NOVELLA EXCERPT

From A Christmas Carol, Stave One (original text)

Charles Dickens, A Christmas Carol (1843). Public domain.

MARLEY was dead: to begin with. There is no doubt whatever about that. The register of his burial was signed by the clergyman, the clerk, the undertaker, and the chief mourner. Scrooge signed it: and Scrooge's name was good upon 'Change, for anything he chose to put his hand to. Old Marley was as dead as a door-nail.

"Bah!" said Scrooge, "Humbug!"

3 "Old Marley was as dead as a door-nail."

4 "He iced his office in the dog-days."

5 ""Don't be cross, uncle!" said the nephew."

6 ""I can't afford to make idle people merry.""

Stave One

7 Why do you think Dickens opens the story by insisting so strongly that Marley is dead? What effect does it have on the reader?

INFORMATIONAL TEXT

Christmas in Dickens's London

An original informational text

1 In 1843, London was the largest city in the world, home to about two million people. Its factories, banks, and docks made some families very rich. Yet many Londoners lived crowded into a single damp room, and a coal fire, a hot meal, or a pair of boots was a luxury.

2 For a working family, the Christmas feast took planning. Many saved for months by joining a goose club, paying a few pennies each week to a shopkeeper so that they could collect a goose at Christmas. Families with no oven of their own carried their dinner to the local baker's shop, where it was roasted in the big bread ovens for a small fee.

3 People who could not support themselves at all might be sent to a workhouse. Under the Poor Law of 1834, workhouses were made deliberately unpleasant: families were separated, the work was hard, and the food was plain and meager, so that only the truly desperate would ask to enter.

4 Christmas itself was changing. The first Christmas card for sale was printed in London in 1843, the same year A Christmas Carol appeared. Over the following decades, the holiday grew from a modest celebration into the family festival of gifts, feasting, and charity that Dickens's story helped to shape.

3 What does “meager” mean in paragraph 3? What clue helps?

4 Explain how the contrast in paragraph 1 helps you understand London in 1843.

5 “Only the truly desperate would ask to enter” (paragraph 3) means people entered the workhouse…

A for a holiday
B when they had no other choice
C to learn a trade

INFORMATIONAL TEXT

The Lighthouse Keeper's Log

An original informational text

1 For thirty-one years, Agnes Brewer kept the light at Pelican Point. Her log, a weathered leather book now held in the county archive, records the weather, the passing ships, and the condition of the lamp in brief, unsentimental entries.

2 Yet occasionally Agnes's restraint gives way. On November 3, 1913, after a storm wrecked two schooners on the reef, she wrote only: “Heavy seas. Lamp kept. Seven men brought ashore. Four not.” The terse entry is more harrowing than any detailed description could be.

3 Historians value such logs precisely because they were not meant to be literature. They are firsthand records, written in the moment, by people whose work kept others alive.

1. What does unsentimental mean? Use the prefix and context.

2. What does terse mean? What clue helps?

3. What does harrowing mean in paragraph 2?

4. archive: part of speech

Scrooge's Cold

NOVELLA EXCERPT

Scrooge, Stave One (original text)

Charles Dickens, A Christmas Carol. Public domain.

Oh! But he was a tight-fisted hand at the grind-stone, Scrooge! a squeezing, wrenching, grasping, scraping, clutching, covetous, old sinner! Hard and sharp as flint, from which no steel had ever struck out generous fire; secret, and self-contained, and solitary as an oyster. The cold within him froze his old features, nipped his pointed nose, shrivelled his cheek, stiffened his gait; made his eyes red, his thin lips blue; and spoke out shrewdly in his grating voice. A frosty rime was on his head, and on his eyebrows, and his wiry chin. He carried his own low temperature always about with him; he iced his office in the dog-days; and didn't thaw it one degree at Christmas.

External heat and cold had little influence on Scrooge. No warmth could warm, no wintry weather chill him. No wind that blew was bitterer than he, no falling snow was more intent upon its purpose, no pelting rain less open to entreaty.

7 How does Dickens use the idea of cold to describe Scrooge's personality? Use two phrases from the passage.

The Inheritance

An original story

1 When Aunt Theodora died, she left Mira an old trunk, a box of letters, and one instruction: Read them in order.

2 Mira's cousins laughed. They had inherited the house and the car. “Enjoy your junk,” said Derek, tossing her the trunk key.

3 That night, Mira opened the first letter. It was dated 1952 and began: To whoever is patient enough to read this… By the tenth letter, Mira understood that the trunk held something her cousins would never see: the story of a woman who had crossed an ocean alone at seventeen, taught herself three languages, and spent her life helping others do the same.

4 Mira closed the last letter at dawn. She didn't feel like the cousin who got the junk. She felt like the one who got the treasure.

1 What is the connotation of “junk” in Derek's line? What does it reveal about him?

2 Explain the metaphor “the one who got the treasure.”

INFORMATIONAL TEXT

Why Dickens Wrote A Christmas Carol

An original informational text based on historical accounts

1 Early in 1843, the British government published a report on children working in mines, mills, and workshops. It described children as young as five or six working twelve hours a day. Charles Dickens read it and was horrified. He told a friend he planned to write a pamphlet, an appeal on behalf of "the poor man's child."

