An Argument for Trees

A community group argues that a school should plant trees near its outdoor learning area. Its claim is narrower than "trees solve every problem": a carefully chosen location may provide shade and support habitat. The group presents a fictional class data table comparing temperatures at a sunny spot and a shaded spot. It also acknowledges counterarguments: planting and watering cost money, and roots or branches may interfere with structures. Its proposal recommends consulting knowledgeable staff, selecting a suitable location, and comparing costs before planting. An effective response to a counterargument does not mock the people who raise it. Instead, it explains how the plan addresses a reasonable concern or why the evidence supports a different choice. The final paragraph asks the school to try a manageable plan and report the results.

1. Using the supplied passage, write two organized paragraphs explaining its central message. Include two accurate details and explain how they support your response. (5 points)

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

W2 background: Water, distances, routes, and transport needs shaped journeys. Travelers needed routes, supplies, skills, and relationships. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. How did desert geography influence trans-Saharan trade? (1 point)

2. Why were knowledge and cooperation important to long-distance travel? (1 point)

3. Use W2 background. Identify one claim that could be checked against a map, document, or other reliable source. (1 point)

4. Use W2 background. Explain how two ideas in the note connect. (2 points)

5. Name one kind of source that could help check the background note and explain why. (2 points)

6. Plan a historical trade-route explanation. (3 points)
