-2 | ELA: RL.7.1-10; RI.7.1-10; W.7.1-9; L.7.1-6; SL.7.1-6 (grade-level coverage; module skill targets below) | Science: L.7.3 | Social Studies: MS CCRS SS Grade 7 Early World History - prehistory/Mesopotamia | Spanish: MS World Languages Framework 2016 - Novice communication

Student paper contains no answers. Complete all sections. Show math work. Use only the supplied passages/background notes and teacher-approved tools. Spanish cue support is allowed. A module test may be divided into 2-3 sittings.

Writing and conventions · required gap check - 8 points

Score: _____ / 8

A Pond Study

A class studied a small pond near its school. Students recorded water temperature, counted visible organisms from the bank, and drew a model of a food web. Because the first visit happened after rain, they wondered whether that single visit represented typical conditions. They returned at the same time of day during three later weeks. Their records were not identical. One student wanted to erase the unusual measurements, but her partner argued that differences could be useful evidence. The group kept the records and described the limits of its method: it had observed only one pond and had not counted organisms beneath the water. Their report distinguished observations from explanations. "We saw fewer insects" was an observation; "the cooler temperature caused the change" was a hypothesis that needed further testing. The study taught the class that careful questions are as important as confident conclusions.

1. Using the supplied passage, write two organized paragraphs explaining its central message. Include two accurate details and explain how they support your response. (5 points)

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Science - 10 points

Score: _____ / 10

W1 data: A fictional survey uses the same area and observation time in two habitats. Trial A: 9 distinct species observed; Trial B: 15 distinct species observed. These are invented assessment data, not a claim about a real investigation.

1. How does carbon move from atmosphere into living plants? (1 point)

2. Why is the water cycle a cycle rather than a one-way path? (1 point)

3. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

4. Use W1 data. State one observation without claiming its cause. (1 point)

5. Use W1 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

6. Model water and carbon movement in an ecosystem. (3 points)

Spanish - 7 points

Score: _____ / 7

Spanish model and vocabulary (cue support allowed)

Hola. Me llamo Ana. ¿Cómo te llamas?
Word bank: hola, adiós, gracias, por favor, buenos días, hasta luego.

1. Translate into English: hola. (1 point)

2. Translate into Spanish: goodbye. (1 point)

3. Complete: Me ___ Ana. (My name is Ana.) (1 point)

4. Oral task (teacher listens): Use 3 short statements or a 3-line exchange about this week/module topic. You may use the supplied vocabulary/model as a cue, but add your own relevant detail or question. (4 points)

Grade 7 · Module 1 Week 2 Friday gap quiz

Scheduled: 2026-10-23 | Required writing, hands-on/science, social studies, and Spanish gap work. Complete the separately listed Khan assessments for primary-course coverage.

11. Use W4 data. Which trial has the higher recorded value, and by how much? (2 points)

12. Model a food web and a possible effect of losing one species. (3 points)

13. Choose one of the supplied data comparisons. Write a claim supported by those data, give the two values as evidence, and explain what further information would be needed for a causal explanation. (4 points)

Social Studies - 24 points

Score: _____ / 24

W1 background: The period before written records for a society; it does not mean people lacked history. Resources, climate, population, opportunities, and other pressures could influence movement. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W2 background: It supported more permanent settlements and changed work, resources, and social organization. No; crops, environments, timing, and choices varied. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W3 background: They supported water access, irrigation, transport, and fertile lands while posing flood risks. Specialized work, institutions, networks, writing in some societies, or organized infrastructure. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W4 background: A writing system using wedge-shaped marks, associated with ancient Mesopotamia. They show rules/ideals and authority, but not necessarily how every case was handled. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. What does prehistory mean? (1 point)

2. Why might early humans migrate? (1 point)

3. Model an early migration question. (3 points)

4. How did agriculture change some human communities? (1 point)

5. Was adopting agriculture an identical process everywhere? (1 point)

6. Compare foraging and early farming. (3 points)

7. Why were the Tigris and Euphrates important in Mesopotamia? (1 point)

8. What is one feature of an early city/civilization? (1 point)

9. Model river, agriculture, and city development. (3 points)

10. What is cuneiform? (1 point)

11. Why are written laws useful historical evidence? (1 point)

12. Compare a law text with evidence of everyday life. (3 points)

13. Choose one background note. Describe an additional perspective or source that could improve it, and explain what it might reveal or challenge. (4 points)

Should the School Reduce Plastic?