2 That autumn he visited a ragged school, a free school run by volunteers for the poorest children in London. He saw children who were hungry, dirty, and had never been taught to read. A few weeks later, speaking to a crowd in Manchester, he argued that education was the best hope for children like these.

3 Dickens never wrote the pamphlet. Instead, he decided that a story would strike a much harder blow, because readers who would ignore a report might be moved by characters they cared about. Within about six weeks he had written A Christmas Carol.

4 Dickens also remembered his own childhood. When he was twelve, his father was imprisoned for debt, and Charles was sent to work in a factory, pasting labels on pots of boot polish. Many readers believe that this experience is one reason his story takes the side of poor children so fiercely.

3 Infer why the ragged school made such a strong impression on Dickens. Cite two details.

4 What can you infer about how Dickens felt about education? Cite evidence.

5 How might Dickens's own childhood have shaped A Christmas Carol? Make two connections.

An original story

1 Every spring, Mr. Okafor planted more tomatoes than he could possibly eat. Neighbors assumed he was simply a poor planner.

2 In July, the reason became clear. Each morning, a bag of ripe tomatoes appeared on a different doorstep: the widow who rarely left her apartment, the family whose father had lost his job, the teenager who lived alone above the laundromat.

3 No one ever saw him deliver them. When asked, Mr. Okafor only shrugged. "A garden," he said, "is too big a thing for one person."

1. Why does Mr. Okafor plant so many tomatoes? Cite two details.

Christmas in Dickens's London

An original informational text

1 In 1843, London was the largest city in the world, home to about two million people. Its factories, banks, and docks made some families very rich. Yet many Londoners lived crowded into a single damp room, and a coal fire, a hot meal, or a pair of boots was a luxury.

2 For a working family, the Christmas feast took planning. Many saved for months by joining a goose club, paying a few pennies each week to a shopkeeper so that they could collect a goose at Christmas. Families with no oven of their own carried their dinner to the local baker's shop, where it was roasted in the big bread ovens for a small fee.

3 People who could not support themselves at all might be sent to a workhouse. Under the Poor Law of 1834, workhouses were made deliberately unpleasant: families were separated, the work was hard, and the food was plain and meager, so that only the truly desperate would ask to enter.

4 Christmas itself was changing. The first Christmas card for sale was printed in London in 1843, the same year A Christmas Carol appeared. Over the following decades, the holiday grew from a modest celebration into the family festival of gifts, feasting, and charity that Dickens's story helped to shape.

3 Identify two central ideas in “Christmas in Dickens's London.” Cite a detail for each.

The Translator

An original story

1 When Ana's family moved from Colombia to Ohio, Ana was eleven, and her English was better than anyone else's in the family. Almost overnight she became the family's translator.

2 She translated at the bank, where a man in a gray suit spoke too fast and sighed impatiently when her mother asked him to repeat himself. She translated at the doctor's office, choosing words carefully so that her little brother wouldn't be frightened. She translated letters from the landlord, bills from the electric company, and notes from her own teachers, though she sometimes softened those.

3 At first Ana resented it. Her classmates spent afternoons at soccer practice, while she spent hers in waiting rooms. Translating made her feel older than she wanted to be, as if she carried a heavy backpack no one else could see.

4 But one evening, after Ana helped her father through a job interview over the phone, he hung up and was silent for a long moment. Then he said, in careful English, “Thank you, mija. Today you were my voice.” His eyes were bright.

5 Ana realized that translating was not only a burden. It was a bridge, and she was the one building it. The next week, she signed up to volunteer at the community center, helping other newcomers with forms and phone calls. The backpack still felt heavy some days. But now she knew what she was carrying, and why.

1 What does resented mean in paragraph 3? What clue helps?

2 Which word in paragraph 2 has a negative connotation?

INFORMATIONAL TEXT

Ignorance and Want in 1843

An original informational text based on historical facts

1 When the Ghost of Christmas Present reveals two starving children named Ignorance and Want, Dickens was not inventing a fantasy. In 1843, thousands of children in London never went to school. Many worked from the age of six or seven, sweeping chimneys, selling matches, or sorting rags. Others had no work and no home at all.

2 Some reformers tried to help. Volunteers opened ragged schools, so called because the children who came were dressed in rags. The schools were free and met in whatever rooms could be found, often in the poorest streets. Teachers taught reading, writing, arithmetic, and religion, and some schools gave out bread and clothing.

3 Dickens visited one of these schools in September 1843. He wrote to a wealthy friend, Angela Burdett-Coutts, who gave large sums to charity, describing the crowded room and the children's hunger, and asking her to support the school. He believed that a child who was never taught anything would grow up with no choices except crime or the workhouse.

4 Not everyone agreed. Many comfortable people argued that the poor would only become idle if they were helped, and that prisons and workhouses were enough. Dickens put those very words in Scrooge's mouth, and then had the Ghost throw them back at him.

5 Over the next decades, Britain slowly changed. Laws limited children's working hours, and in 1870 Parliament began creating schools for every child. Dickens did not live to see all of these changes, but his story helped persuade a generation of readers that the poor were not a “surplus population” but neighbors.

3 Infer why the author includes the letter to Angela Burdett-Coutts. Cite two details.

4 What can you infer about why the Spirit warns most of all against Ignorance? Use the text and the story.

5 Which sentence best states a central idea?

A Ragged schools met in small rooms.

