Grade 4 · Module 7 Comprehensive gap assessment - TEACHER ANSWER KEY

Scheduled: 2027-05-21 | Required writing, hands-on/science, social studies, and Spanish gap work. Complete the separately listed Khan assessments for primary-course coverage.

Math: 4.G.1-3; 4.MD.4-7 | ELA: RL.4.1-10; RI.4.1-10; W.4.1-9; L.4.1-6; SL.4.1-6 (grade-level coverage; module skill targets below) | Science: E.4.9B-C | Social Studies: MS CCRS SS Grade 4 - regions/geography | Spanish: MS World Languages Framework 2016 - Novice communication

Award points by item. Accept equivalent correct mathematical forms and supported written interpretations. For open responses, use the stated rubric; do not require identical wording. Score each subject separately, then apply your grading policy.

Writing and conventions · required gap check - 12 points

Score: _____ / 12

Rain at the Window

Original poem:
Rain drums softly on the glass,
Silver footsteps cross the grass.
Clouds pull blankets through the sky,
While busy birds go fluttering by.
A puddle holds a crooked tree;
The wind sings low and talks to me.
Then sunlight opens one bright door,
And rain retreats to drum no more.

Prose companion: A short rain shower passed over the yard. Wind moved the clouds. When sunlight returned, the shower stopped.

1. Using the supplied passage, write one organized paragraph explaining its central message. Include two accurate details and explain how they support your response. (5 points)

Answer / scoring: 5-point rubric: accurate central message (1), two relevant text details (2), logical explanation/organization (1), clear sentences/conventions (1). Accept supported interpretations.

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Answer / scoring: 3-point rubric: two effective revisions (2); accurate explanation of one improvement (1).

3. Connect your writing to this module's Khan reading/grammar goals. Name two skills, show an example of each in your own writing, and explain your choices. (4 points)

Answer / scoring: 4-point rubric: two appropriate module skills identified (2), two accurate applications explained (2). Check against the module's listed learning goals.

Science - 28 points

Score: _____ / 28

W1 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 11 milliliters of water collected; Trial B: 19 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W2 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 12 milliliters of water collected; Trial B: 20 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W3 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 13 milliliters of water collected; Trial B: 21 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W4 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 14 milliliters of water collected; Trial B: 22 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

1. Can one hot day establish a climate trend? (1 point)

Answer / scoring: No; a long record is needed.

2. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

3. Compare a daily weather report with a long-term climate summary. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Correct time scales and at least two comparable measures.

4. What does an average hide? (1 point)

Answer / scoring: Variation/extremes and differences among observations.

5. Use W2 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

6. Make a climate comparison using a table or graph. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Correct labels/units, at least two locations or periods, and a cautious interpretation.

7. Why does elevation matter for climate? (1 point)

Answer / scoring: Higher elevations are often cooler; other factors also matter.

8. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

9. Model two factors that can affect a region's climate. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Two relevant factors, correct explanations, and acknowledgement that climate has multiple influences.

10. What is one way to use an official weather alert? (1 point)

Answer / scoring: Read the alert and follow locally appropriate instructions from trusted authorities.

11. Use W4 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

12. Design a preparedness information poster. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Identify hazard, trusted information source, and a clear planning action; avoid unsupported guarantees.

13. Choose one of the supplied data comparisons. Write a claim supported by those data, give the two values as evidence, and explain what further information would be needed for a causal explanation. (4 points)

Answer / scoring: Rubric (4): accurate limited claim (1); two correct data values (1); logical connection to claim (1); relevant limitation/next test (1). Accept varied claims bounded by the supplied data.

Social Studies - 24 points

Score: _____ / 24

W1 background: They affect routes, water access, land use, and costs/risks. Region groupings vary by purpose/source. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W2 background: Geology, water, soils, and landforms influence what resources are available. Supplies, environmental impacts, and competing needs matter. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W3 background: No; regional generalizations do not capture all communities. Skills, customs, markets, arts, and livelihoods interact. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W4 background: Distance represented by map measurements. They show complementary location and contextual information. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. How can mountains or deserts influence travel and settlement? (1 point)

Answer / scoring: They affect routes, water access, land use, and costs/risks.

2. Why do West and Southwest labels need a defined source? (1 point)

Answer / scoring: Region groupings vary by purpose/source.

3. Create a West/Southwest physical-feature map. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Source-defined grouping, at least three features, legend, and direction.

4. What is the connection between landforms and some resources? (1 point)

Answer / scoring: Geology, water, soils, and landforms influence what resources are available.

5. Why should resource use consider limits? (1 point)

Answer / scoring: Supplies, environmental impacts, and competing needs matter.

6. Compare resource use in two landscapes. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Relevant landscape/resource connection, one constraint, and a source.

7. Does one product or tradition describe every person in a region? (1 point)

Answer / scoring: No; regional generalizations do not capture all communities.

8. How can culture and economy affect one another? (1 point)

Answer / scoring: Skills, customs, markets, arts, and livelihoods interact.

9. Describe a regional cultural/economic connection respectfully. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Specific sourced example and recognition of diversity/variation.

10. What does a map's scale help determine? (1 point)

Answer / scoring: Distance represented by map measurements.

11. Why use both map and written evidence for comparison? (1 point)

Answer / scoring: They show complementary location and contextual information.

12. Compare regions using a map and a second source. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Correct map interpretation, common criteria, and source-supported explanation.

13. Choose one background note. Describe an additional perspective or source that could improve it, and explain what it might reveal or challenge. (4 points)

Answer / scoring: Rubric (4): identifies chosen note/claim (1); relevant additional source/perspective (1); explains new insight/check (1); recognizes limits rather than treating one source as complete truth (1).