The student council proposed replacing some single-use lunch packaging with reusable containers. Its argument began with a clear claim: the school should run a four-week trial before making a permanent purchase. The council's fictional classroom survey found that 72 of 120 respondents supported the trial. A second source, a cafeteria cost table, estimated that washing reusable containers would require additional time. Supporters argued that the trial could measure both waste and labor instead of assuming that one benefit settled the whole question. Critics worried about lost containers and unequal access to supplies. The proposal responded by lending containers during the trial and counting losses. The council did not claim that a survey proved the policy would work. It used the survey to show interest and proposed collecting direct evidence of costs and waste.

1. Using the supplied passage, write two organized paragraphs explaining its central message. Include two accurate details and explain how they support your response. (5 points)

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

W3 data: A fictional survey uses the same area and observation time in two habitats. Trial A: 11 distinct species observed; Trial B: 17 distinct species observed. These are invented assessment data, not a claim about a real investigation.

W4 data: A fictional survey uses the same area and observation time in two habitats. Trial A: 12 distinct species observed; Trial B: 18 distinct species observed. These are invented assessment data, not a claim about a real investigation.

1. Why can excess nutrient runoff affect an ecosystem? (1 point)

2. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

3. Model one human impact on a cycle. (3 points)

4. Why is not every introduced species called invasive? (1 point)

5. Use W2 data. Which trial has the higher recorded value, and by how much? (2 points)

6. Compare two explanations for a biodiversity change. (3 points)

7. Why consider unintended consequences? (1 point)

8. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

9. Evaluate an ecosystem solution. (3 points)

10. Does a correlation by itself establish causation? (1 point)

11. Use W4 data. Which trial has the higher recorded value, and by how much? (2 points)

12. Outline an ecology data report. (3 points)

13. Choose one of the supplied data comparisons. Write a claim supported by those data, give the two values as evidence, and explain what further information would be needed for a causal explanation. (4 points)

Social Studies - 24 points

Score: _____ / 24

W1 background: Water, farming, transport, and settlement patterns were tied to the river. Images/objects can reveal beliefs, roles, materials, and purposes when interpreted in context. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W2 background: Evidence of urban organization and infrastructure, though not a complete account of government. Evidence is incomplete; undeciphered or limited records restrict conclusions. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W3 background: Water, agriculture, travel, and settlement were linked to river valleys. Different places, dynasties, periods, and communities changed over time. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W4 background: Understand similar environmental opportunities and different social responses. People developed different institutions, beliefs, and choices. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. Why was the Nile important to ancient Egypt? (1 point)

2. How can art provide historical evidence? (1 point)

3. Use an Egyptian object as historical evidence. (3 points)

4. What can planned streets or drains show about Indus cities? (1 point)

5. Why are interpretations of an ancient society sometimes uncertain? (1 point)

6. Compare an Indus city plan with another river-valley society. (3 points)

7. How did rivers support some early Chinese societies? (1 point)

8. Why should ancient China not be treated as one unchanging society? (1 point)

9. Create a river-valley comparison involving early China. (3 points)

10. What is a common reason to compare river-valley civilizations? (1 point)

11. Why is a shared river setting not proof of identical cultures? (1 point)

12. Compare two river-valley societies. (3 points)

13. Choose one background note. Describe an additional perspective or source that could improve it, and explain what it might reveal or challenge. (4 points)

Grade 7 · Module 3 Week 1 Friday gap quiz

Scheduled: 2026-12-18 | Required writing, hands-on/science, social studies, and Spanish gap work. Complete the separately listed Khan assessments for primary-course coverage.

Student: _____ Date completed: _____

Math: 7.NS.1 | ELA: RL.7.1-10; RI.7.1-10; W.7.1-9; L.7.1-6; SL.7.1-6 (grade-level coverage; module skill targets below) | Science: P.7.5A-B | Social Studies: 7.4 Ancient Greece | Spanish: MS World Languages Framework 2016 - Novice communication

Student paper contains no answers. Complete all sections. Show math work. Use only the supplied passages/background notes and teacher-approved tools. Spanish cue support is allowed. A module test may be divided into 2-3 sittings.