B Dickens drew on the real suffering of uneducated, poor children to challenge readers to help them.

C Parliament passed a law in 1870.

The Long Way Home

An original story

1 Rain had turned the forest trail into a river of mud by the time Jonah realized he was lost. His phone had no signal, and the map he'd printed was a soggy lump in his pocket.

2 He forced himself to stop and breathe. His grandfather's voice came back to him: When you're lost, the first thing to find is your head. Jonah looked around. Moss grew thickest on the north side of the trees. The stream he'd crossed an hour ago had been flowing east. Camp was east of the stream.

3 Jonah followed the water downhill, slipping and grabbing branches. Twice he wanted to sit down and wait for someone to find him. Twice he kept going.

4 When the orange glow of the campfire finally appeared through the trees, his legs were shaking. His scout leader rushed over, worry on her face. Jonah grinned through the mud. “I found my head first,” he said.

The Masks of Venice

An original informational text

1 For centuries, the people of Venice, Italy, have celebrated Carnival, a festival held before the season of Lent. The most famous symbol of Carnival is the mask.

2 Masks allowed Venetians to hide their identities. A wealthy merchant and a poor servant might stand side by side, and no one could tell them apart. For a few weeks, the strict rules about class seemed to disappear.

3 Today, mask makers in Venice still craft masks from papier-mâché, paint, and gold leaf. Tourists from around the world buy them, keeping an old tradition alive in a modern city.

The Bridge Builders

An original informational text based on historical facts

1 In 1869, the engineer John Roebling began designing a bridge to connect the cities of Brooklyn and New York across the East River. At the time, it would be the longest suspension bridge in the world. Many experts said it could not be done.

2 Only weeks into the project, Roebling's foot was crushed in an accident at the docks, and he died of an infection. His son, Washington Roebling, took over. Washington spent long hours in the caissons, huge underwater chambers where workers dug the foundations. There, many workers developed a mysterious illness, now called decompression sickness, caused by returning too quickly from the high-pressure air below. In 1872, Washington himself became so ill that he could no longer visit the site.

3 That was when his wife, Emily Warren Roebling, stepped forward. From their apartment window, Washington watched the construction through a telescope. Emily carried his instructions to the engineers, but she did far more than deliver messages. She studied mathematics, the strength of materials, and cable construction. For over a decade, she managed communication with officials and engineers, and many came to rely on her knowledge.

4 When the Brooklyn Bridge opened on May 24, 1883, Emily Roebling was the first person to ride across it. A plaque on the bridge today honors the three Roeblings, a reminder that the bridge was the work of a family's determination as much as an engineer's design.

1 Why did many experts doubt the bridge could be built?

2 What caused the workers' “mysterious illness”?

An original mystery

1 When Ms. Patel arrived at the library on Monday, she found the rare-books room locked, just as she had left it. But the glass case in the middle of the room was empty. The map that had been there, a 300-year-old chart of the coast, was gone.

2 She called her assistant, Leo, and he came at once. He said that he had locked the door himself on Friday. When she asked him who else had a key, he hesitated. “Only you and me,” he said, “and the cleaning company.”

1. Fix: Leo and her had keys.

2. Leo says “Only you and me.” Which case is “me”? What would formal writing use?

3. Fix the ambiguous pronoun: Ms. Patel told the cleaner that she had lost the key.

4. What is the central puzzle of this mystery?

5. Which detail might be a clue, and which might be a red herring? Explain.

MYSTERY

The Vanishing Violinist

An original mystery

1 On the night of the concert, the famous violinist Marco Bellini did not appear. The orchestra waited, the audience grew restless, and at last the conductor announced that the performance would be canceled.

2 Detective June Okoro was called the next morning. Bellini's dressing room was neat, except for an open violin case. The case was empty. On the mirror, someone had written three words in red lipstick: Ask the twin.

3 Okoro learned that Bellini had a twin brother, Luca, who had once played violin too. The brothers had not spoken in years. Luca was found that afternoon at a café across town, calmly drinking coffee. When Okoro showed him a photograph of the message, he went pale. “He has done it again,” Luca whispered.

4 Luca explained that whenever Marco felt he could not perform perfectly, he disappeared and blamed his brother so that no one would think he was afraid. Okoro found Marco hiding at a hotel, his violin in his lap. He had been practicing all night.

5 “Perfection,” Marco said quietly, “is a cage I built myself.” The next evening, he walked onto the stage, bowed to the audience, and played, not perfectly, but beautifully.

1 What is the central mystery in paragraphs 1–2?

Fog and Gaslight: Victorian London

An original informational text

A City of Contrasts

In the 1880s, London was the largest city in the world, home to more than four million people. Its wealthy neighborhoods had grand squares and elegant houses. Only a short walk away, poor families crowded into narrow lanes and dark courtyards.

The Famous Fog

London's fogs were thick, yellow-brown, and sometimes deadly. Coal fires in homes and factories filled the damp air with smoke. On the worst days, people could not see their own hands, and travelers lost their way on familiar streets.

Light in the Darkness

Gas streetlamps lit the main roads at night. Lamplighters walked the streets each evening, lighting lamps one by one. But the light was dim, and alleys and back streets remained in deep shadow.

