Grade 4 · Module 7 Week 3 Friday gap quiz - TEACHER ANSWER KEY

Scheduled: 2027-05-14 | Required writing, hands-on/science, social studies, and Spanish gap work. Complete the separately listed Khan assessments for primary-course coverage.

Math: 4.G.1-3; 4.MD.4-7 | ELA: RL.4.1-10; RI.4.1-10; W.4.1-9; L.4.1-6; SL.4.1-6 (grade-level coverage; module skill targets below) | Science: E.4.9B-C | Social Studies: MS CCRS SS Grade 4 - regions/geography | Spanish: MS World Languages Framework 2016 - Novice communication

Award points by item. Accept equivalent correct mathematical forms and supported written interpretations. For open responses, use the stated rubric; do not require identical wording. Score each subject separately, then apply your grading policy.

Writing and conventions · required gap check - 8 points

Score: _____ / 8

Rain at the Window

Original poem:
Rain drums softly on the glass,
Silver footsteps cross the grass.
Clouds pull blankets through the sky,
While busy birds go fluttering by.
A puddle holds a crooked tree;
The wind sings low and talks to me.
Then sunlight opens one bright door,
And rain retreats to drum no more.

Prose companion: A short rain shower passed over the yard. Wind moved the clouds. When sunlight returned, the shower stopped.

1. Using the supplied passage, write one organized paragraph explaining its central message. Include two accurate details and explain how they support your response. (5 points)

Answer / scoring: 5-point rubric: accurate central message (1), two relevant text details (2), logical explanation/organization (1), clear sentences/conventions (1). Accept supported interpretations.

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Answer / scoring: 3-point rubric: two effective revisions (2); accurate explanation of one improvement (1).

Science - 10 points

Score: _____ / 10

W3 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 13 milliliters of water collected; Trial B: 21 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

1. How can proximity to a large body of water affect temperature patterns? (1 point)

Answer / scoring: Water heats/cools more slowly than land and can moderate nearby temperatures.

2. Why does elevation matter for climate? (1 point)

Answer / scoring: Higher elevations are often cooler; other factors also matter.

3. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

4. Use W3 data. State one observation without claiming its cause. (1 point)

Answer / scoring: Trial B recorded 21 versus 13 in A; accept an accurate description without an unsupported causal claim.

5. Use W3 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

Answer / scoring: No. Need a clear tested variable, controls, repeated trials, and consideration of other causes. One point for no; one for a relevant reason.

6. Model two factors that can affect a region's climate. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Two relevant factors, correct explanations, and acknowledgement that climate has multiple influences.