Score: _____ / 8

Arachne: an Original Retelling

This original retelling draws on the traditional myth. Arachne was a talented weaver who took great pride in her work. When people praised her skill, she insisted that no teacher or goddess deserved any credit. Athena, associated with wisdom and crafts, approached in disguise and advised her to speak with humility. Arachne dismissed the advice and demanded a contest. The two wove remarkable pictures, but their conflict involved more than technical skill: Arachne's attitude challenged the goddess's authority. In the traditional ending, Athena transformed Arachne into a spider, forever connected with weaving. Readers can admire Arachne's ability while questioning her boastfulness and the severity of the punishment. The story invites discussion of pride, power, artistic skill, and the consequences of refusing advice. A theme is a reasoned interpretation, not simply the name of a topic.

1. Using the supplied passage, write two organized paragraphs explaining its central message. Include two accurate details and explain how they support your response. (5 points)

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

The Bridge Apprentice

In this original historical fiction, an apprentice watched an experienced builder inspect a Roman-style stone bridge. The apprentice wanted to remove the wooden supports as soon as the final stone was placed. "A finished appearance is not enough," the builder warned. He checked the arch and explained how its stones pressed against one another and transferred forces toward the supports. The apprentice grew impatient, but a cracked stone changed her mind. Together they replaced it and repeated the inspection. Later, the apprentice wrote that the delay had been the most important part of the work. The scene does not establish facts about a particular ancient builder; it uses an imagined conversation to explore patience and responsibility. Readers should distinguish the fictional characters from historical claims, such as the Romans' use of arches in engineering.

1. Using the supplied passage, write two organized paragraphs explaining its central message. Include two accurate details and explain how they support your response. (5 points)

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Score: _____ / 8

Two Sources for a Forecast

Fictional classroom sources: Source A, "Weather Log," by a student team, dated March 8, records local temperature, wind direction, and pressure at noon for five days. Source B, an unsigned advertisement dated March 8, says that one device "always predicts weather perfectly" but gives no measurements. A research group prefers Source A for describing what was actually observed. It still checks the team's instruments and method, because named authors and a date do not guarantee accuracy. The group writes a cautious forecast, separating data from inference. Its notes include each source's title, creator, date, and the particular information used. In its final explanation, it paraphrases the data instead of copying a paragraph and identifies its source. Readers can judge the explanation more easily because the evidence and its limits are visible.

1. Using the supplied passage, write two organized paragraphs explaining its central message. Include two accurate details and explain how they support your response. (5 points)

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Science - 10 points

Score: _____ / 10

W1 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 11 milliliters of water collected; Trial B: 19 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

1. Why cannot one storm establish a climate trend? (1 point)

2. How can weather observations vary within one region? (1 point)

3. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

4. Use W1 data. State one observation without claiming its cause. (1 point)

5. Use W1 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

6. Compare short-term observations with long-term climate data. (3 points)

Score: _____ / 8

An Argument for Trees

A community group argues that a school should plant trees near its outdoor learning area. Its claim is narrower than "trees solve every problem": a carefully chosen location may provide shade and support habitat. The group presents a fictional class data table comparing temperatures at a sunny spot and a shaded spot. It also acknowledges counterarguments: planting and watering cost money, and roots or branches may interfere with structures. Its proposal recommends consulting knowledgeable staff, selecting a suitable location, and comparing costs before planting. An effective response to a counterargument does not mock the people who raise it. Instead, it explains how the plan addresses a reasonable concern or why the evidence supports a different choice. The final paragraph asks the school to try a manageable plan and report the results.

1. Using the supplied passage, write two organized paragraphs explaining its central message. Include two accurate details and explain how they support your response. (5 points)

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Score: _____ / 8

After the Storm

Original poem:
The street unrolls its silver thread,
The restless clouds move overhead.
A window holds the fading light;
A branch writes slowly into night.
I count the drops that leave the leaves,
And hear the roof repeat its eaves.
The storm has gone; its quiet trace
Still draws a map across this place.

Prose companion: Rainwater remains on leaves and the street after a storm. Clouds move away as evening approaches. A person observes these remaining signs of the weather. The prose summarizes observable conditions; the poem uses images to create a reflective mood.

1. Using the supplied passage, write two organized paragraphs explaining its central message. Include two accurate details and explain how they support your response. (5 points)

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Score: _____ / 8

After the Storm

Original poem:
The street unrolls its silver thread,
The restless clouds move overhead.
A window holds the fading light;
A branch writes slowly into night.
I count the drops that leave the leaves,
And hear the roof repeat its eaves.
The storm has gone; its quiet trace
Still draws a map across this place.