Respectability and Secrets

Victorian society placed great value on respectability, a reputation for proper behavior. Gentlemen were expected to control their emotions and hide any private weaknesses. Many historians believe this pressure to appear perfect is one reason stories about hidden second selves fascinated Victorian readers.

INFORMATIONAL TEXT

Handwriting as Evidence

An original informational text

1 When a document's author is in doubt, investigators may call on a forensic document examiner, an expert who analyzes handwriting, paper, and ink.

2 No two people write exactly alike. Examiners compare exemplars, samples known to be written by a person, with the questioned document. They look at letter shapes, spacing, slant, pen pressure, and the way letters connect.

3 A clever forger may copy the shapes of letters but often writes too slowly and carefully. The result can show shaky lines, blunt starts and stops, and unnatural pauses, which examiners call signs of hesitation.

4 Handwriting analysis cannot prove guilt by itself, but combined with other evidence it can be powerful. In Strange Case of Dr. Jekyll and Mr. Hyde, a clerk's observation about two handwriting samples gives Mr. Utterson a chilling clue.

7 Explain why the handwriting clue in Chapter 5 is so chilling. Use two technical terms.

ARGUMENT

Should Science Have Limits?

An original opinion essay

1 Scientific discoveries have given us vaccines, electricity, and the internet. Some people argue that science should never be restricted, because we cannot know which experiment will lead to the next great breakthrough.

2 I disagree. Science must have limits, especially when experiments involve human beings. History offers painful examples of researchers who harmed people in the name of progress, often people who never agreed to take part.

3 Of course, limits can slow discovery, and rules written by people who don't understand the research may block valuable work. These concerns are real. But careful review by independent experts, who weigh risks and benefits before an experiment begins, protects both the public and the trust that science depends on.

Scientists Who Experimented on Themselves

An original informational text based on historical facts

The Doctor Who Reached His Own Heart

In 1929, a young German doctor named Werner Forssmann believed a thin tube could be guided through a vein all the way to the heart, a procedure many experts considered deadly. When his supervisors refused permission, Forssmann numbed his own arm, inserted a tube into a vein, and pushed it toward his heart. Then he walked to the X-ray room to photograph the result.

Forssmann's colleagues were not impressed, and he was criticized for his reckless act. Decades later, however, the technique, called cardiac catheterization, became a standard part of medicine. In 1956, Forssmann shared the Nobel Prize in Physiology or Medicine.

The Doctor Who Drank Bacteria

In the early 1980s, Australian doctors Barry Marshall and Robin Warren argued that many stomach ulcers were caused by bacteria, not stress. Other scientists doubted them. In 1984, Marshall drank a culture of the bacteria. Within days he became ill with stomach inflammation, supporting the doctors' claim. Marshall and Warren received the Nobel Prize in 2005.

A Risky Tradition

Self-experimentation has produced important discoveries, but it can also cause serious harm, and its results can be misleading because they involve only one person. Today, research involving people is reviewed by ethics committees designed to protect volunteers, including the scientists themselves.

3 How are Jekyll's and the real doctors' motives different?

4 Why might Stevenson's story end in disaster while the real stories led to discoveries?

The Understudy

An original story

1 For six weeks, Priya had been the understudy for the lead role in the school play. Every afternoon she sat in the back row of the auditorium, mouthing every line while Madison rehearsed onstage. She knew the part better than anyone. No one noticed.

2 Then, on opening night, Madison lost her voice.

3 Backstage was chaos. The director paced. The stage manager whispered into her headset. Priya stood very still, her heart hammering so hard she could hear it, a drum in an empty room. Someone pressed a costume into her arms.

4 When the curtain rose, the lights blazed, hot and blinding. For one terrible second, Priya's mind was a blank page. Then she heard the first line, the one she had whispered to herself a hundred times in the dark, and it came out of her mouth as naturally as breathing.

5 Afterward, in the crowded hallway, Madison found her. Her voice was a hoarse whisper, but her smile was real. “You were the role,” she said. Priya laughed. For six weeks she had felt invisible. Tonight, for the first time, she felt like she was standing in her own light.

1 What does the phrase “No one noticed” reveal about Priya's situation?

2 Explain the effect of the one-sentence paragraph “Then, on opening night, Madison lost her voice.”

3 Explain the metaphor “her heart… a drum in an empty room.”

4 How does the author's diction in paragraph 3 create a tense mood? Cite two words.

5 Explain the simile “as naturally as breathing.”

Part B · Point of view and symbolism (1 point each)

6 The story is told from…

A first person (Priya)
B limited third person (following Priya)
C Madison's point of view

7 What does the reader know about Priya that the other characters don't?

8 What does light symbolize in the story? Cite the beginning and the end.

9 How does Madison's line “You were the role” develop the theme?

Part C · Theme (1 point each)

10 State a theme.

11 How does Priya change from beginning to end?

Part D · Craft analysis (5 points)

12 Write a TEE analysis (two paragraphs) of how the author uses two techniques (for example, pacing, metaphor, symbolism, diction) to show Priya's transformation.

SCIENCE TEXT

What Is the Fourth Dimension?

An original informational text

1 We usually describe space with three dimensions: length, width, and height. A shoebox, for example, is a certain number of inches long, wide, and tall. To find any point inside it, you need exactly three measurements.

