Grade 4 · Module 7 Comprehensive gap assessment

Scheduled: 2027-05-21 | Required writing, hands-on/science, social studies, and Spanish gap work. Complete the separately listed Khan assessments for primary-course coverage.

Student: _____ Date completed: _____

Math: 4.G.1-3; 4.MD.4-7 | ELA: RL.4.1-10; RI.4.1-10; W.4.1-9; L.4.1-6; SL.4.1-6 (grade-level coverage; module skill targets below) | Science: E.4.9B-C | Social Studies: MS CCRS SS Grade 4 - regions/geography | Spanish: MS World Languages Framework 2016 - Novice communication

Student paper contains no answers. Complete all sections. Show math work. Use only the supplied passages/background notes and teacher-approved tools. Spanish cue support is allowed. A module test may be divided into 2-3 sittings.

Writing and conventions · required gap check - 12 points

Score: _____ / 12

Rain at the Window

Original poem:
Rain drums softly on the glass,
Silver footsteps cross the grass.
Clouds pull blankets through the sky,
While busy birds go fluttering by.
A puddle holds a crooked tree;
The wind sings low and talks to me.
Then sunlight opens one bright door,
And rain retreats to drum no more.

Prose companion: A short rain shower passed over the yard. Wind moved the clouds. When sunlight returned, the shower stopped.

1. Using the supplied passage, write one organized paragraph explaining its central message. Include two accurate details and explain how they support your response. (5 points)

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

3. Connect your writing to this module's Khan reading/grammar goals. Name two skills, show an example of each in your own writing, and explain your choices. (4 points)

Science - 28 points

Score: _____ / 28

W1 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 11 milliliters of water collected; Trial B: 19 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W2 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 12 milliliters of water collected; Trial B: 20 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W3 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 13 milliliters of water collected; Trial B: 21 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W4 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 14 milliliters of water collected; Trial B: 22 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

1. Can one hot day establish a climate trend? (1 point)

2. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

3. Compare a daily weather report with a long-term climate summary. (3 points)

4. What does an average hide? (1 point)

5. Use W2 data. Which trial has the higher recorded value, and by how much? (2 points)

6. Make a climate comparison using a table or graph. (3 points)

7. Why does elevation matter for climate? (1 point)

8. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

9. Model two factors that can affect a region's climate. (3 points)

10. What is one way to use an official weather alert? (1 point)

11. Use W4 data. Which trial has the higher recorded value, and by how much? (2 points)

12. Design a preparedness information poster. (3 points)

13. Choose one of the supplied data comparisons. Write a claim supported by those data, give the two values as evidence, and explain what further information would be needed for a causal explanation. (4 points)

Social Studies - 24 points

Score: _____ / 24

W1 background: They affect routes, water access, land use, and costs/risks. Region groupings vary by purpose/source. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W2 background: Geology, water, soils, and landforms influence what resources are available. Supplies, environmental impacts, and competing needs matter. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W3 background: No; regional generalizations do not capture all communities. Skills, customs, markets, arts, and livelihoods interact. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W4 background: Distance represented by map measurements. They show complementary location and contextual information. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. How can mountains or deserts influence travel and settlement? (1 point)

2. Why do West and Southwest labels need a defined source? (1 point)

3. Create a West/Southwest physical-feature map. (3 points)

4. What is the connection between landforms and some resources? (1 point)

5. Why should resource use consider limits? (1 point)

6. Compare resource use in two landscapes. (3 points)

7. Does one product or tradition describe every person in a region? (1 point)

8. How can culture and economy affect one another? (1 point)

9. Describe a regional cultural/economic connection respectfully. (3 points)

10. What does a map's scale help determine? (1 point)

11. Why use both map and written evidence for comparison? (1 point)

12. Compare regions using a map and a second source. (3 points)

13. Choose one background note. Describe an additional perspective or source that could improve it, and explain what it might reveal or challenge. (4 points)