Prose companion: Rainwater remains on leaves and the street after a storm. Clouds move away as evening approaches. A person observes these remaining signs of the weather. The prose summarizes observable conditions; the poem uses images to create a reflective mood.

1. Using the supplied passage, write two organized paragraphs explaining its central message. Include two accurate details and explain how they support your response. (5 points)

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

10. Why distinguish uncertainty from an error? (1 point)

11. Use W4 data. Which trial has the higher recorded value, and by how much? (2 points)

12. Write a data-based claim-evidence-reasoning outline. (3 points)

13. Choose one of the supplied data comparisons. Write a claim supported by those data, give the two values as evidence, and explain what further information would be needed for a causal explanation. (4 points)

Social Studies - 24 points

Score: _____ / 24

W1 background: Feudal ties concern political/military obligations; manorial life concerns an estate's economic/social organization; both varied. It provided resources, livelihoods, and a basis for obligations/control. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W2 background: Religious practices, education, institutions, art, and political relationships affected life. People and communities varied by place, status, belief, and period. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W3 background: Religious, political, military, and economic motives/interests interacted. Participants and affected communities had different experiences and purposes. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W4 background: Markets, crafts, urban institutions, and networks expanded opportunities and tensions. No; local conditions and histories differed. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. How are feudal ties and manorial life different concepts? (1 point)

2. Why did land matter to medieval power and work? (1 point)

3. Compare a lord's and a peasant's roles on a manor. (3 points)

4. How could the medieval Church influence European culture? (1 point)

5. Why should one institution not stand for every medieval experience? (1 point)

6. Analyze a cultural institution's role. (3 points)

7. What broad factors were involved in the Crusades? (1 point)

8. Why should Crusades be studied from multiple perspectives? (1 point)

9. Compare two perspectives on medieval conflict/exchange. (3 points)

10. How could towns and trade change medieval economic life? (1 point)

11. Did every region change at the same speed or in the same way? (1 point)

12. Model a transition from rural estate life to urban trade. (3 points)

13. Choose one background note. Describe an additional perspective or source that could improve it, and explain what it might reveal or challenge. (4 points)

Score: _____ / 8

The Printer's Workshop

Original drama:
[An apprentice arranges metal type on a table.]
APPRENTICE: If we print the same page many times, will every reader agree with it?
PRINTER: Copies spread words, not agreement.
APPRENTICE: Then accuracy matters before the first copy.
[The printer points to a misplaced letter.]
PRINTER: And readers must question what they read.

Informational companion: In early modern Europe, printing made it possible to reproduce texts more quickly than copying each one by hand. Printed works helped ideas circulate, including religious, scientific, and artistic arguments. Access remained uneven; not everyone could read or obtain books. Greater circulation did not guarantee that every claim was true. Scholars therefore needed observation, reasoning, and the comparison of sources as well as access to texts.

1. Using the supplied passage, write two organized paragraphs explaining its central message. Include two accurate details and explain how they support your response. (5 points)

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Score: _____ / 8

A History Portfolio

A student created a portfolio about how travel and communication changed societies. She began with a research question rather than a list of famous people: How did networks connect communities, and whose experiences were left out of the usual accounts? She compared a map, a trade-route reading, and a translated historical account. Her notes separated quotations, paraphrases, and her own interpretations. When two accounts disagreed, she recorded their authors, purposes, and contexts instead of choosing the more dramatic version. The final presentation used a timeline but did not imply that every change happened everywhere at once. It included an argument supported by evidence and a section explaining limitations. The student concluded that a strong portfolio shows not only a polished product but also how the researcher checked and revised the work.

1. Using the supplied passage, write two organized paragraphs explaining its central message. Include two accurate details and explain how they support your response. (5 points)

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Scheduled: 2027-07-09 | Required writing, hands-on/science, social studies, and Spanish gap work. Complete the separately listed Khan assessments for primary-course coverage.