2 But objects also exist in time. A shoebox that sits on a shelf for ten years has a past and a future as well as a size. Scientists and writers have long wondered whether time might be thought of as a fourth dimension, one that we move through steadily in one direction.

3 In 1895, H. G. Wells imagined a machine that could travel along this fourth dimension as easily as a train travels along a track. Ten years later, the physicist Albert Einstein published his theory of special relativity, which treats space and time as closely connected, and which soon led scientists to describe the universe as four-dimensional "spacetime."

4 Einstein's work showed that time is not the same for everyone: a clock moving very fast ticks more slowly than one at rest. This effect is tiny at everyday speeds but measurable. Satellites in the GPS system must correct their clocks for it, or the maps on our phones would quickly become inaccurate.

3 How does the shoebox example help explain dimensions?

1 Mara gripped the brass lever with both hands. The machine hummed softly, then louder, until the whole laboratory trembled. She took a long breath and pushed.

2 Instantly, the room dissolved. Sunlight and darkness flickered across the walls faster than she could blink, day and night racing like the pages of a book flipped by an impatient thumb. The plant on the windowsill shot upward, bloomed, withered, and crumbled into dust. Outside, buildings rose like mushrooms after rain, then sagged, then vanished.

SCIENCE FICTION

The Last Library

An original science-fiction story

1 In the year 2340, the city of New Aldora had no books. Information floated in the air as shimmering holograms, appearing instantly whenever anyone spoke a question. Paper had not been made for two hundred years.

2 Twelve-year-old Ren had never touched a book until the afternoon she followed a stray cat through a crumbling doorway at the edge of the old district. Inside, dust drifted lazily through slanted beams of sunlight. Shelves stretched from the cracked marble floor to the high, arched ceiling, and every shelf was crowded with books: thick ones, thin ones, leather-bound ones with gold letters worn nearly smooth.

3 Ren pulled one down carefully. The pages were yellow and fragile, and they smelled like old wood and rain. She sat on the floor and read until the light faded completely. The story did not appear instantly. She had to wait for it, page by page, and somehow the waiting made it better.

4 The next day, Ren came back. The day after that, she brought her best friend, Kai, who rolled his eyes until he opened a book of maps and fell silent for an hour. By the end of the month, a small, curious group of children met in the old library every afternoon, reading quietly, arguing loudly, and dusting the shelves with surprising care.

1 What is surprising about New Aldora's relationship with books?

2 How does Ren's experience of reading differ from getting information as holograms?

Utopias and Dystopias

An original informational text

1 A utopia is an imagined perfect society, where everyone is happy and no one suffers. The word was coined in 1516 by the English writer Thomas More, who combined Greek roots meaning "no place," a sly hint that such a perfect world may not exist.

2 A dystopia is the opposite: an imagined society in which something has gone terribly wrong, often hidden behind a surface that looks peaceful or orderly. Dystopian stories usually exaggerate a problem in the writer's own time to warn readers about where it might lead.

3 When the Time Traveller first arrives in the year 802,701, he believes he has found a utopia. The Eloi live in a garden-like world without work, war, or disease. But as he explores, he discovers that the beautiful surface hides a disturbing truth. Many readers see The Time Machine as an early dystopian warning about the growing divide between the wealthy and the working poor in Victorian England.

The Seed Vault

An original informational text based on facts

1 On a frozen island far north of mainland Norway, a tunnel leads deep into a mountain of permafrost. At the end of the tunnel, behind thick steel doors, lies the Svalbard Global Seed Vault, which some people call a “doomsday vault.”

2 Opened in 2008, the vault stores backup copies of seeds from seed banks around the world. Because crops can be lost to war, disease, or natural disaster, scientists wanted a safe place where samples of the world's food plants could survive almost any catastrophe. The vault can hold about 4.5 million seed samples, and it already holds more than one million.

3 The location was chosen carefully. Svalbard is remote, politically stable, and geologically quiet. The permafrost keeps the rock naturally cold, so even if the cooling system failed, the seeds would stay frozen for years.

4 In 2015, the vault was used for the first time. War in Syria had damaged a major seed bank near the city of Aleppo, and researchers withdrew seeds that had been deposited at Svalbard to begin rebuilding the collection elsewhere. The withdrawal proved the vault's purpose: it is not a museum but an insurance policy for the future of farming.

1 What is the purpose of the Svalbard Global Seed Vault?

2 Why was Svalbard chosen? Give two reasons.

3 Why was the 2015 withdrawal significant?

4 Explain the metaphor “an insurance policy for the future of farming.”

Part B · Sentences and clauses (1 point each)

5 Type: “Opened in 2008, the vault stores backup copies of seeds from seed banks around the world.”

6 Type of the sentence beginning “Because crops can be lost…”

7 Dependent clause in that sentence

8 Type: “The vault can hold about 4.5 million seed samples, and it already holds more than one million.”

9 Find a participial phrase in paragraph 1 or 2.

Part C · Phrases, combining, parallelism (1 point each)

10 Find an appositive or adjective clause in paragraph 1.

11 Is “remote, politically stable, and geologically quiet” parallel? Explain.

12 Combine: The vault is cold. It is dark. It is inside a mountain.

13 Fix: Stored in the vault, scientists protect the seeds.

14 Make parallel: The vault protects seeds from war, disease, and when disasters happen.

Part D · Writing (5 points)

15 Write a paragraph (7–9 sentences) explaining why the seed vault matters. Use at least one simple, compound, complex, and compound-complex sentence, a participial phrase, and parallel structure.

INFORMATIONAL TEXT

The Harlem Renaissance

An original informational text

1 In the 1920s and early 1930s, the New York City neighborhood of Harlem became the center of an extraordinary flowering of African American art, music, literature, and ideas. This movement is now called the Harlem Renaissance. Renaissance means "rebirth."

2 Writers such as Langston Hughes, Zora Neale Hurston, Claude McKay, Countee Cullen, and Georgia Douglas Johnson published poems, stories, and novels that celebrated Black life and challenged racism. Musicians such as Duke Ellington and Louis Armstrong helped make jazz one of the most important art forms in America. Painters such as Aaron Douglas created bold images inspired by African art and modern design.

3 The movement grew out of the Great Migration, as hundreds of thousands of Black Southerners moved to Northern cities in search of opportunity. In Harlem, writers, thinkers, and artists found one another, and magazines and newspapers gave them places to publish.

4 The Harlem Renaissance did not end racism or segregation. But it changed how many Americans saw Black artists and how Black Americans expressed their own identity, and its influence can still be heard and read today.

3 State the central idea of “The Harlem Renaissance.” Cite two details.

4 Why does the Reader include a note about historical language? How will you handle it in your writing?

5 According to the passage, what did the movement change, and what didn't it change?

2. Year the poem was published

Analyze the Poem

POEM

We Wear the Mask

Paul Laurence Dunbar (1895). Public domain.

We wear the mask that grins and lies,
It hides our cheeks and shades our eyes,—
This debt we pay to human guile;
With torn and bleeding hearts we smile,
And mouth with myriad subtleties.

Why should the world be over-wise,
In counting all our tears and sighs?
Nay, let them only see us, while
We wear the mask.

We smile, but, O great Christ, we cry
To thee from tortured souls arise.
We sing, but oh the clay is vile
Beneath our feet, and long the mile;
But let the world dream otherwise,
We wear the mask!

3 Identify two contrasts in the poem (outside vs inside). Explain their effect.

INFORMATIONAL TEXT

The Great Migration

An original informational text based on historical facts

1 Between about 1910 and 1970, roughly six million African Americans left the rural South and moved to cities in the North, Midwest, and West. Historians call this movement the Great Migration. In its first wave, from about 1910 to 1940, more than a million and a half people made the journey.

2 People left for many reasons. In the South, Jim Crow laws enforced segregation and denied Black citizens the right to vote. Violence, including lynching, terrorized communities. Many families worked as sharecroppers, renting land and paying with a share of their crops, a system that often kept them in debt. Around 1915, an insect called the boll weevil destroyed cotton crops across the region.

3 At the same time, Northern cities offered new possibilities. When World War I began, factories needed workers, and immigration from Europe slowed. Black newspapers such as the Chicago Defender published job listings and encouraged readers to come north.

4 Life in the North was not free of racism. Migrants faced discrimination in housing and jobs, and some cities saw violent attacks. Still, many found better wages, better schools for their children, and the chance to vote. In neighborhoods like Harlem in New York and the South Side of Chicago, new communities formed, and their energy helped fuel the Harlem Renaissance.

Charles S. Johnson: Building a Movement

An original informational text based on historical facts

1 Charles S. Johnson was a sociologist, a scientist who studies how societies work. In 1923 he became the founding editor of Opportunity, the magazine of the National Urban League. Johnson believed that art and literature could change how Americans thought about race, and he used Opportunity to publish young Black writers and to award prizes for their work.

2 In 1924, Johnson organized a dinner at the Civic Club in New York, bringing together Black writers and white editors and publishers. Many historians see this event as a turning point: within a year, major magazines and publishing houses were seeking out Black writers. Johnson later became the first Black president of Fisk University, in 1946.

Why We Should Study the Harlem Renaissance

Every middle school should teach the Harlem Renaissance. First, its writers created some of the most important poems in American literature; Langston Hughes's work is read around the world. Second, studying the period helps students understand how art can respond to injustice. Third, it's really interesting, and everyone I know loves jazz.

The Black Press

An original informational text based on historical facts

1 In the early twentieth century, mainstream newspapers often ignored or misrepresented Black communities. In response, Black journalists built their own press.

2 The Chicago Defender, founded by Robert S. Abbott in 1905, became one of the most widely read Black newspapers in the country. Railroad porters carried copies south, where they were passed from hand to hand. The Crisis, the magazine of the NAACP edited by W. E. B. Du Bois, began in 1910 and published essays, news, and poetry, including early work by Langston Hughes.

3 Journalists such as J. A. Rogers, a Jamaican-born writer who wrote for the Pittsburgh Courier, researched and published the achievements of people of African descent throughout history, challenging claims that Black people had no history worth studying.

4 The Black press informed readers, organized communities, and gave Harlem Renaissance writers a place to be heard. Without it, the movement might never have reached a national audience.

Alain Locke and The New Negro

An original informational text based on historical facts

1 In March 1925, the magazine Survey Graphic, edited by Paul Kellogg, published a special issue devoted to Harlem. Its guest editor was Alain Locke, a philosopher at Howard University and the first African American Rhodes Scholar.