Student: _____ Date completed: _____

Math: 7.G.2-6 | ELA: RL.7.1-10; RI.7.1-10; W.7.1-9; L.7.1-6; SL.7.1-6 (grade-level coverage; module skill targets below) | Science: Cumulative L.7.3; P.7.5; E.7.9 | Social Studies: MS CCRS SS Grade 7 Early World History - Exploration/Enlightenment | Spanish: MS World Languages Framework 2016 - Novice communication

Student paper contains no answers. Complete all sections. Show math work. Use only the supplied passages/background notes and teacher-approved tools. Spanish cue support is allowed. A module test may be divided into 2-3 sittings.

Writing and conventions · required gap check - 8 points

Score: _____ / 8

A History Portfolio

A student created a portfolio about how travel and communication changed societies. She began with a research question rather than a list of famous people: How did networks connect communities, and whose experiences were left out of the usual accounts? She compared a map, a trade-route reading, and a translated historical account. Her notes separated quotations, paraphrases, and her own interpretations. When two accounts disagreed, she recorded their authors, purposes, and contexts instead of choosing the more dramatic version. The final presentation used a timeline but did not imply that every change happened everywhere at once. It included an argument supported by evidence and a section explaining limitations. The student concluded that a strong portfolio shows not only a polished product but also how the researcher checked and revised the work.

1. Using the supplied passage, write two organized paragraphs explaining its central message. Include two accurate details and explain how they support your response. (5 points)

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Science - 10 points

Score: _____ / 10

W3 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 13 milliliters of water collected; Trial B: 21 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

1. Why must reasoning link data to a scientific mechanism? (1 point)

2. What is one purpose of a lab report's methods section? (1 point)

3. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

4. Use W3 data. State one observation without claiming its cause. (1 point)

5. Use W3 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

6. Draft a lab-report/CER outline. (3 points)

Grade 7 · Module 9 Comprehensive gap assessment

Scheduled: 2027-07-16 | Required writing, hands-on/science, social studies, and Spanish gap work. Complete the separately listed Khan assessments for primary-course coverage.

Student: _____ Date completed: _____

Score: _____ / 28

W1 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 11 milliliters of water collected; Trial B: 19 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W2 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 12 milliliters of water collected; Trial B: 20 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W3 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 13 milliliters of water collected; Trial B: 21 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W4 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 14 milliliters of water collected; Trial B: 22 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

1. Why frame a capstone around a focused question? (1 point)

2. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

3. Plan a systems/cycles capstone. (3 points)

4. Why can a model be useful even when it is simplified? (1 point)

5. Use W2 data. Which trial has the higher recorded value, and by how much? (2 points)

6. Revise a model using new observations. (3 points)

7. What is one purpose of a lab report's methods section? (1 point)

8. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

9. Draft a lab-report/CER outline. (3 points)

10. Why should a capstone include more than a final score? (1 point)

11. Use W4 data. Which trial has the higher recorded value, and by how much? (2 points)

12. Plan a science showcase summary. (3 points)

13. Choose one of the supplied data comparisons. Write a claim supported by those data, give the two values as evidence, and explain what further information would be needed for a causal explanation. (4 points)

Social Studies - 24 points

Score: _____ / 24

W1 background: New routes linked trade and migration, while conquest, exploitation, disease, and enslavement damaged communities. European accounts alone omit experiences of many people affected. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W2 background: Reason, rights, consent, limits on government, or debates about equality. Rights/equality claims often coexisted with exclusion and slavery. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W3 background: It comes from the relevant period/event or direct participants, depending on the question. Perspective, purpose, bias, and limited knowledge affect accounts. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W4 background: It selects events and scales, leaving out many experiences and connections. Evidence-based argument, source comparison, connections, and reflection. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. Why did maritime exploration connect societies and also create harm? (1 point)

2. Why include Indigenous and African perspectives? (1 point)

3. Compare accounts of exploration/contact. (3 points)

4. What is one broad Enlightenment idea? (1 point)

5. Why compare ideals with actual practices? (1 point)

6. Analyze an Enlightenment ideal and contradiction. (3 points)

7. What makes an account a primary source for a historical question? (1 point)

8. Why is a primary source not automatically accurate or complete? (1 point)

9. Plan a primary-source seminar comparison. (3 points)

10. Why is a world-history timeline a model rather than a full history? (1 point)

11. What can a capstone show besides memorized dates? (1 point)

12. Plan a world-history capstone and timeline. (3 points)

13. Choose one background note. Describe an additional perspective or source that could improve it, and explain what it might reveal or challenge. (4 points)