2 Later that year, Locke expanded the issue into a book, The New Negro: An Interpretation. It gathered essays, fiction, poetry, and art by many of the movement's leading figures.

3 In his essays, Locke argued that a new spirit of pride, self-respect, and creativity was rising among Black Americans, especially young people in cities. He believed that through art and literature, Black Americans could define themselves rather than be defined by others' stereotypes.

4 Not everyone agreed with Locke's emphasis on art. Some leaders argued that political and economic action, such as fighting for voting rights and better jobs, mattered more. The debate itself shows how many voices the Harlem Renaissance included.

2 Hughes wanted to write about ordinary people: workers, musicians, and families. He used the rhythms of blues and jazz in his poetry so that his poems sounded like the music of Harlem.

1 When Langston Hughes published his second book of poems in 1927, many reviewers in the Black press criticized it harshly. They argued that his poems about working-class life and blues singers presented an unflattering picture of Black Americans to white readers.

2 Hughes defended his choices. In a famous 1926 essay, “The Negro Artist and the Racial Mountain,” he argued that Black artists should express themselves freely and honestly, without worrying about pleasing either white or Black audiences. Today, many critics consider that book among his best work.

INFORMATIONAL TEXT

Evidence and Belief

An original informational commentary

1 When the Time Traveller finishes his story, most of his guests do not believe him. The Medical Man examines the strange white flowers the Traveller brought back and admits he cannot identify them, yet he still doubts the tale. The Editor jokes that it is a pity the Traveller is not a writer of stories.

2 Their reaction raises an old question: what kind of evidence is enough to believe something extraordinary? Many scientists follow a principle often summed up as “extraordinary claims require extraordinary evidence.” Two unusual flowers and a battered machine are intriguing, but they are not proof.

3 Yet the narrator is not so sure. He returns the next day and sees the Traveller preparing to leave again, carrying a small camera and a knapsack, perhaps to bring back the proof his friends demanded.

3 Is the guests' skepticism reasonable? Use the principle in the passage.

4 Why does Wells end with the narrator's uncertainty instead of clear proof?

Langston Hughes: Poet of the People

An original informational text

1 Langston Hughes (1901–1967) was one of the most important voices of the Harlem Renaissance. He grew up mostly in the Midwest, and as a young man he worked many jobs, including as a sailor and a busboy, while he wrote poetry. His first book of poems, The Weary Blues, appeared in 1926.

2 Hughes wanted his poems to sound like the people he knew. He borrowed the rhythms of jazz and the blues, repeated lines the way a singer repeats a chorus, and used everyday words instead of fancy ones. His tone could be proud, playful, sorrowful, or defiant, sometimes all in a single poem.

3 Some critics of his time thought that poetry should be formal and elevated. Hughes disagreed. He believed that the lives, speech, and music of ordinary Black Americans were worthy subjects for art, and generations of later writers followed his lead.

Paul Laurence Dunbar (1895). Public domain.

We wear the mask that grins and lies,
It hides our cheeks and shades our eyes,—
This debt we pay to human guile;
With torn and bleeding hearts we smile,
And mouth with myriad subtleties.

Why should the world be over-wise,
In counting all our tears and sighs?
Nay, let them only see us, while
We wear the mask.

We smile, but, O great Christ, we cry
To thee from tortured souls arise.
We sing, but oh the clay is vile
Beneath our feet, and long the mile;
But let the world dream otherwise,
We wear the mask!

INFORMATIONAL TEXT

Georgia Douglas Johnson and the S Street Salon

An original informational text based on historical facts

1 Georgia Douglas Johnson (1880–1966) was a poet, playwright, and teacher who lived in Washington, D.C. Her first book of poems, The Heart of a Woman, was published in 1918, and she went on to publish several more collections and to write many plays.

2 Johnson is also remembered as a host. For years, on Saturday evenings, writers and artists gathered at her home on S Street to read their work aloud, trade ideas, and encourage one another. Young writers such as Langston Hughes and Jean Toomer were among the visitors. As a result, her home became one of the meeting places that connected the Harlem Renaissance to Washington.

3 In contrast to some writers who became famous quickly, Johnson spent much of her life balancing her writing with work and family. Nevertheless, she kept writing, and her support for other artists helped the movement grow.

INFORMATIONAL TEXT

Elise Johnson McDougald

An original informational text based on historical facts

1 Elise Johnson McDougald (1885–1971) was an educator and writer in New York City. She worked to improve schools and job opportunities for Black children and women, and she became one of the first Black women to serve as a principal in the city's public schools.

2 Her essay "The Task of Negro Womanhood" appeared in The New Negro (1925), the influential collection edited by Alain Locke. In it, she describes the many kinds of work Black women were doing in Harlem, from homes and factories to offices and professions, and argues that they faced the double burden of racism and sexism. She supports her claims with observations of real working lives rather than with stereotypes.

Lanterns on the Hill

An original story

1 Every summer evening, my grandmother climbed the hill behind her house with a paper lantern. She never explained why. I was eight the first time I followed her, my sneakers slipping on the dry grass.

2 At the top, she lit the candle inside and held the lantern out over the valley. Below us, one by one, other lights answered: a porch lamp, a flashlight, a lantern just like hers. “Those are my friends,” she said. “We can't always visit. But we can always say, I'm still here.”

3 Grandma is gone now. Last night I climbed the hill alone, my hands shaking as I struck the match. For a long moment, the valley stayed dark. Then, far below, a single porch light blinked on, and another, and another, like stars remembering their places.

ARGUMENT

Should Cities Turn Down the Lights?

An original argumentative article

1 Artificial light at night has changed the way we live. It lets us work, travel, and play after sunset. But many scientists argue that cities now produce too much light, and that this "light pollution" has real costs.

2 First, it affects wildlife. Many birds migrate at night and use the stars to navigate; bright city lights can confuse them and lead them to crash into buildings. Sea turtle hatchlings, which crawl toward the brightest horizon, may head inland toward streetlights instead of toward the sea.

3 Second, it wastes energy and money. Lights that shine upward or stay on in empty buildings light nothing useful. In addition, some studies suggest that too much light at night can disturb human sleep.

4 Critics point out that good lighting helps people feel safe and can prevent accidents. That concern is reasonable. However, cities do not need to choose between safety and darkness. Shielded lights that point downward, motion sensors, and warmer, dimmer bulbs can keep streets safe while letting the stars, and the creatures that depend on them, return.

REALISTIC FICTION

The Quilt

An original story

1 My great-aunt Bea's sewing room smelled like cedar and old coffee. The unfinished quilt lay across her table, a patchwork of squares cut from shirts, dresses, and baby blankets that had belonged to four generations of our family.

2 “This blue is your grandfather's work shirt,” she said, tapping a faded square. “This yellow was my wedding dress. And this one,” she touched a tiny square of green flannel, “was your first blanket.” Her hands trembled now, and the needle slipped more often than it used to.

3 “I don't think I'll finish it,” she said quietly. For a long moment, the only sound was the clock ticking on the wall. Then she pushed the needle and thread across the table toward me.

4 I had never sewn anything in my life. My first stitches wandered like lost ants across the fabric. Aunt Bea laughed, then guided my fingers until the thread pulled straight. By the end of summer, the last square was in place, and when we spread the quilt across her bed, it looked like a map of everyone who had ever loved me.

1 Why is the quilt important to the family?

A It is very expensive.
B It is made from clothing of four generations.
C It won a prize.
D It is the narrator's school project.

2 What does the simile “wandered like lost ants” suggest about the narrator's stitches?

3 Why does Aunt Bea push the needle and thread toward the narrator?

A She is angry.
B She wants the narrator to carry on the family work.
C She wants to stop sewing forever.
D She needs a new needle.

4 State the theme and support it with two pieces of evidence.

5 What does the quilt symbolize at the end?

6 Why does the author include the moment when “the only sound was the clock ticking”?

Part B · Informational argument: Should School Start Later? (1 point each unless noted)

ARGUMENT

Should School Start Later?

An original argumentative article

1 Many middle and high schools begin classes before 8:00 in the morning. A growing number of doctors and parents argue that this is too early, and that schools should start later.

2 First, teenagers' bodies are on a different schedule. During puberty, the body's internal clock shifts, so many teens naturally feel sleepy later at night and need to sleep later in the morning. In 2014, the American Academy of Pediatrics recommended that middle and high schools start no earlier than 8:30 a.m.

3 Second, tired students struggle. Students who do not get enough sleep may have trouble paying attention and remembering what they learn. Some people also believe that sleepy students are grumpier, although this is harder to measure.

4 Opponents argue that later start times would make it harder to schedule buses, sports, and after-school jobs. These are real challenges. However, schools that have shifted their schedules have found ways to adjust, and the benefits to students' health and learning are worth the effort.

7 State the author's claim.

8 Identify two reasons and the evidence for each.

10 How does the author rebut it?

11 Which transition signals contrast in the last paragraph?

A First
B Second
C However
D Also

12 What does “internal clock” mean in context?

13 Is the evidence that sleepy students are grumpier strong or weak? Why?

Part C · Language (1 point each)

14 Type: Although the trail was steep, we kept climbing, and we reached the top.

15 Fix the misplaced modifier: Barking loudly, the mail carrier ran from the dog.

16 Punctuate: The guests were doubtful however the narrator wondered.

17 Format: the novel The Time Machine and the poem We Wear the Mask

18 Choose: The ending (affected/effected) me deeply.

19 incredible: prefix, root, meaning

20 Connotation: Which is more positive, curious or nosy?

21 Fix the comma splice: Ariel freed the prisoners, Prospero forgave them.

Part D · Write (6 points)

22 Choose one: (1) Argue whether your school should start later, using evidence from the article and a counterclaim; or (2) Analyze how the author of “The Quilt” uses the quilt to develop the theme. Write 2–3 well-organized paragraphs.

Grade 7 English Language Arts

Student Workbook · 2026–2027

A full year of Grade 7 reading, writing, and language. Lessons pair the Core Knowledge Readers with close reading, vocabulary, grammar, and writing instruction, so students learn to read carefully, think deeply, and write with purpose.

This Student Workbook holds the daily practice pages for every lesson, plus each Friday's Weekly Check, the unit reviews, and the unit tests, with room to show thinking and write complete answers.
